

## Appendix II: Results by Region

### 1.1 How much do you know about climate change?

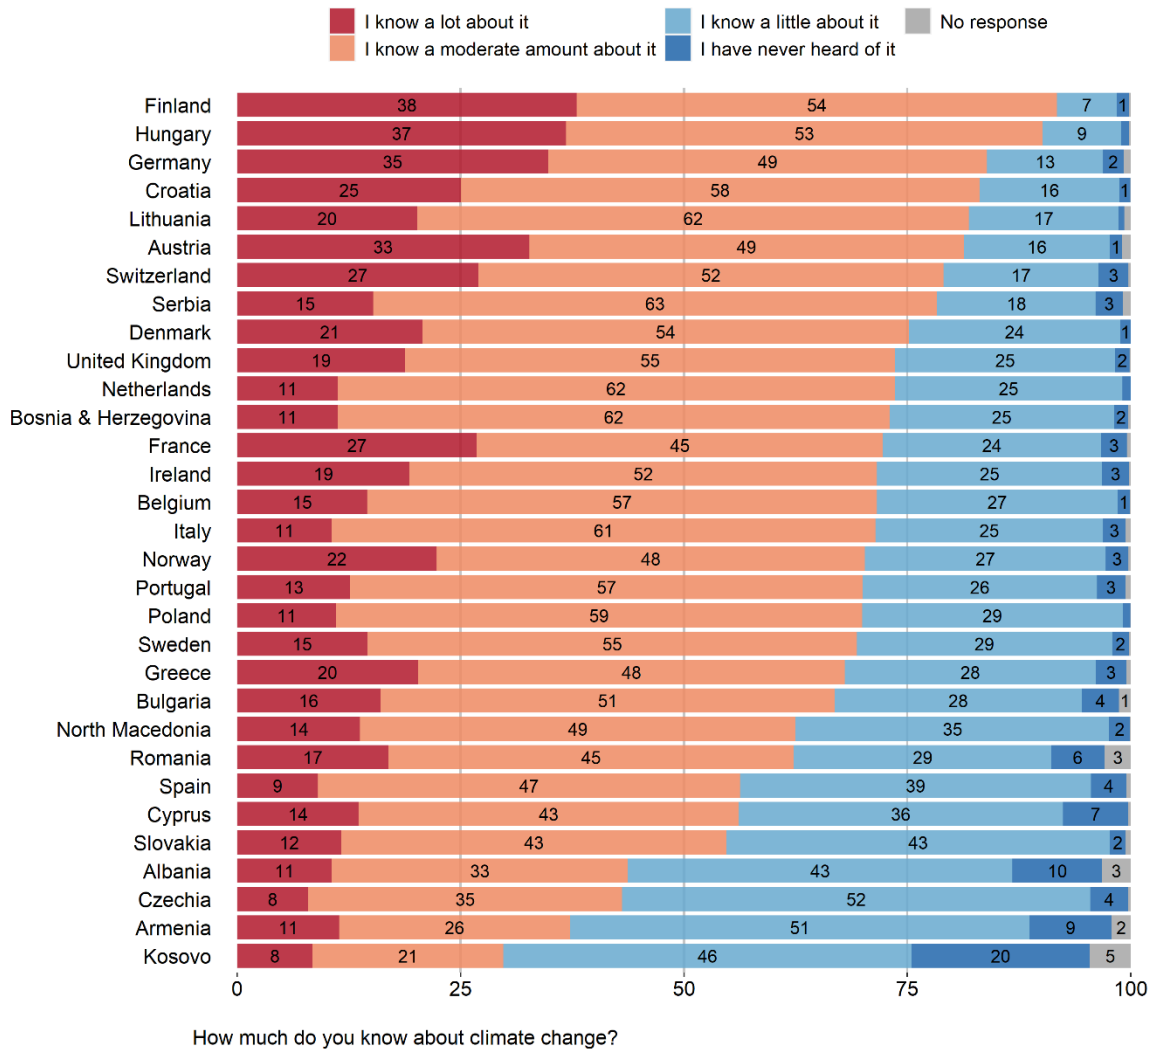

#### Knowledge about climate change

##### Asia & the Pacific

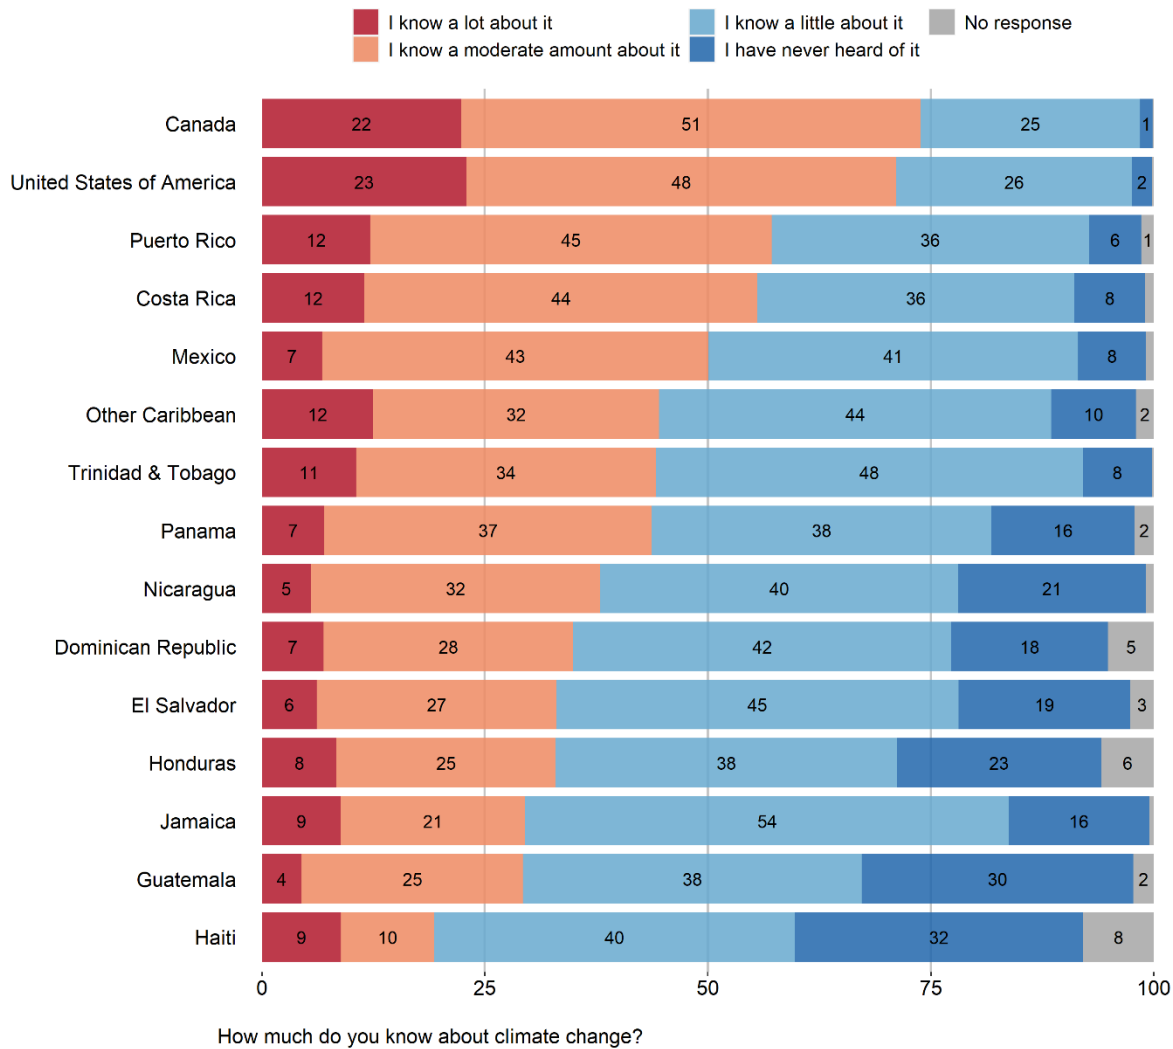

## Knowledge about climate change

### Europe

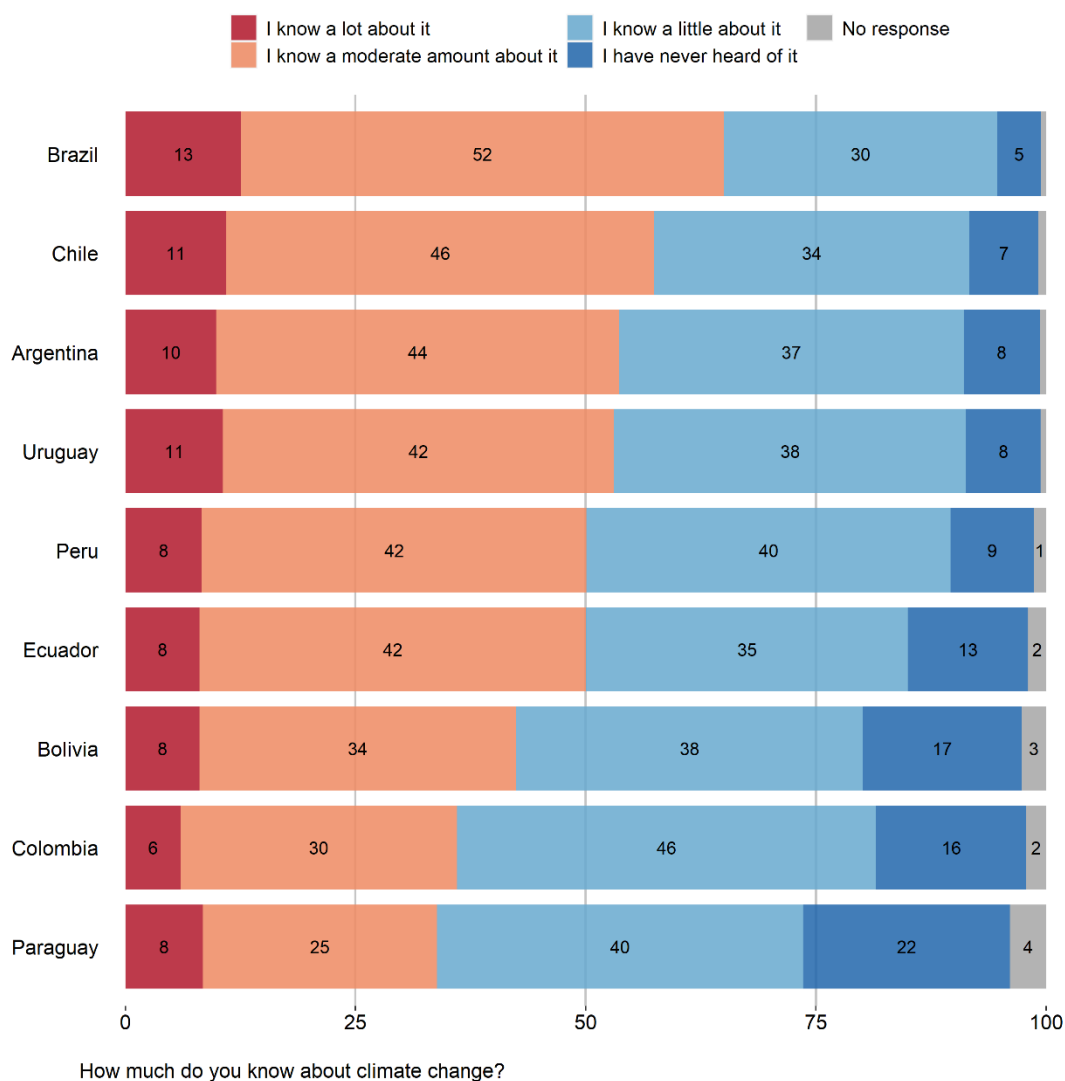

## Knowledge about climate change

### North America

## Knowledge about climate change

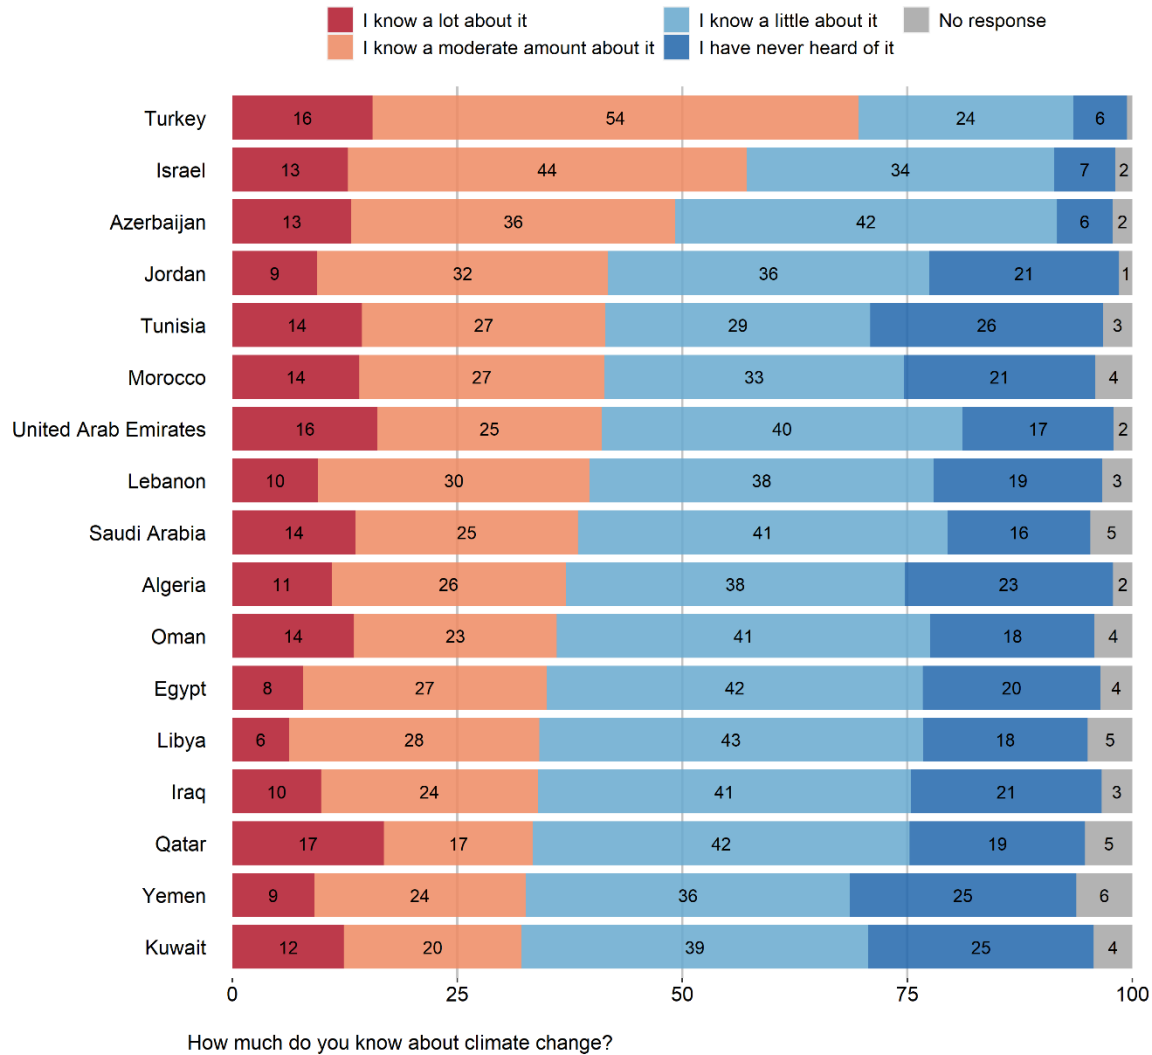

### South America

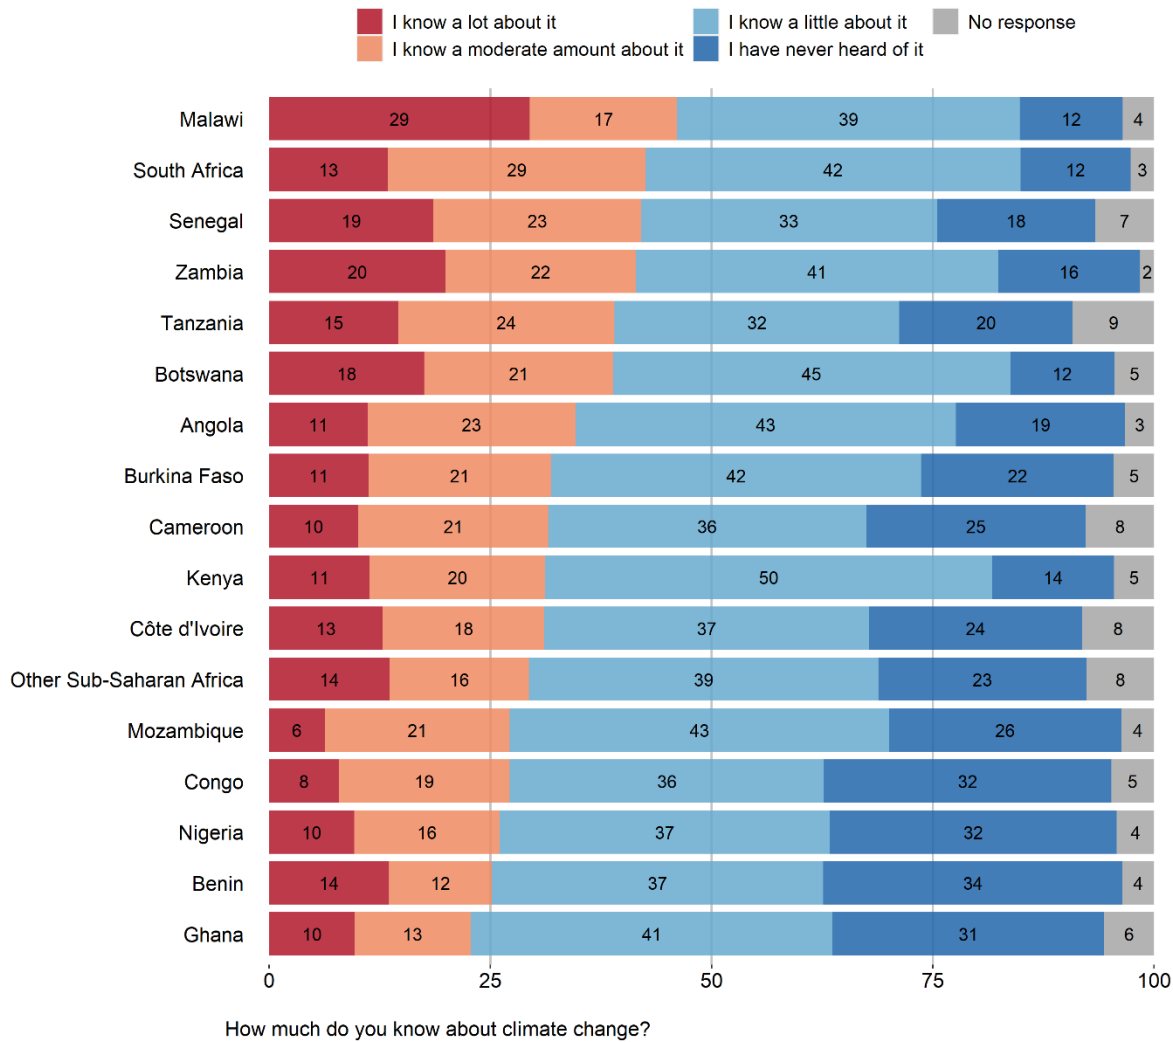

## Knowledge about climate change

### Southwest Asia & North Africa

## Knowledge about climate change

### Sub-Saharan Africa

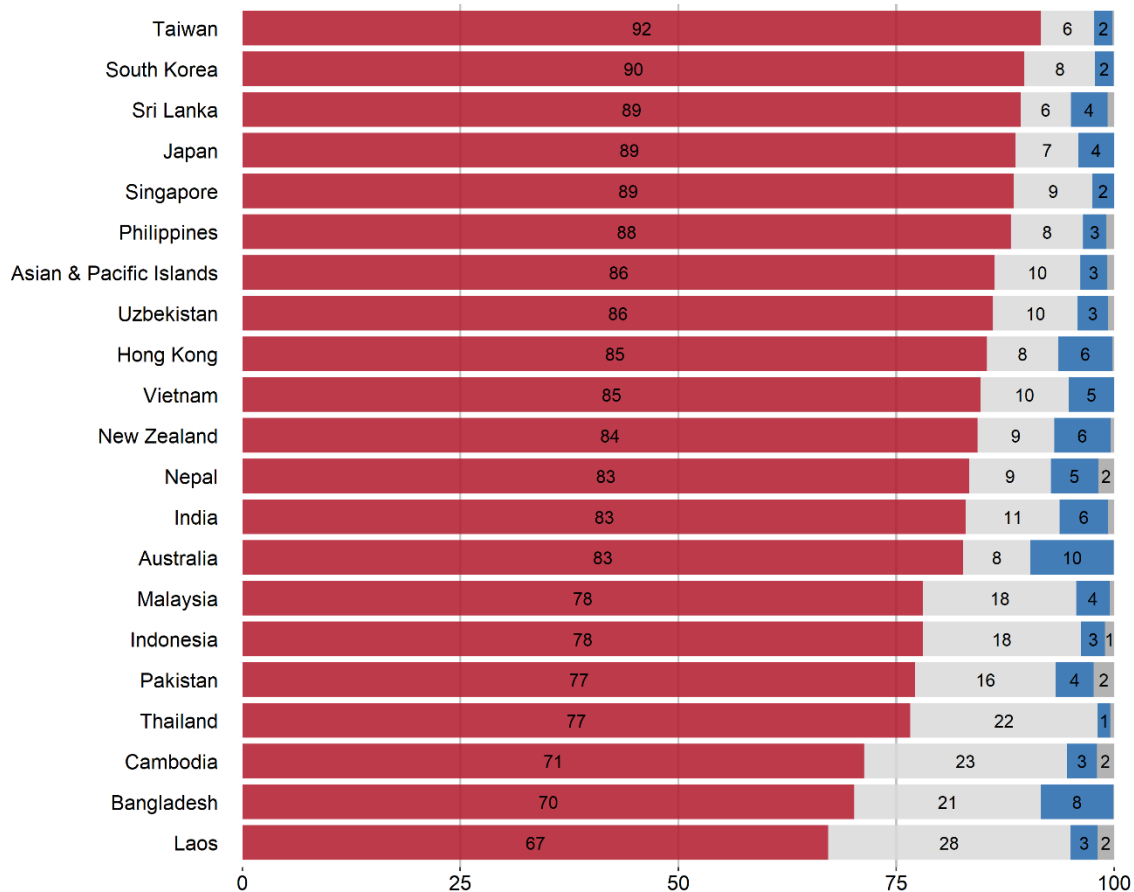

## 1.2 What do you think: Do you think that climate change is happening?

### Climate change is happening

#### Asia & the Pacific

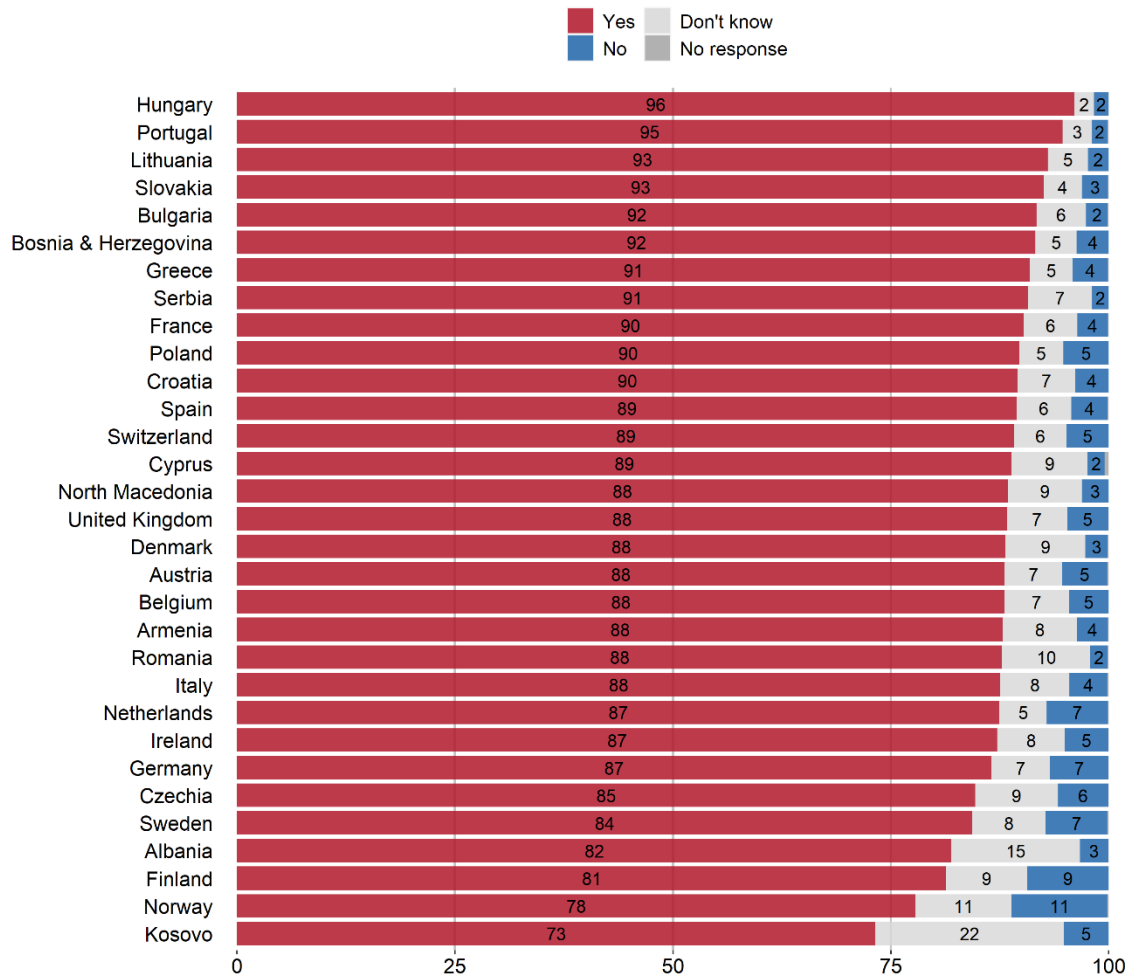

■ Yes
 ■ Don't know
 ■ No
 ■ No response

Climate change refers to the idea that the world's average temperature has been increasing over the past 150 years, will increase more in the future, and that the world's climate will change as a result. What do you think: Do you think that climate change is happening?

## Climate change is happening

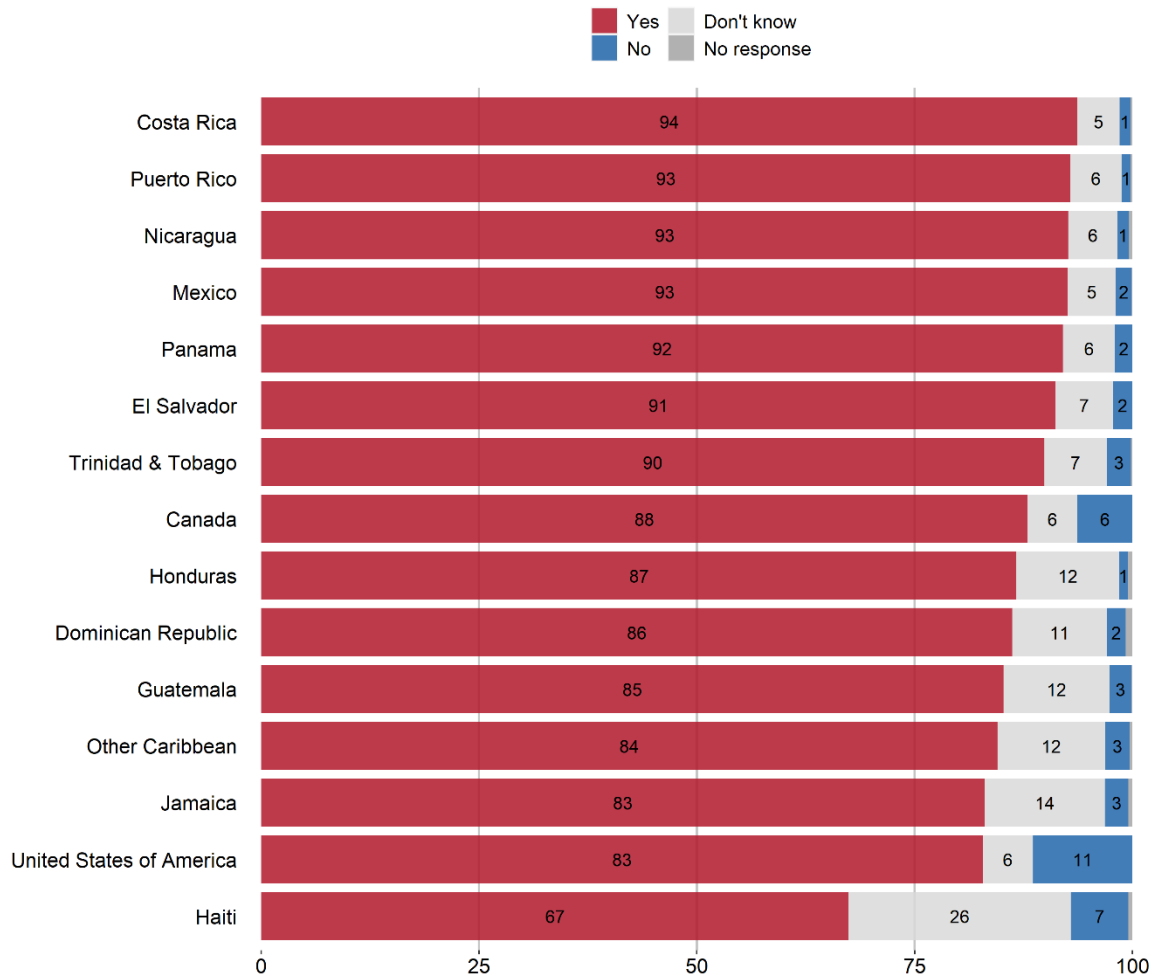

### Europe

Climate change refers to the idea that the world's average temperature has been increasing over the past 150 years, will increase more in the future, and that the world's climate will change as a result. What do you think: Do you think that climate change is happening?

## Climate change is happening

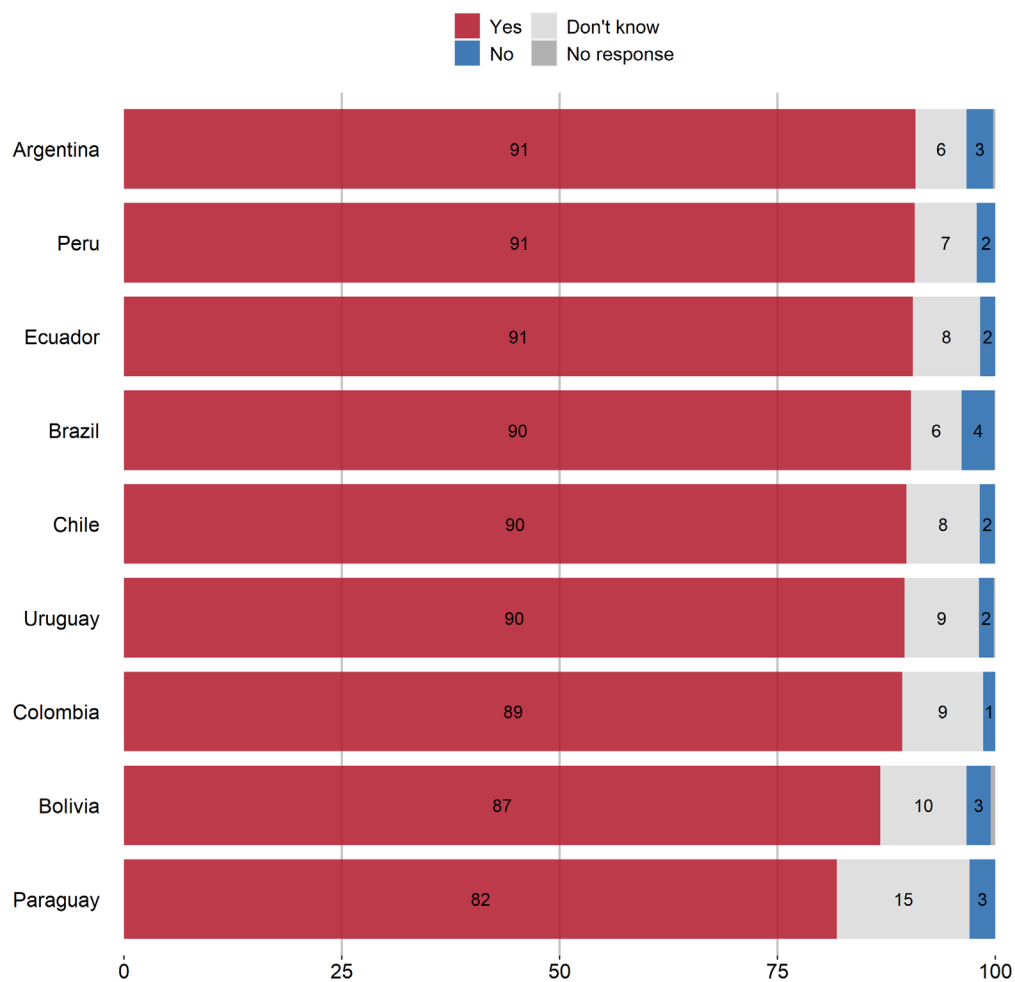

### North America

Climate change refers to the idea that the world's average temperature has been increasing over the past 150 years, will increase more in the future, and that the world's climate will change as a result. What do you think: Do you think that climate change is happening?

## Climate change is happening

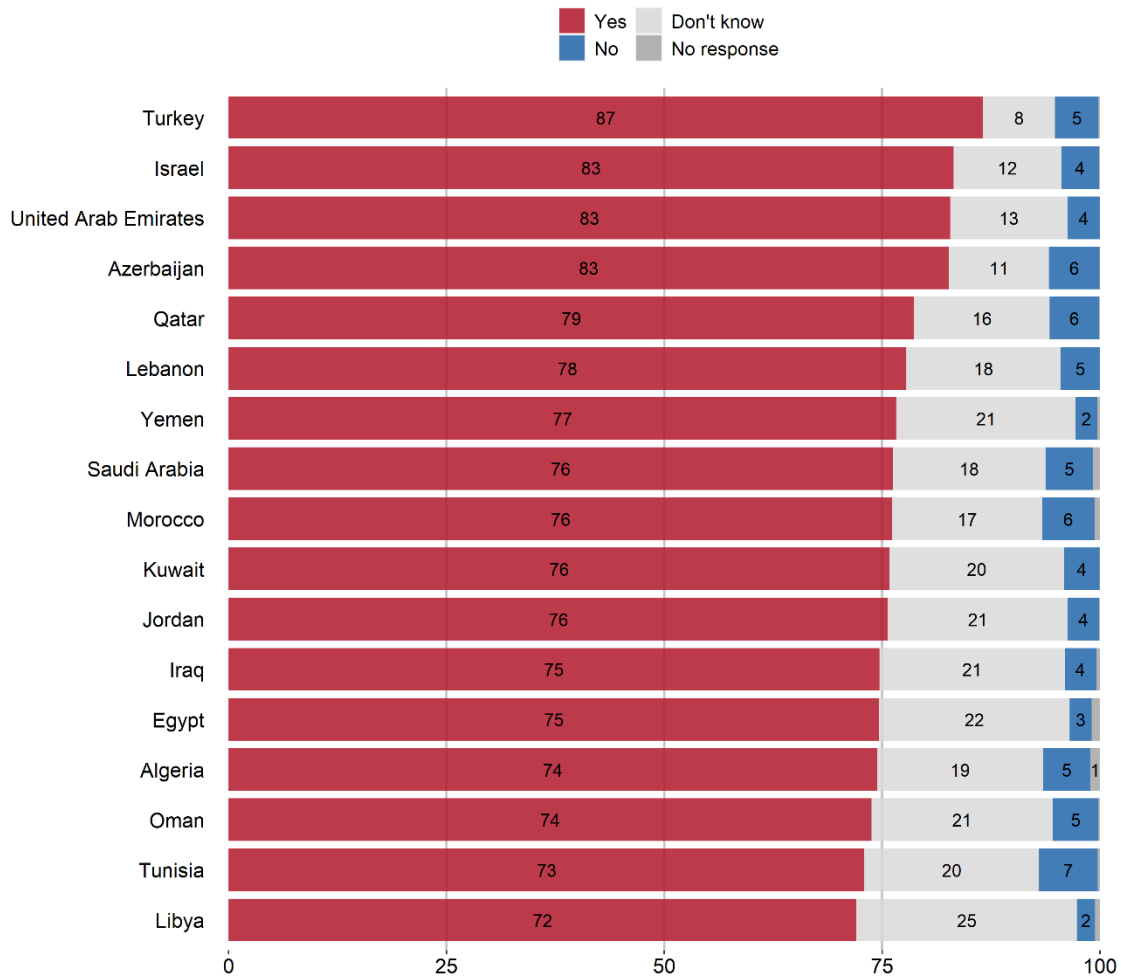

### South America

Climate change refers to the idea that the world's average temperature has been increasing over the past 150 years, will increase more in the future, and that the world's climate will change as a result. What do you think: Do you think that climate change is happening?

## Climate change is happening

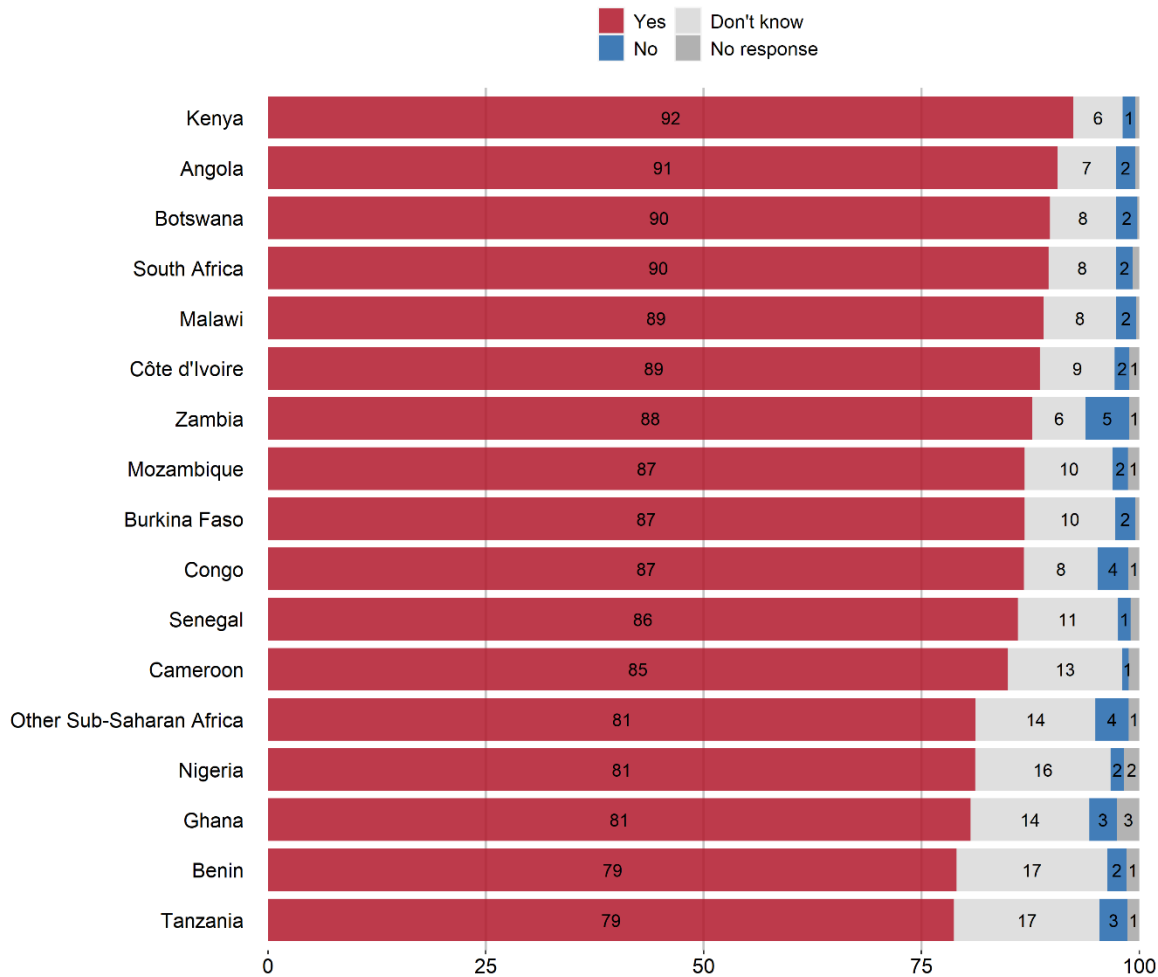

### Southwest Asia & North Africa

Climate change refers to the idea that the world's average temperature has been increasing over the past 150 years, will increase more in the future, and that the world's climate will change as a result. What do you think: Do you think that climate change is happening?

## Climate change is happening

### Sub-Saharan Africa

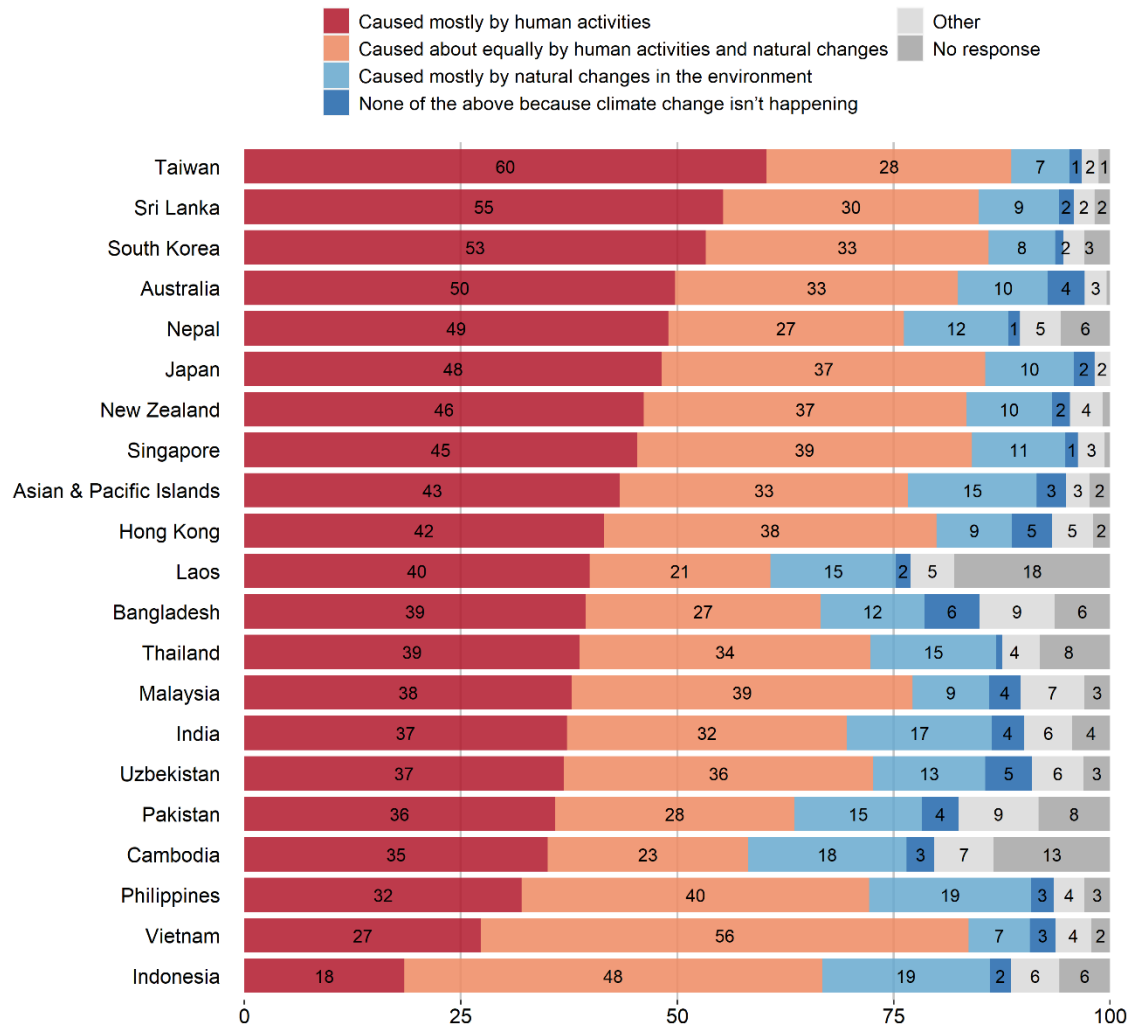

Climate change refers to the idea that the world's average temperature has been increasing over the past 150 years, will increase more in the future, and that the world's climate will change as a result. What do you think: Do you think that climate change is happening?

### 1.3 Assuming climate change is happening, do you think it is...

#### Climate change is caused mostly by human activities

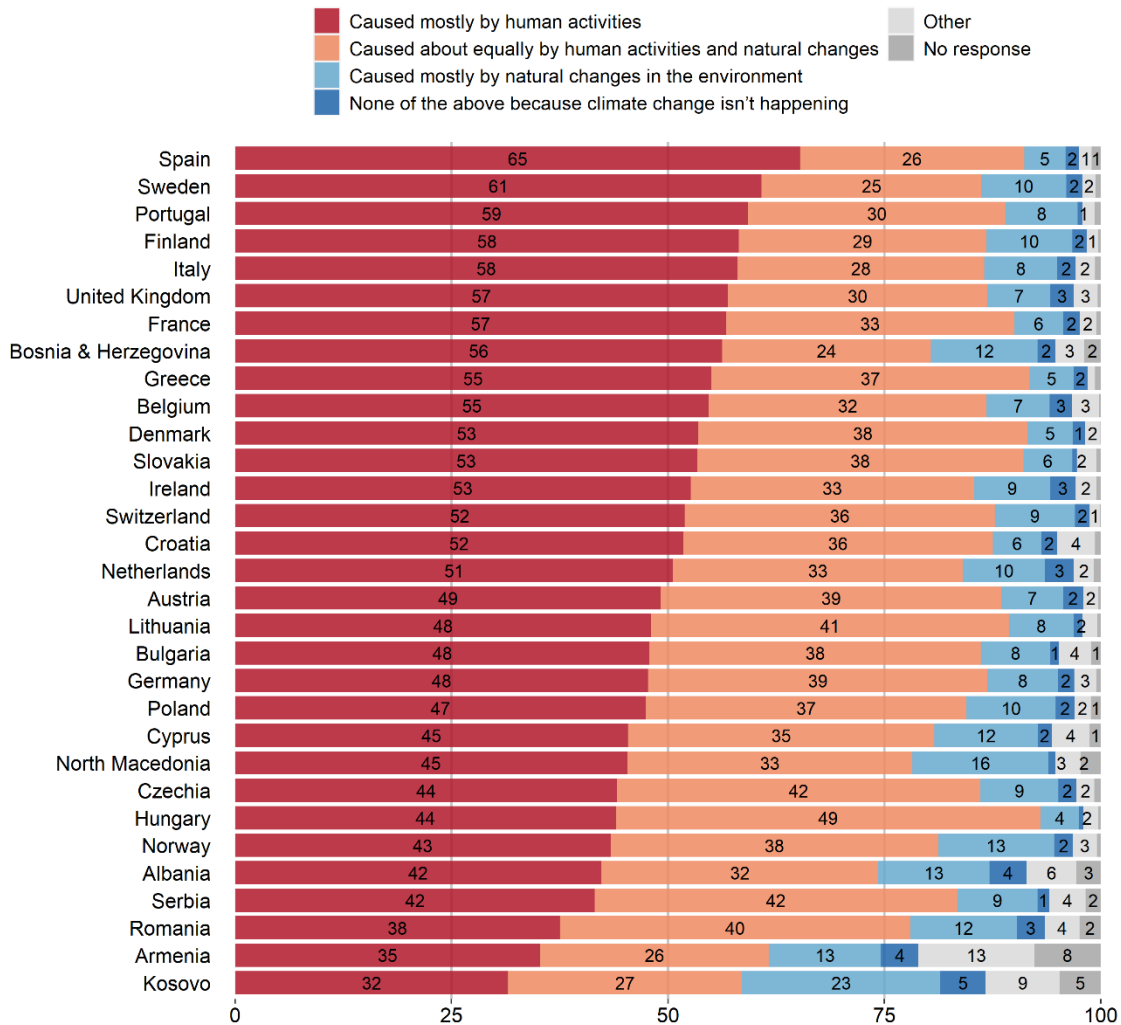

##### Asia & the Pacific

Assuming climate change is happening, do you think it is...

## Climate change is caused mostly by human activities

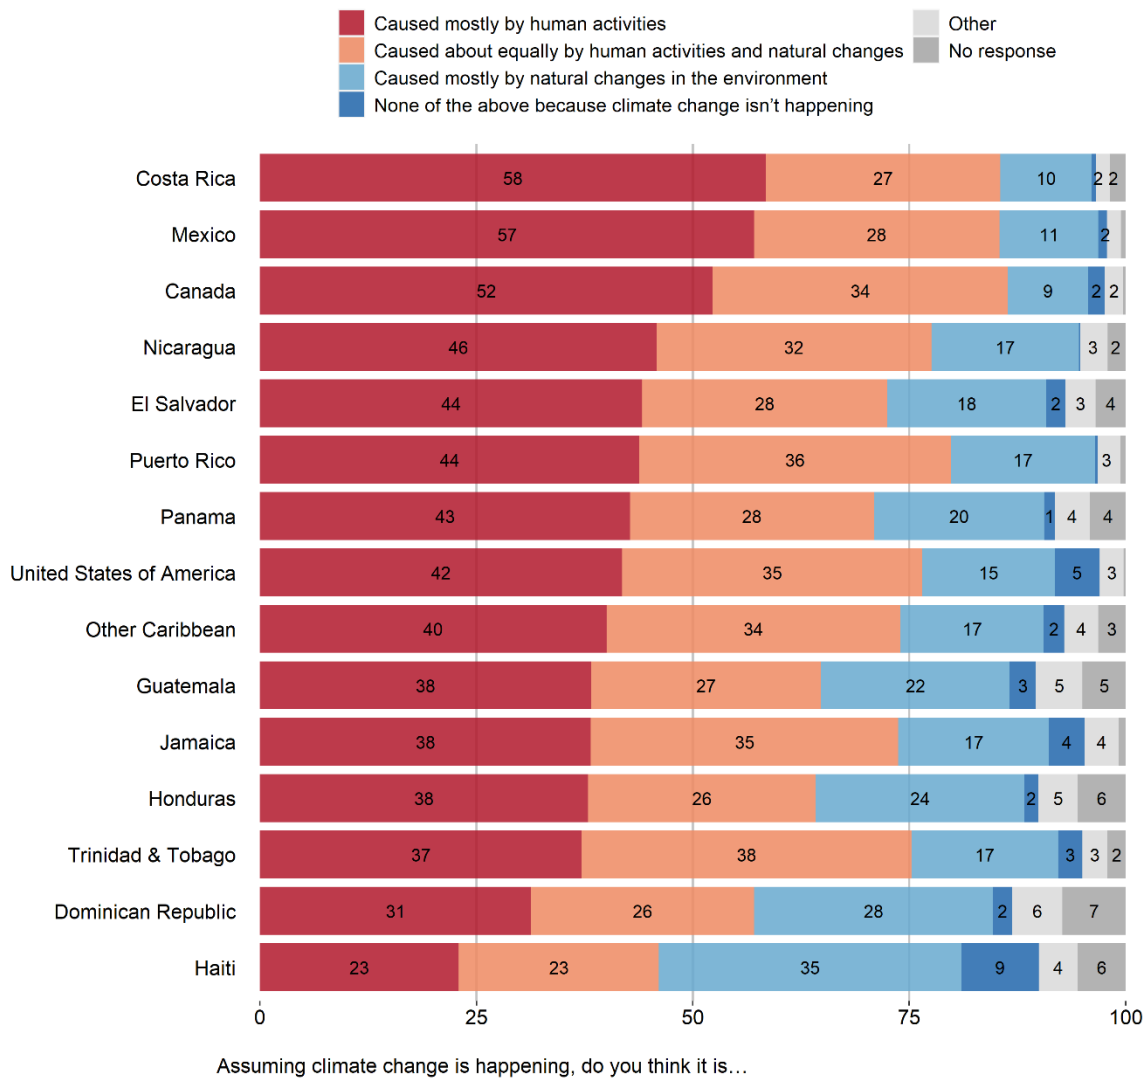

### Europe

Assuming climate change is happening, do you think it is...

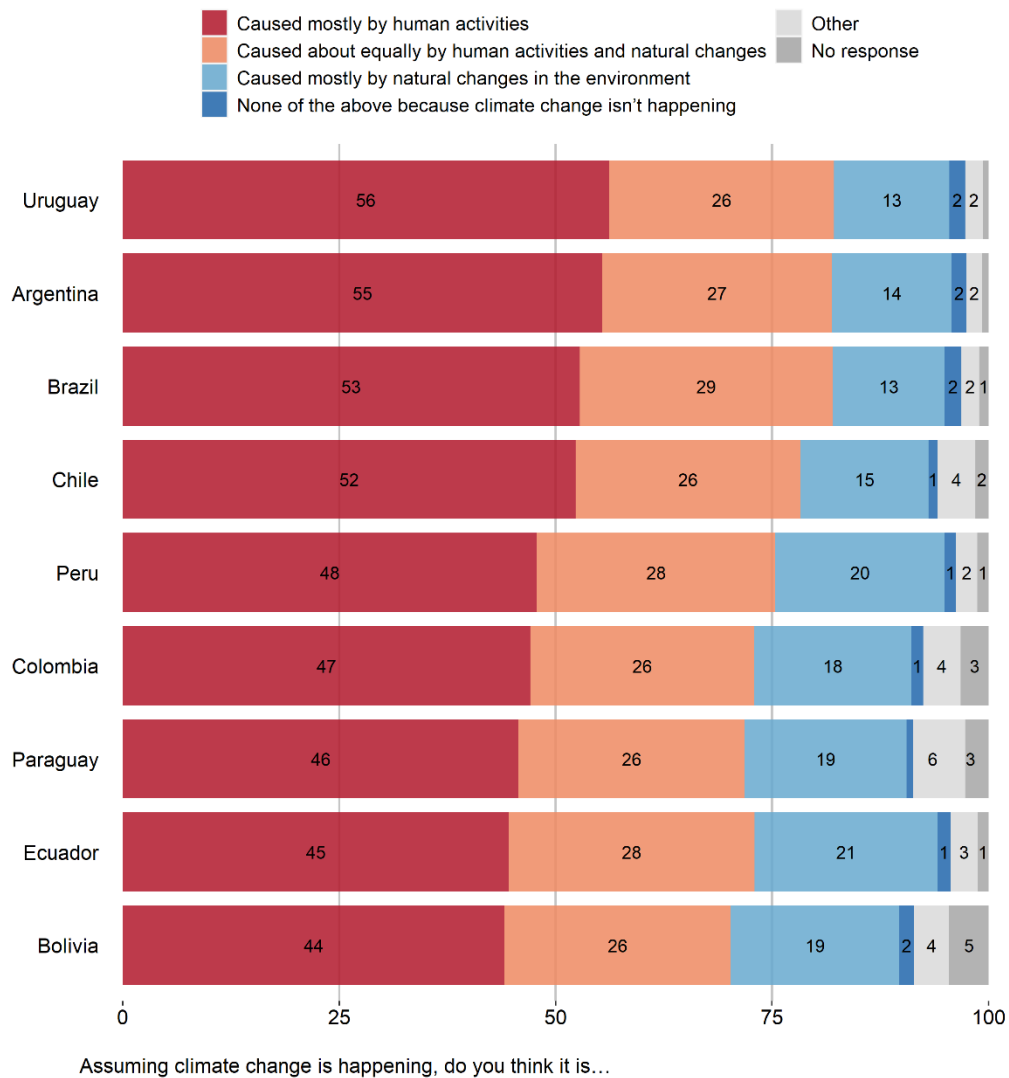

## Climate change is caused mostly by human activities

### North America

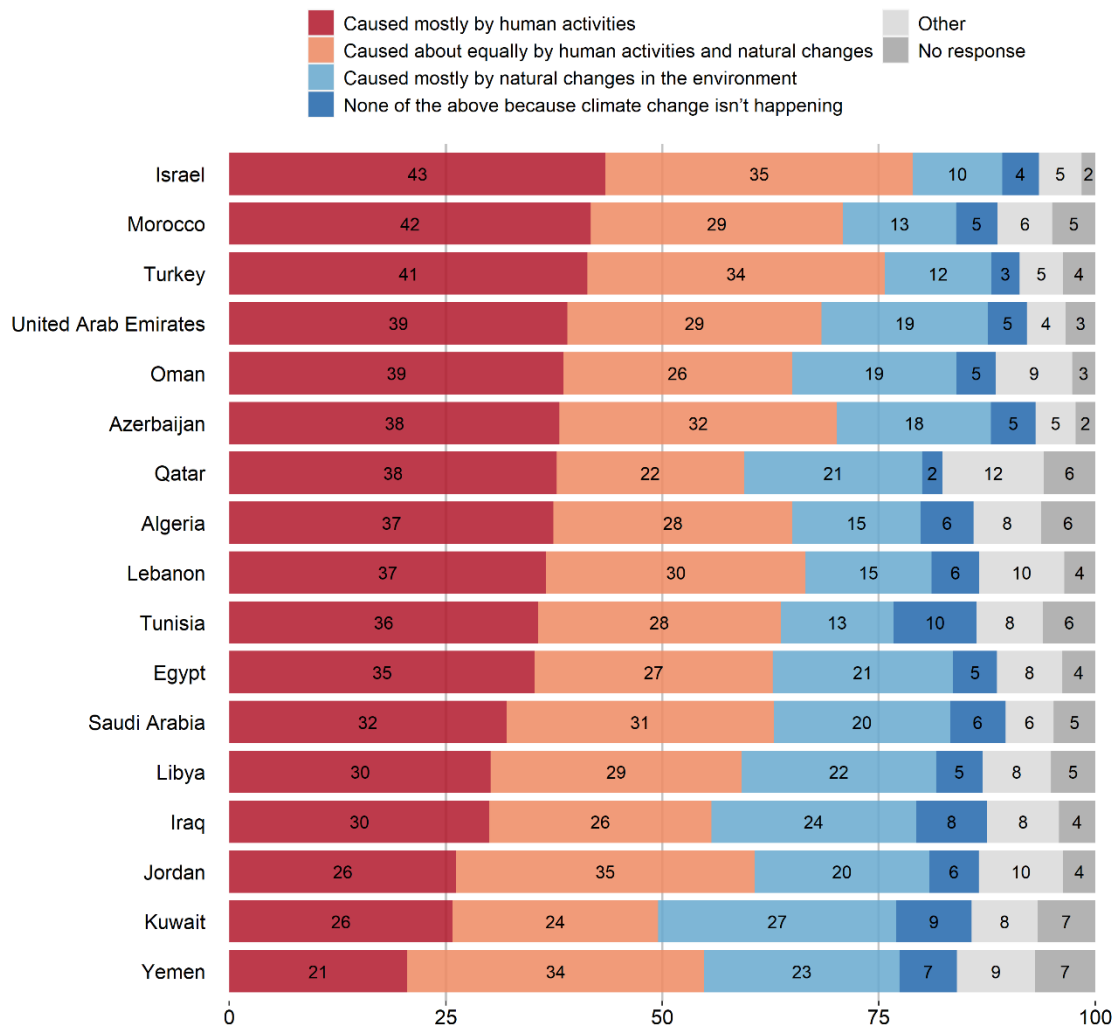

## Climate change is caused mostly by human activities

### South America

## Climate change is caused mostly by human activities

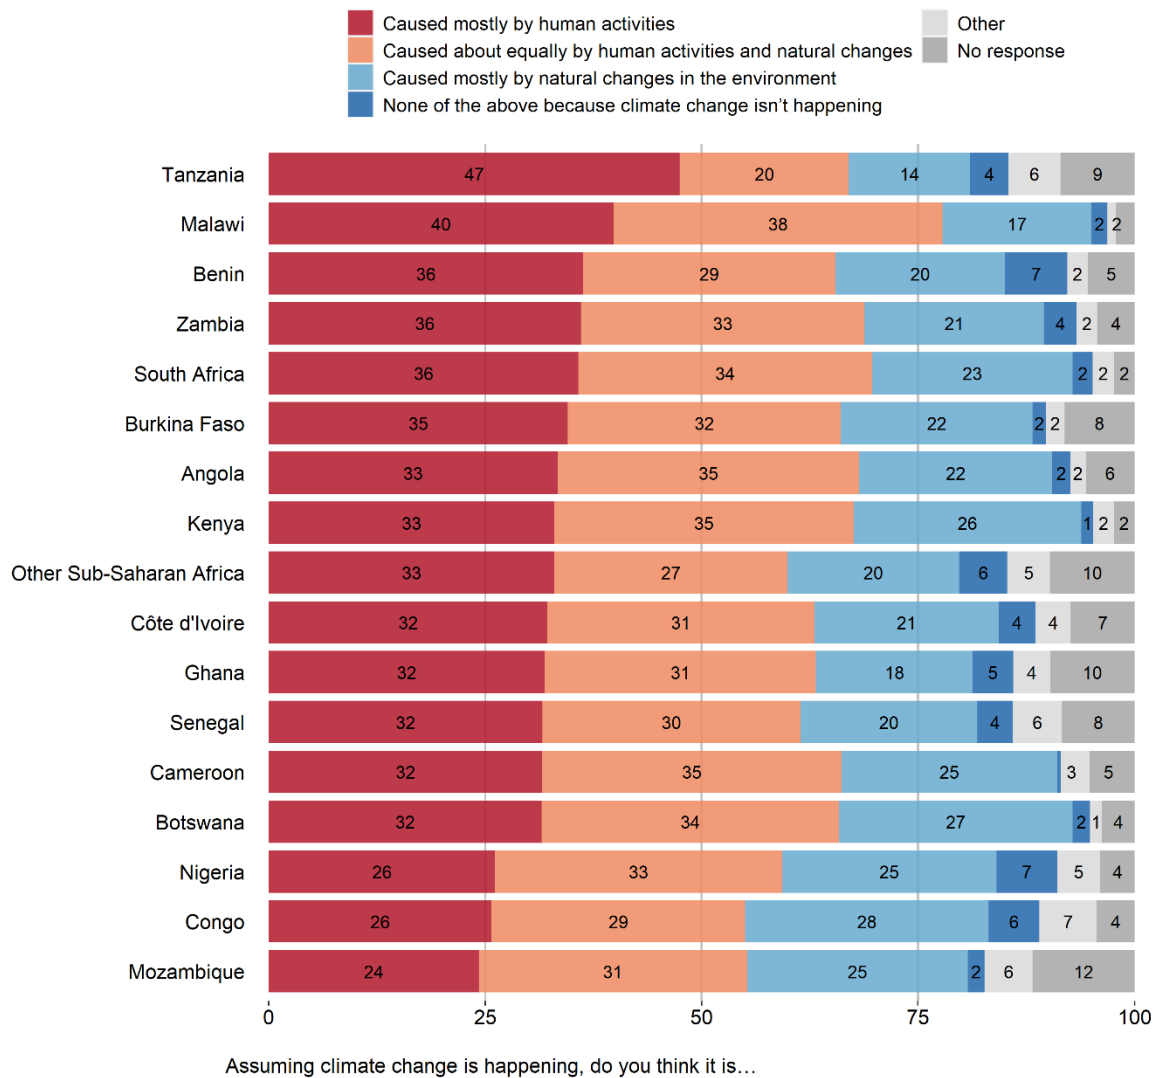

### Southwest Asia & North Africa

Assuming climate change is happening, do you think it is...

## Climate change is caused mostly by human activities

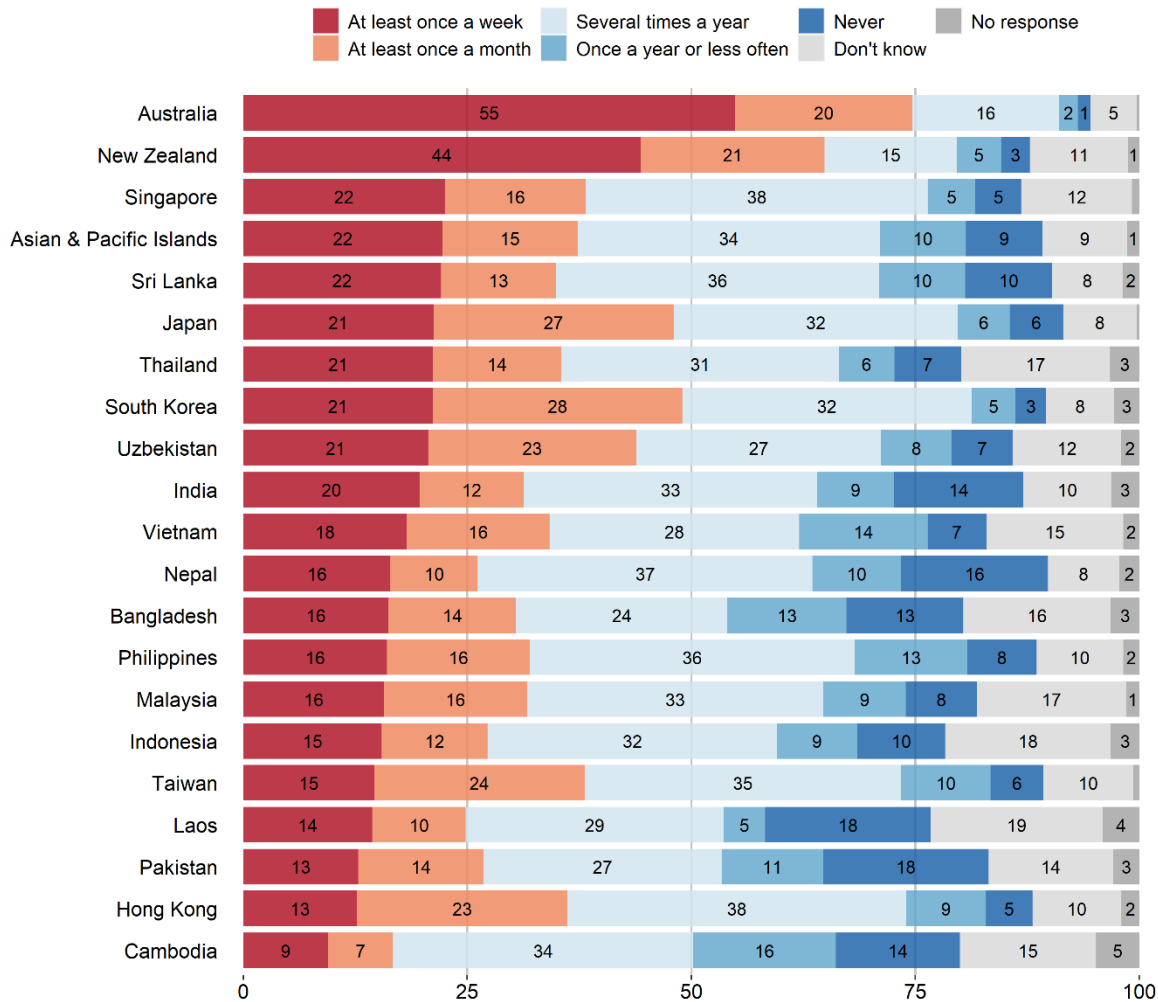

### Sub-Saharan Africa

## 1.4 About how often do you hear about climate change in your daily life (for example from TV, newspapers, social media, or conversations with friends and family)?

### Hearing about climate change at least once a week

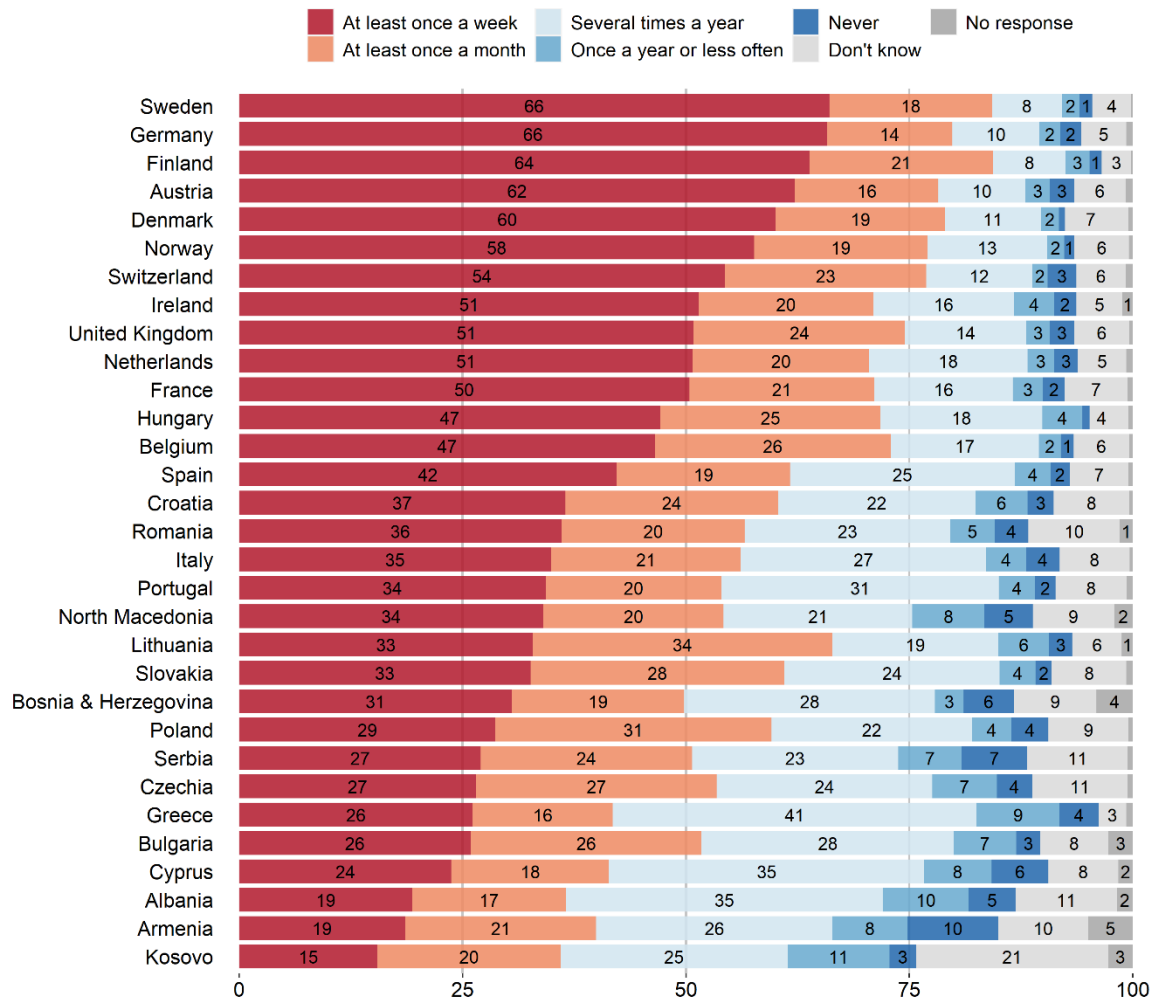

#### Asia & the Pacific

About how often do you hear about climate change in your daily life (for example from TV, newspapers, social media, or conversations with friends and family)?

## Hearing about climate change at least once a week

### Europe

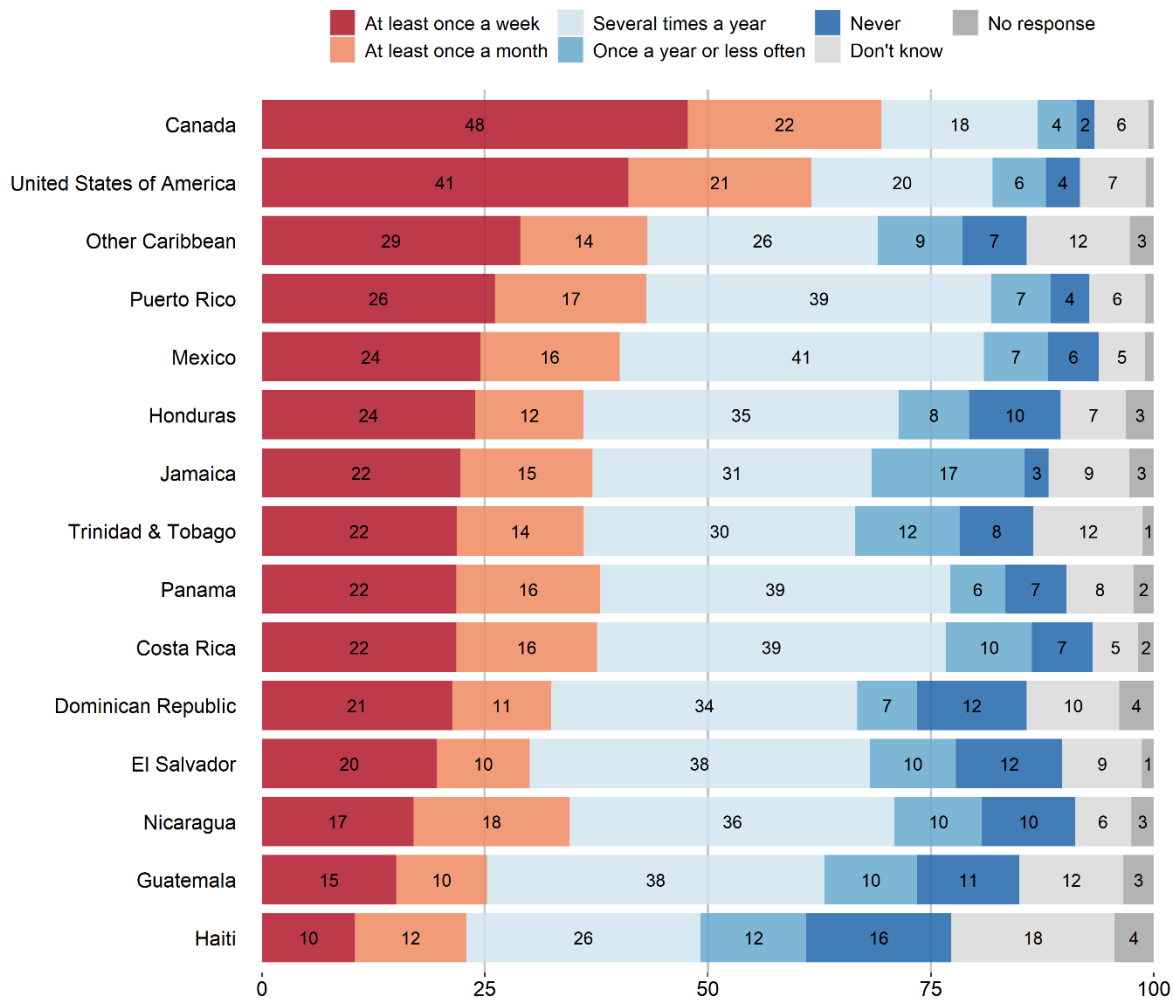

About how often do you hear about climate change in your daily life (for example from TV, newspapers, social media, or conversations with friends and family)?

## Hearing about climate change at least once a week

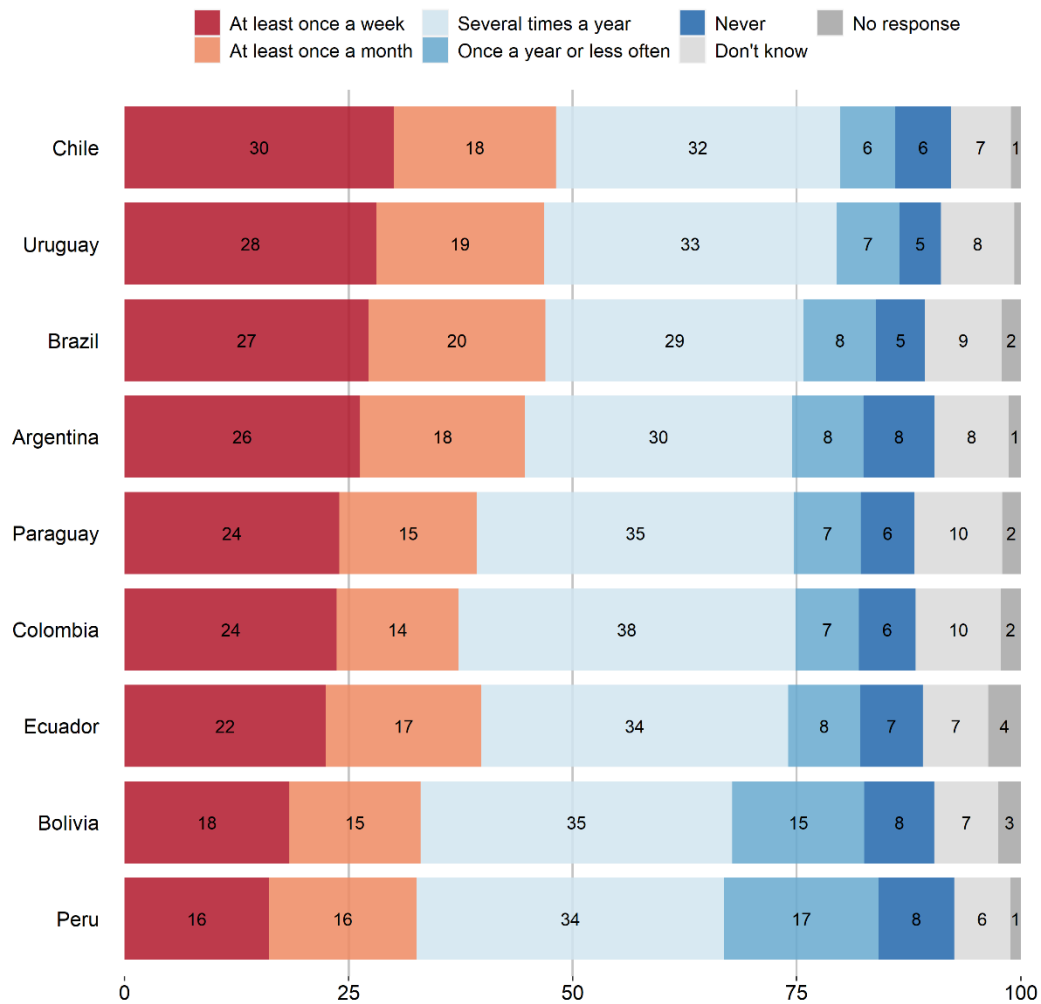

### North America

About how often do you hear about climate change in your daily life (for example from TV, newspapers, social media, or conversations with friends and family)?

## Hearing about climate change at least once a week

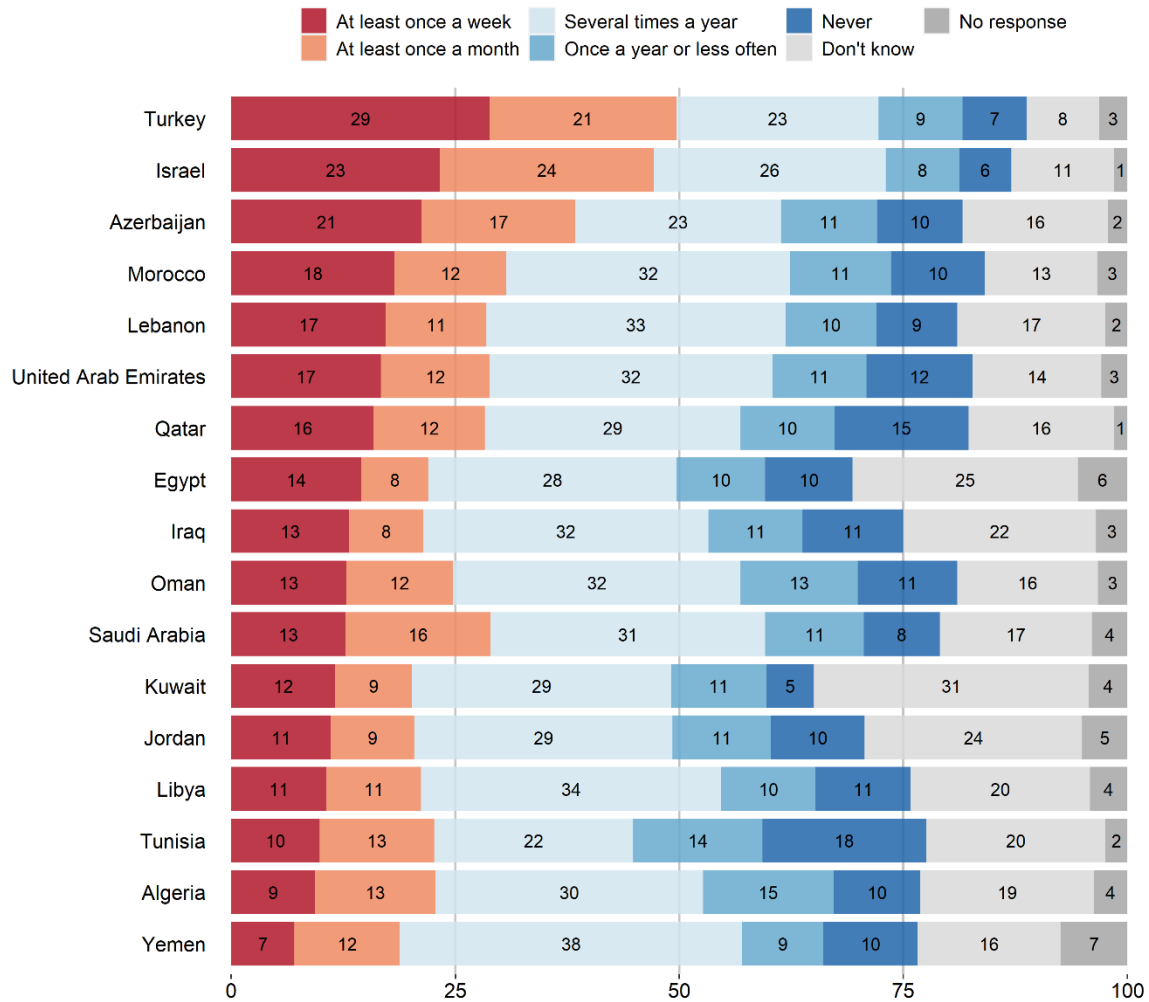

### South America

About how often do you hear about climate change in your daily life (for example from TV, newspapers, social media, or conversations with friends and family)?

## Hearing about climate change at least once a week

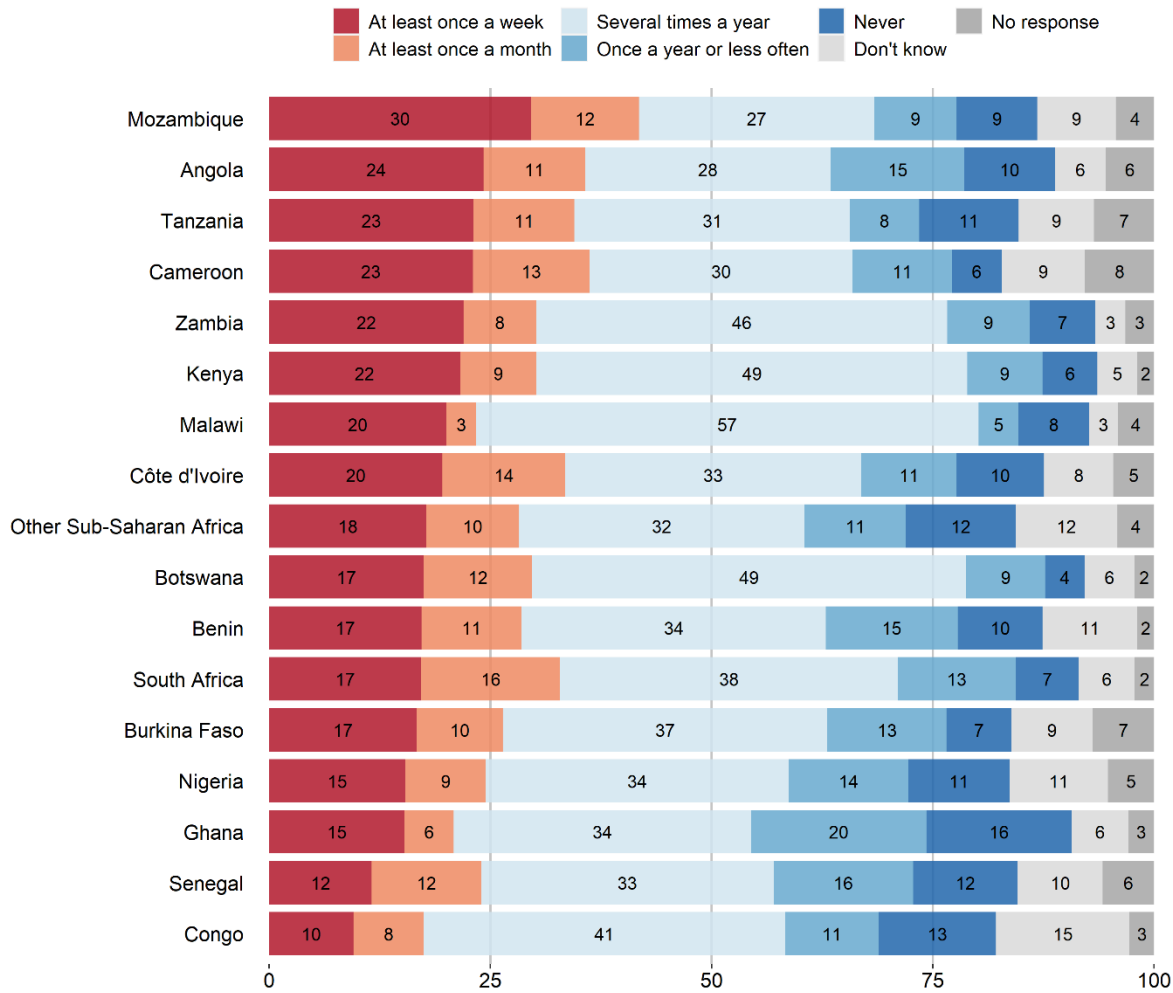

### Southwest Asia & North Africa

About how often do you hear about climate change in your daily life (for example from TV, newspapers, social media, or conversations with friends and family)?

## Hearing about climate change at least once a week

### Sub-Saharan Africa

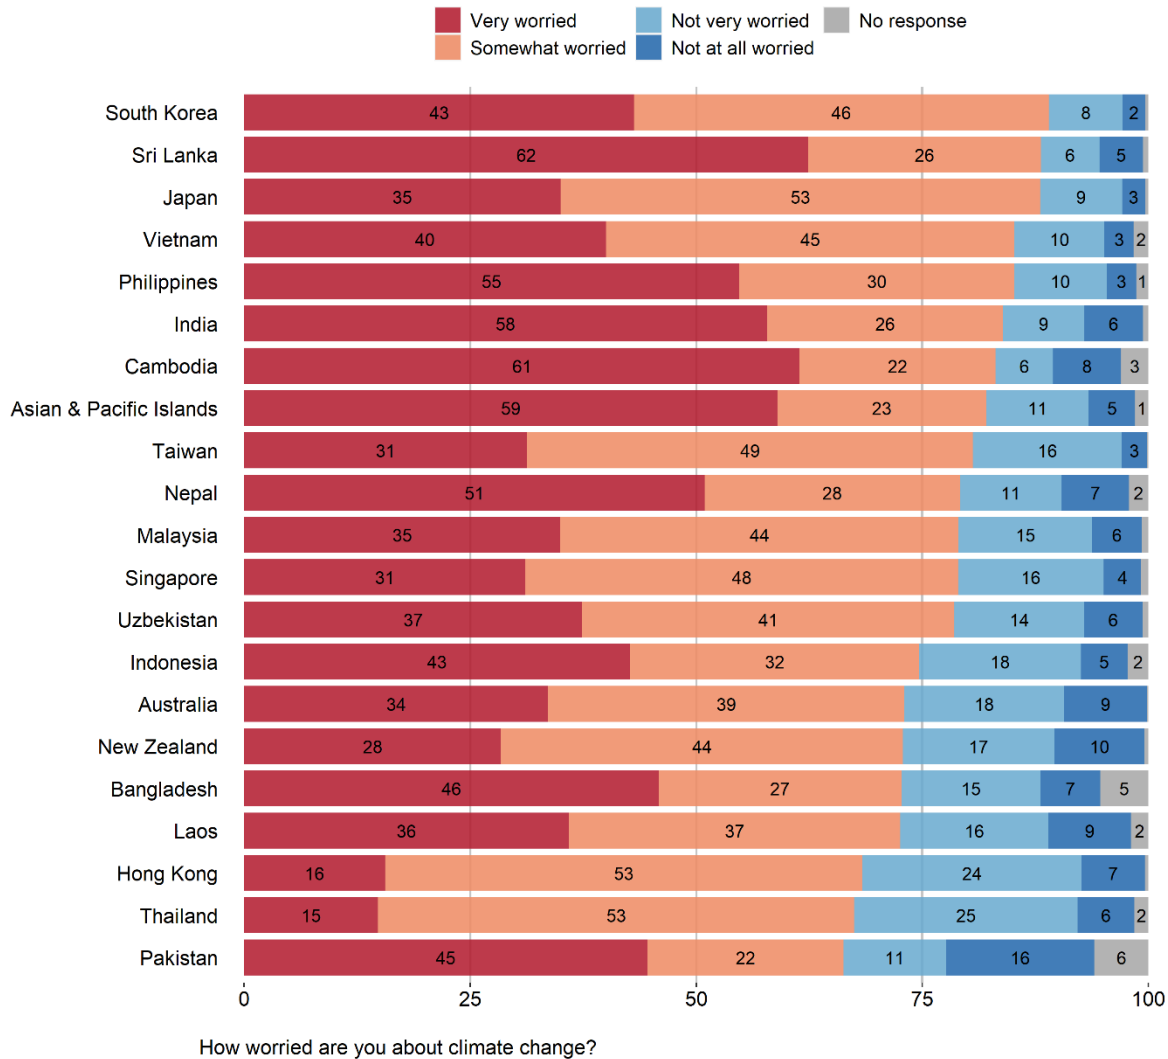

About how often do you hear about climate change in your daily life (for example from TV, newspapers, social media, or conversations with friends and family)?

## 2.1 How worried are you about climate change?

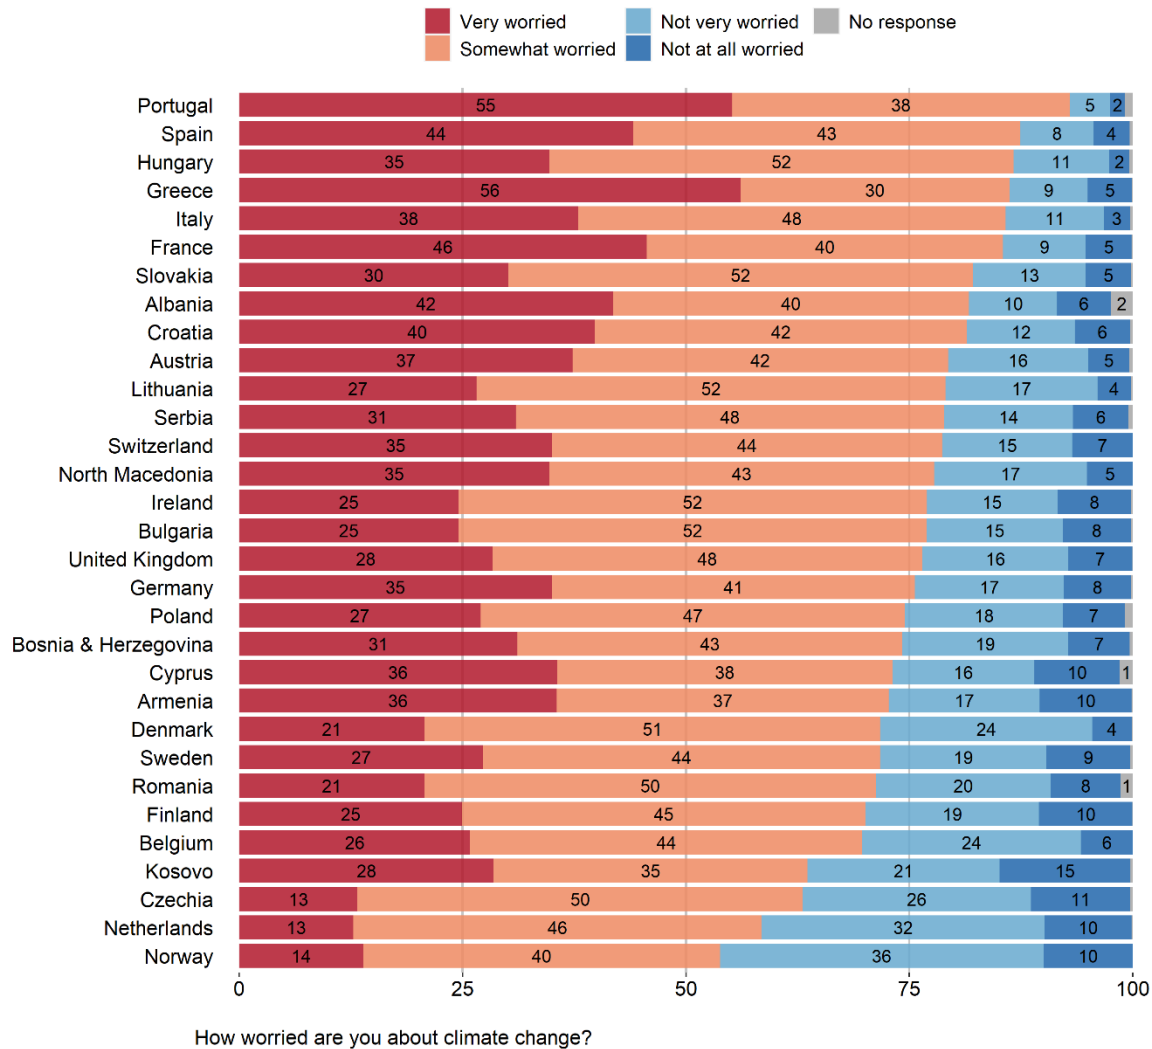

### Worry about climate change

#### Asia & the Pacific

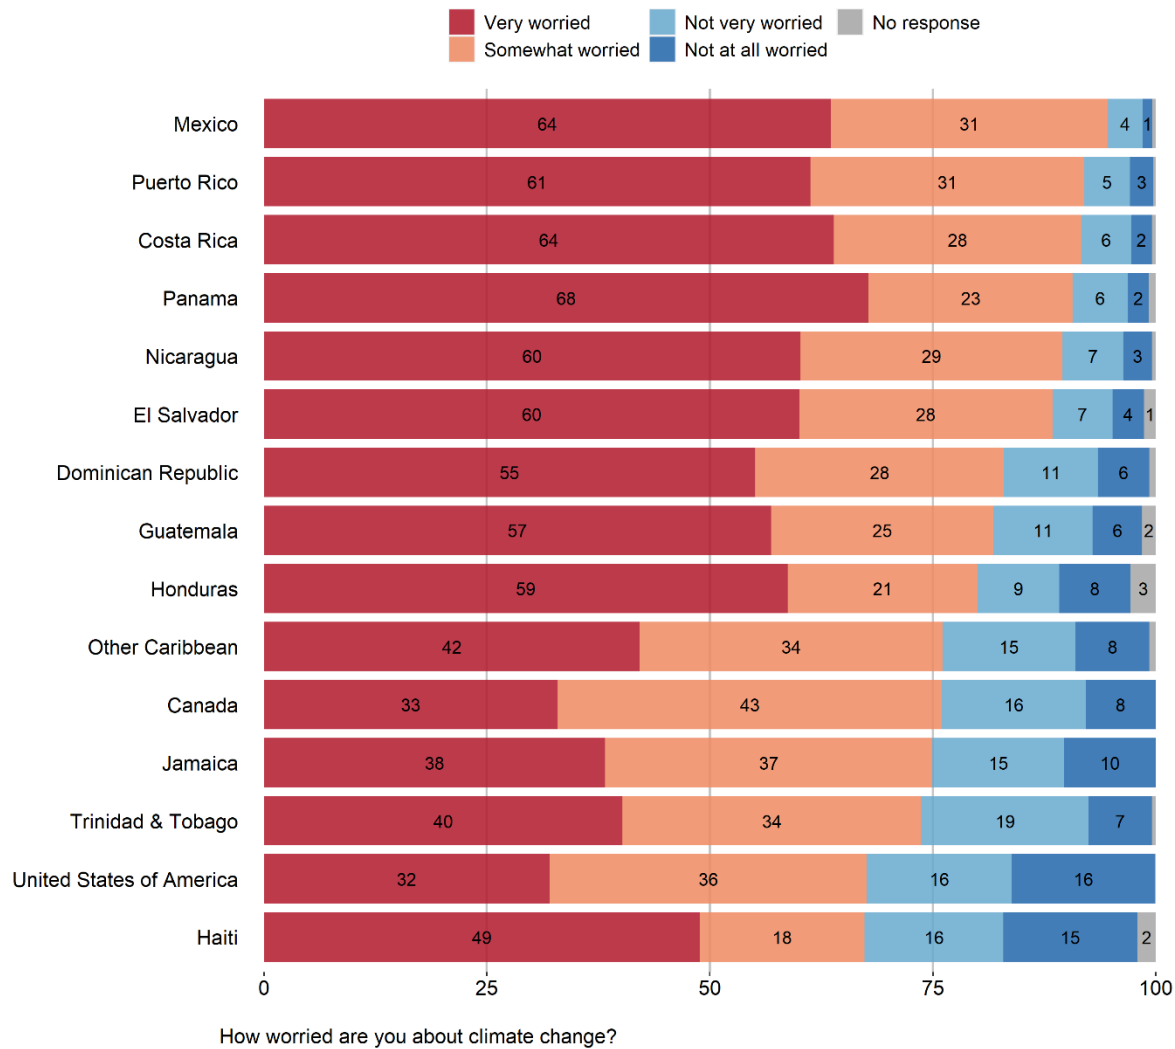

## Worry about climate change

### Europe

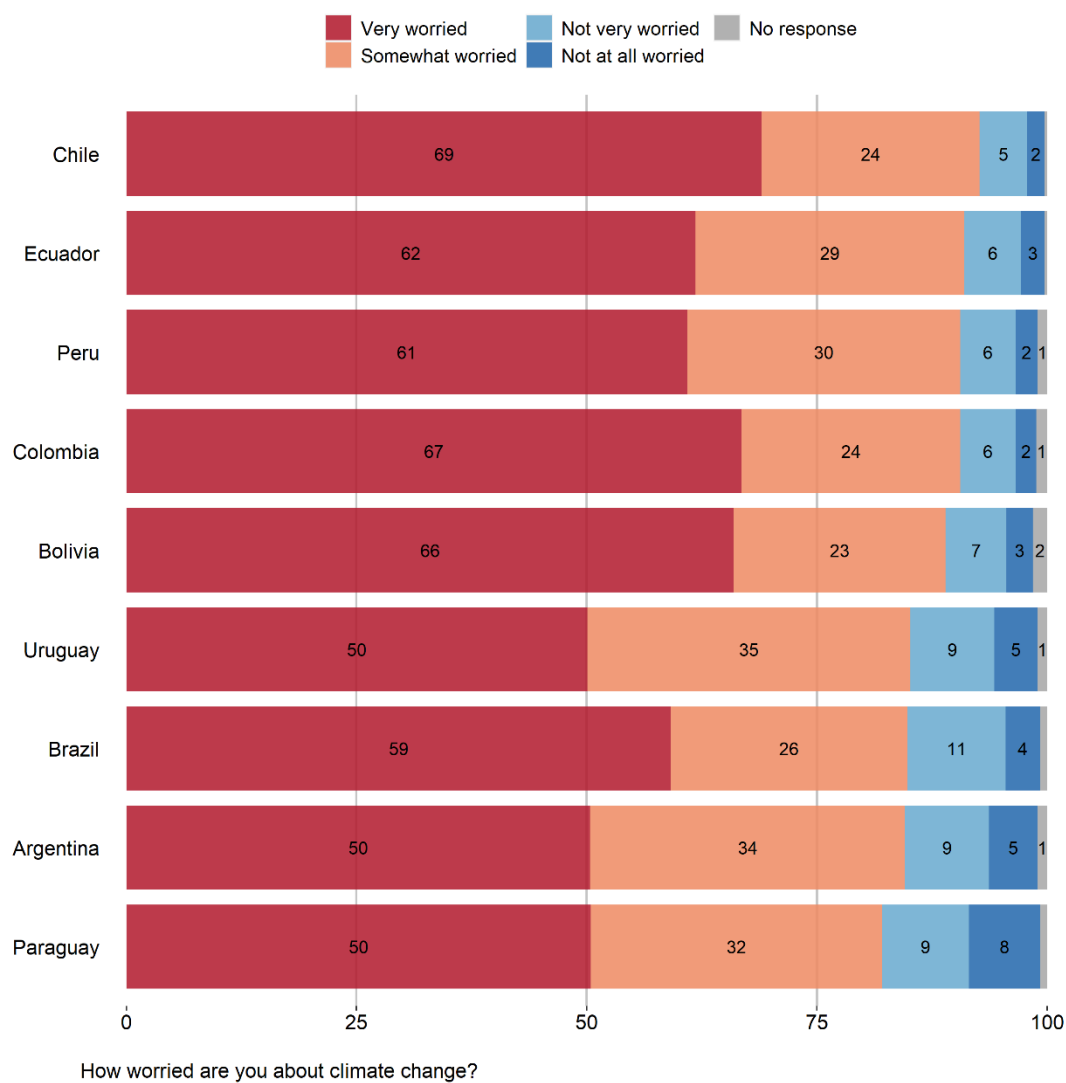

## Worry about climate change

### North America

## Worry about climate change

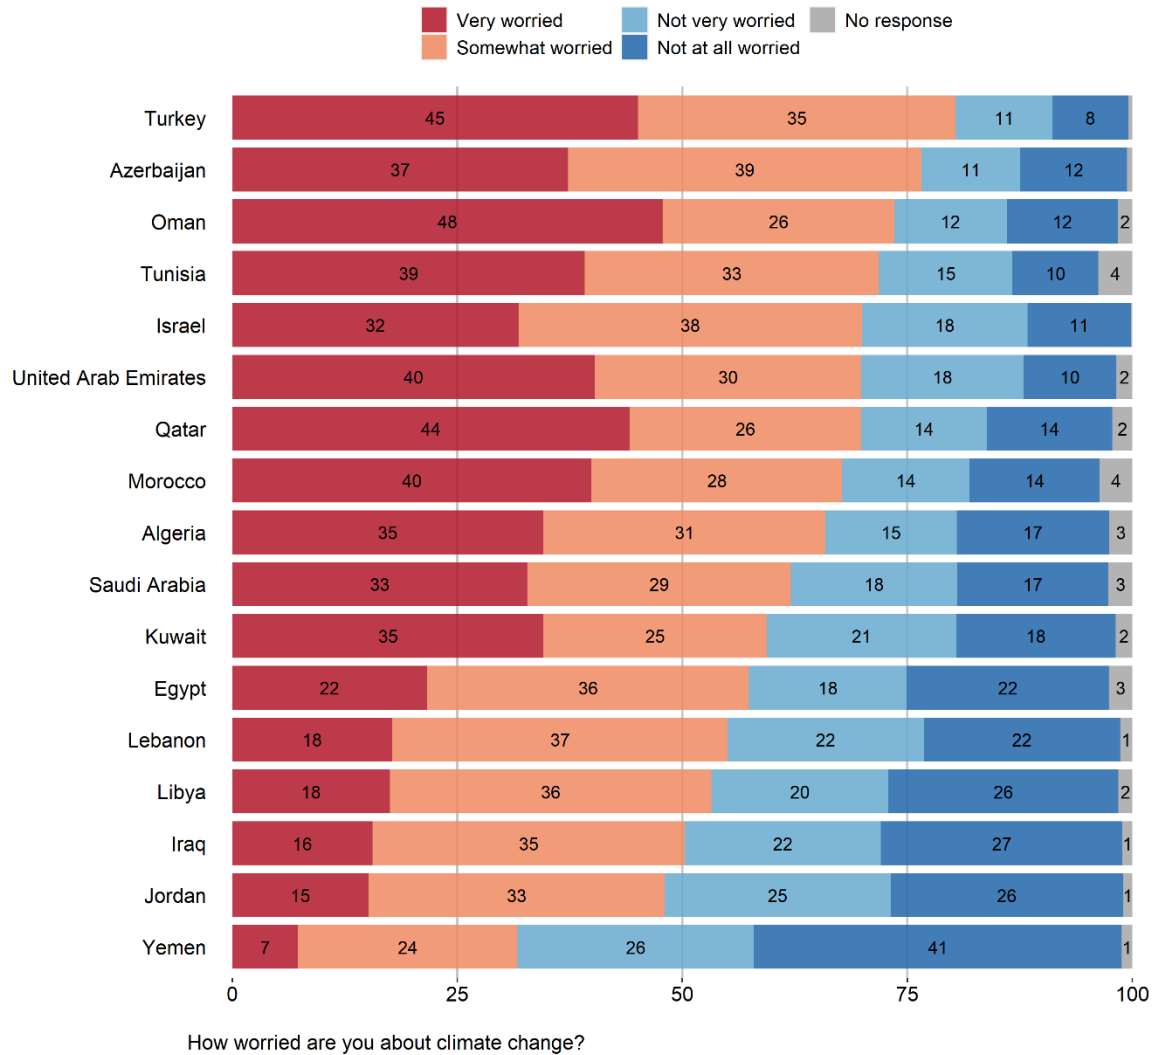

### South America

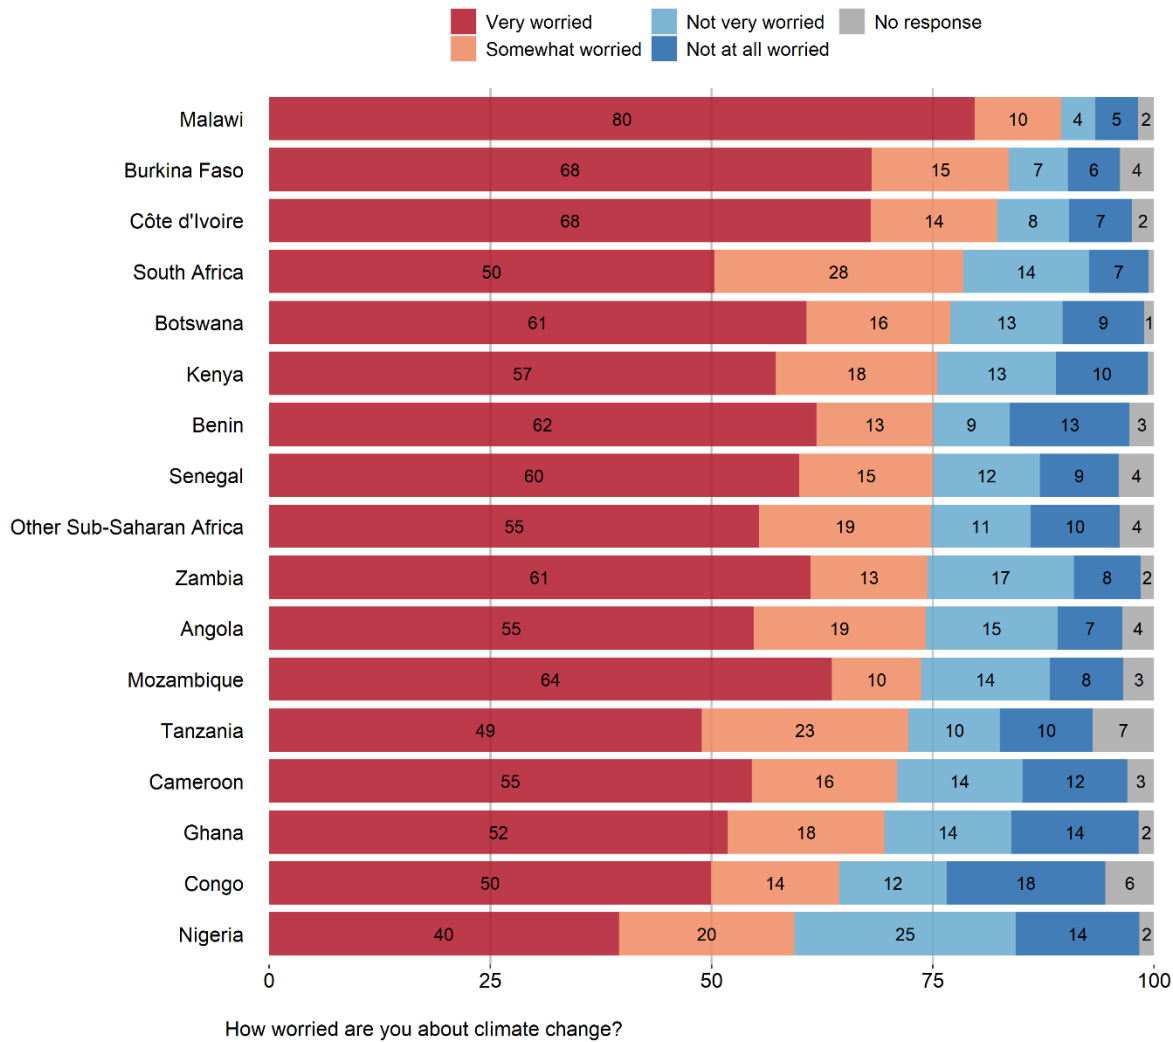

## Worry about climate change

### Southwest Asia & North Africa

## Worry about climate change

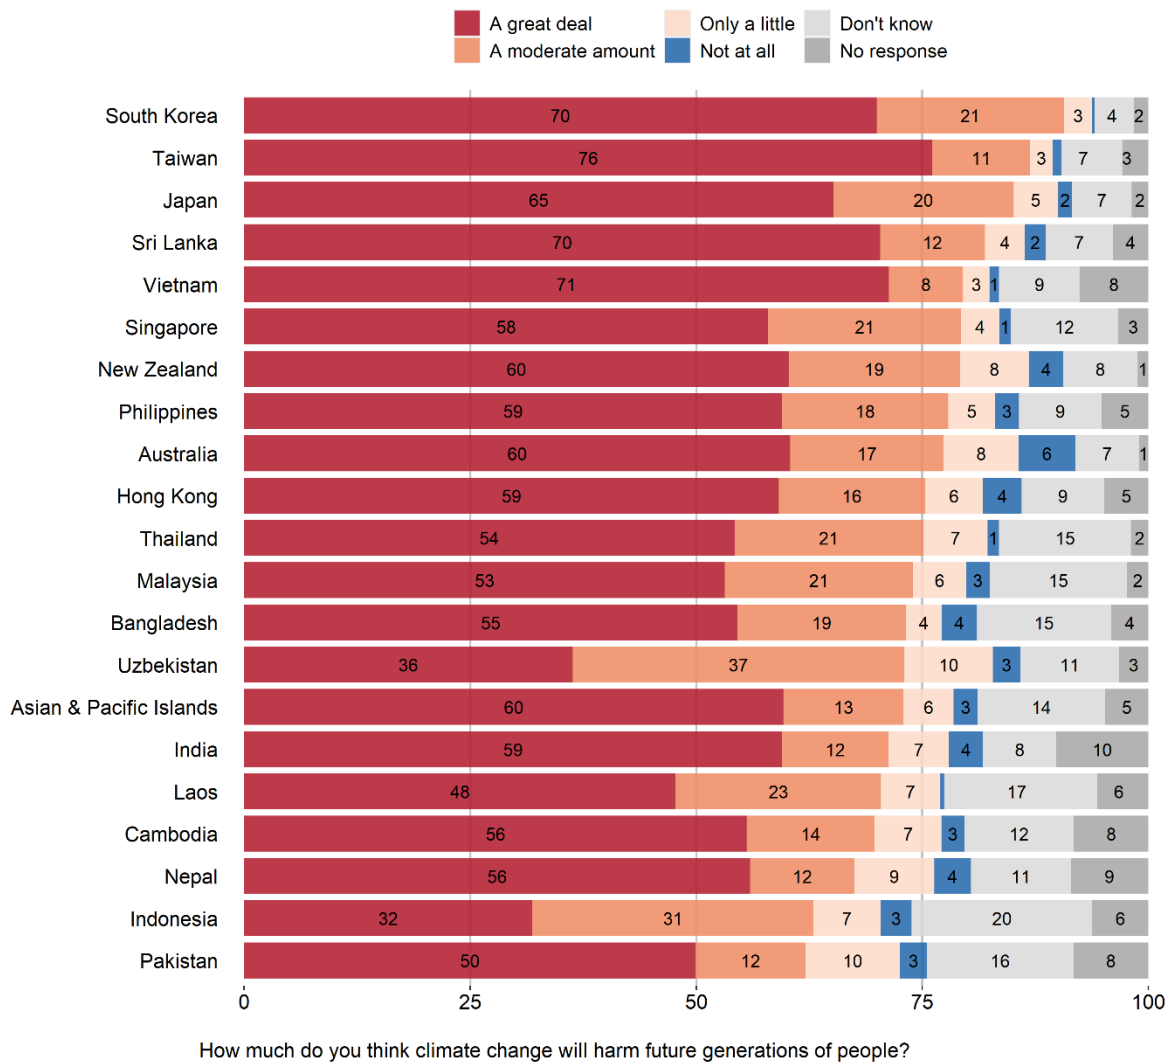

### Sub-Saharan Africa

## 2.2 How much do you think climate change will harm future generations of people? \*

### Climate change will harm future generations

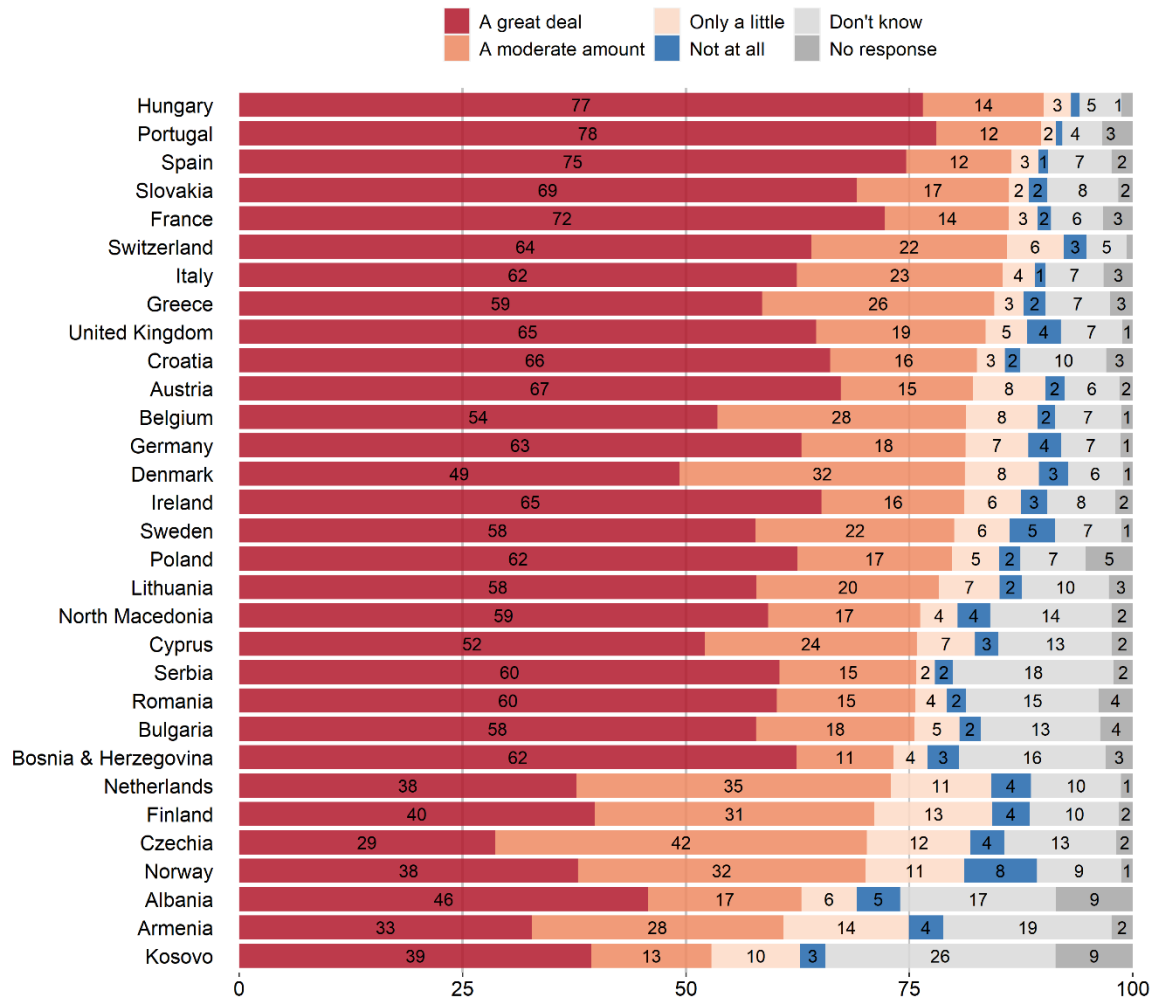

#### Asia & the Pacific

\*Corrected version

## Climate change will harm future generations

### Europe

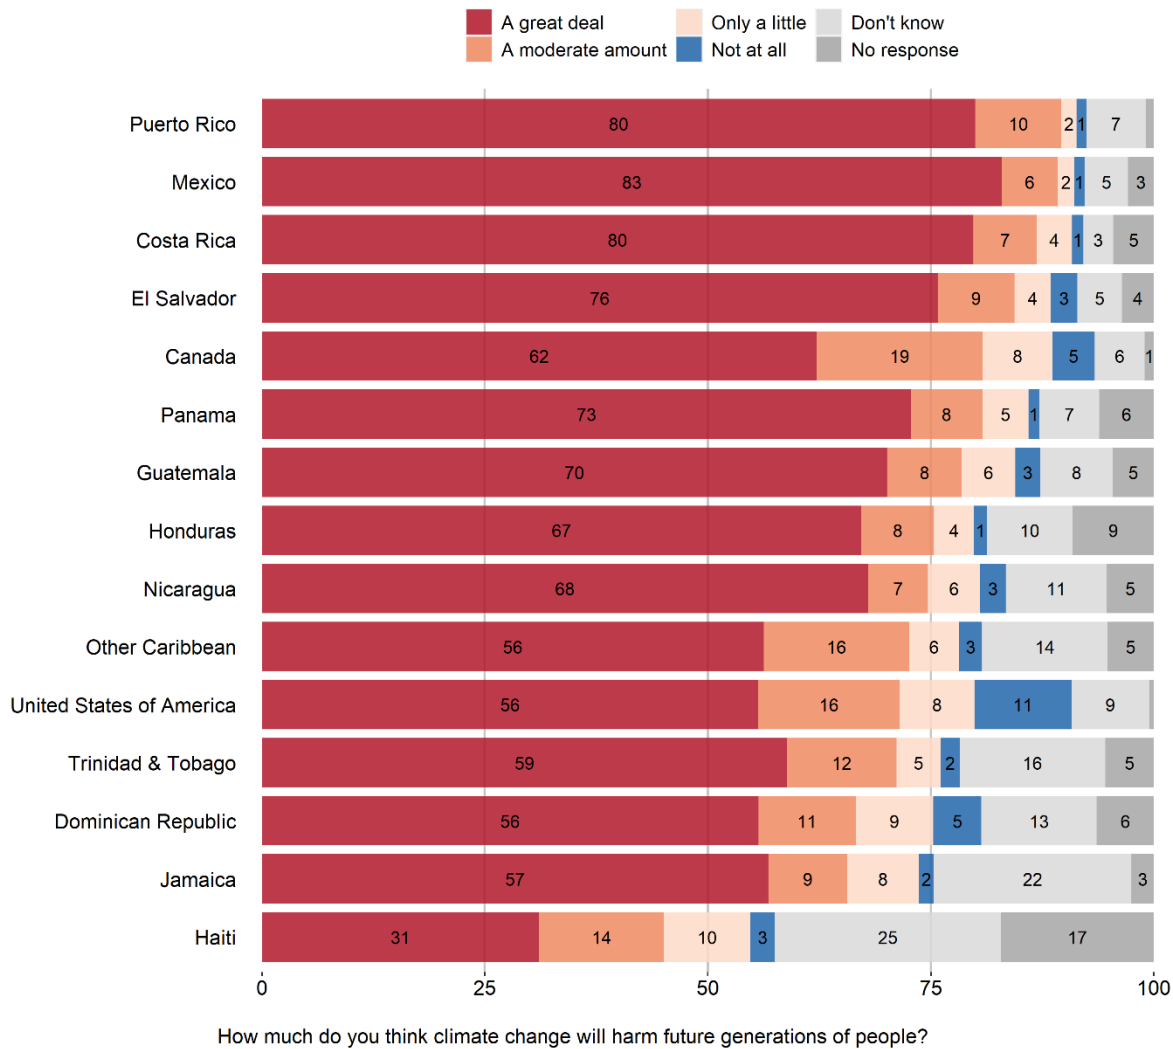

How much do you think climate change will harm future generations of people?

\*Corrected version

## Climate change will harm future generations

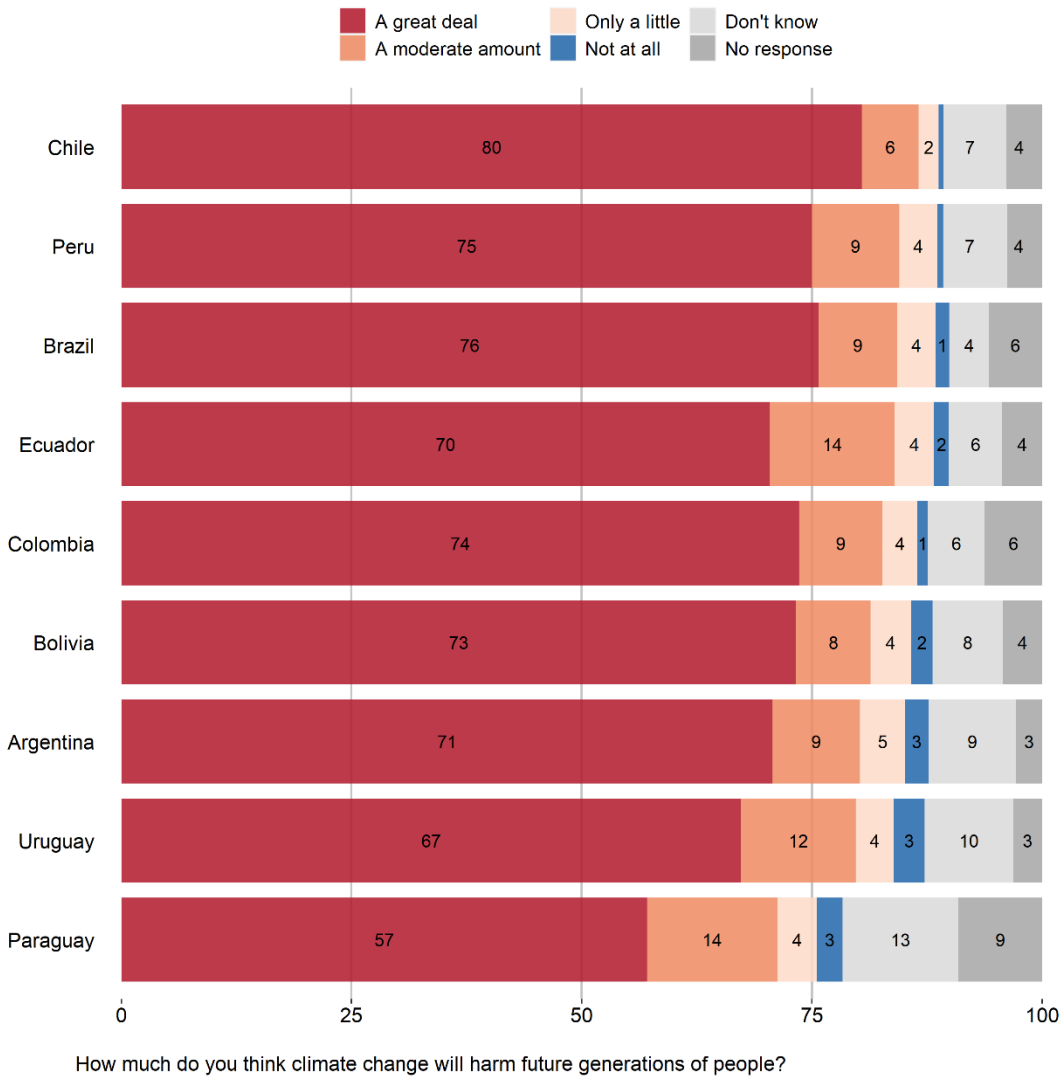

### North America

\*Corrected version

Climate change will harm future generations

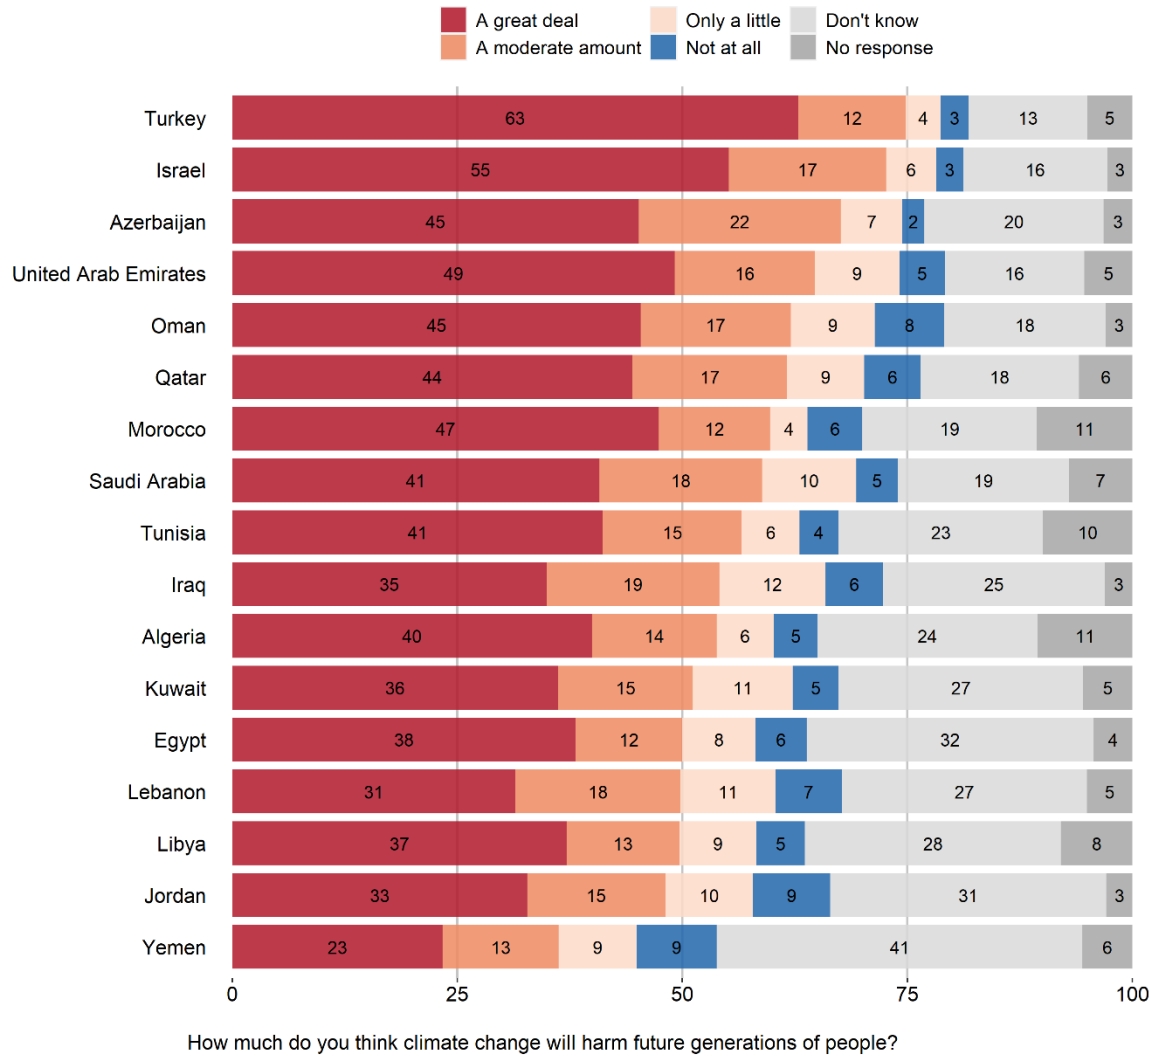

South America

\*Corrected version

## Climate change will harm future generations

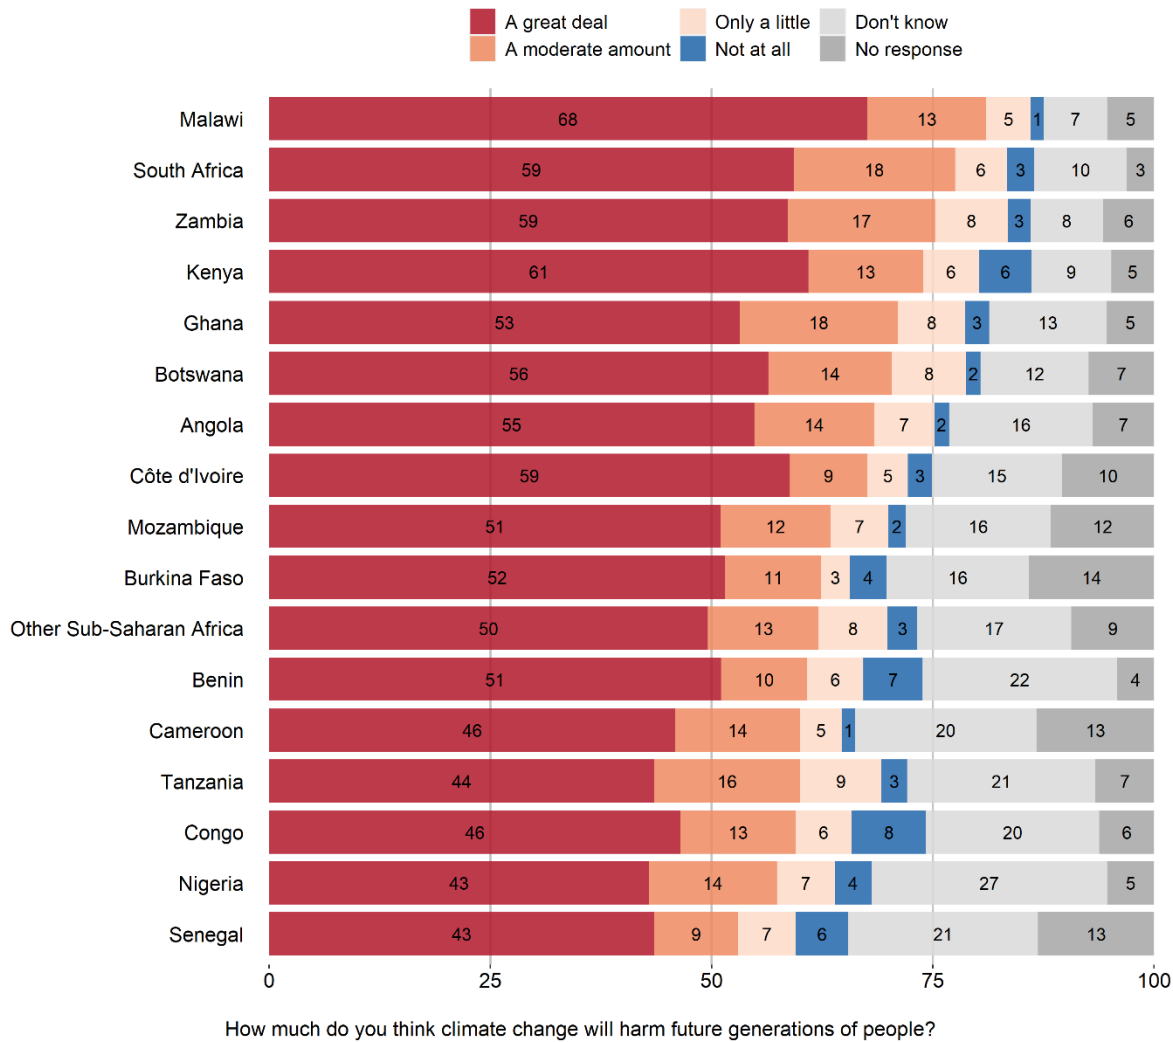

### Southwest Asia & North Africa

\*Corrected version

## Climate change will harm future generations

### Sub-Saharan Africa

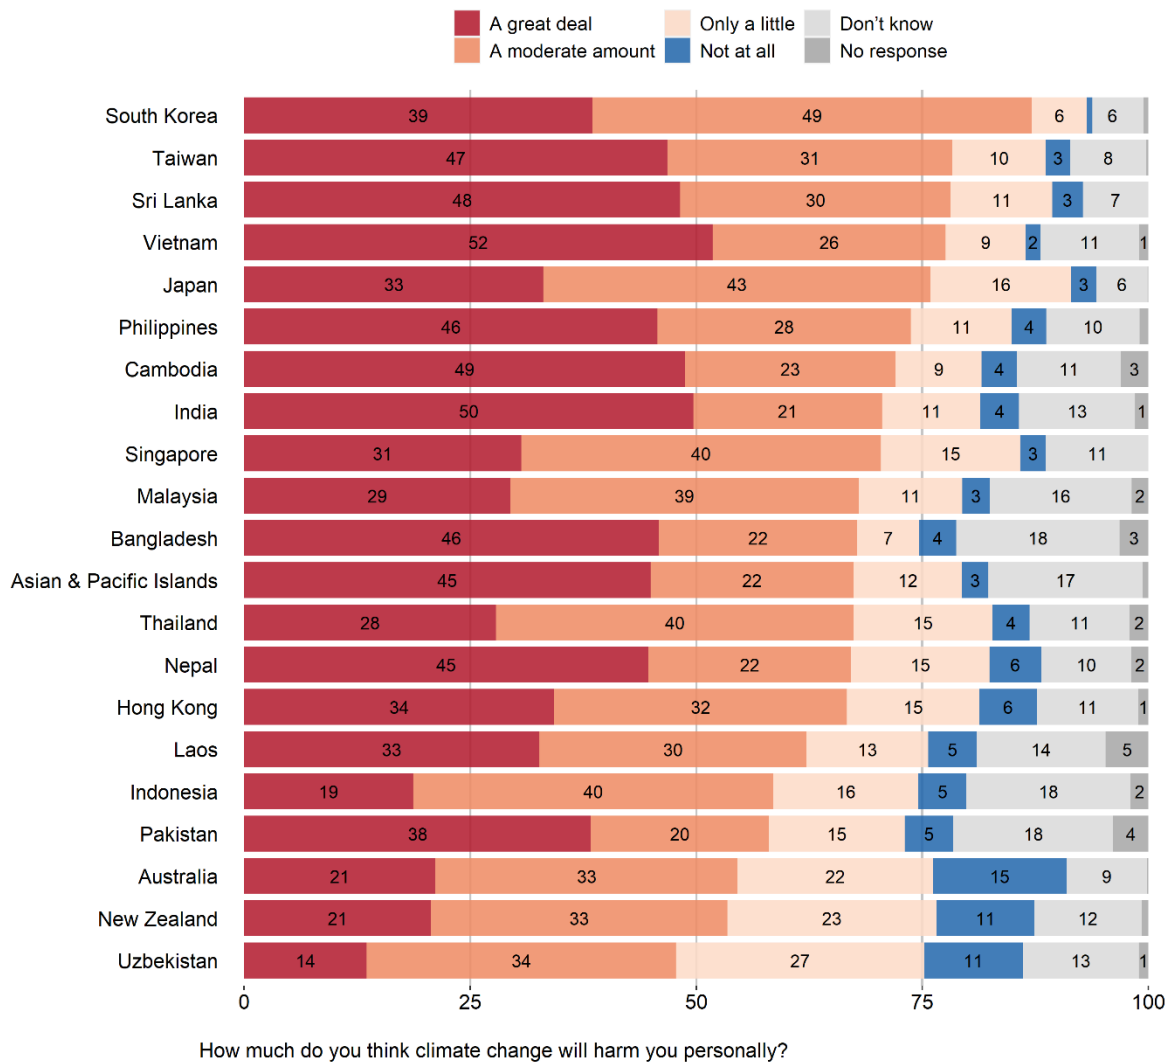

\*Corrected version

## 2.3 How much do you think climate change will harm you personally?

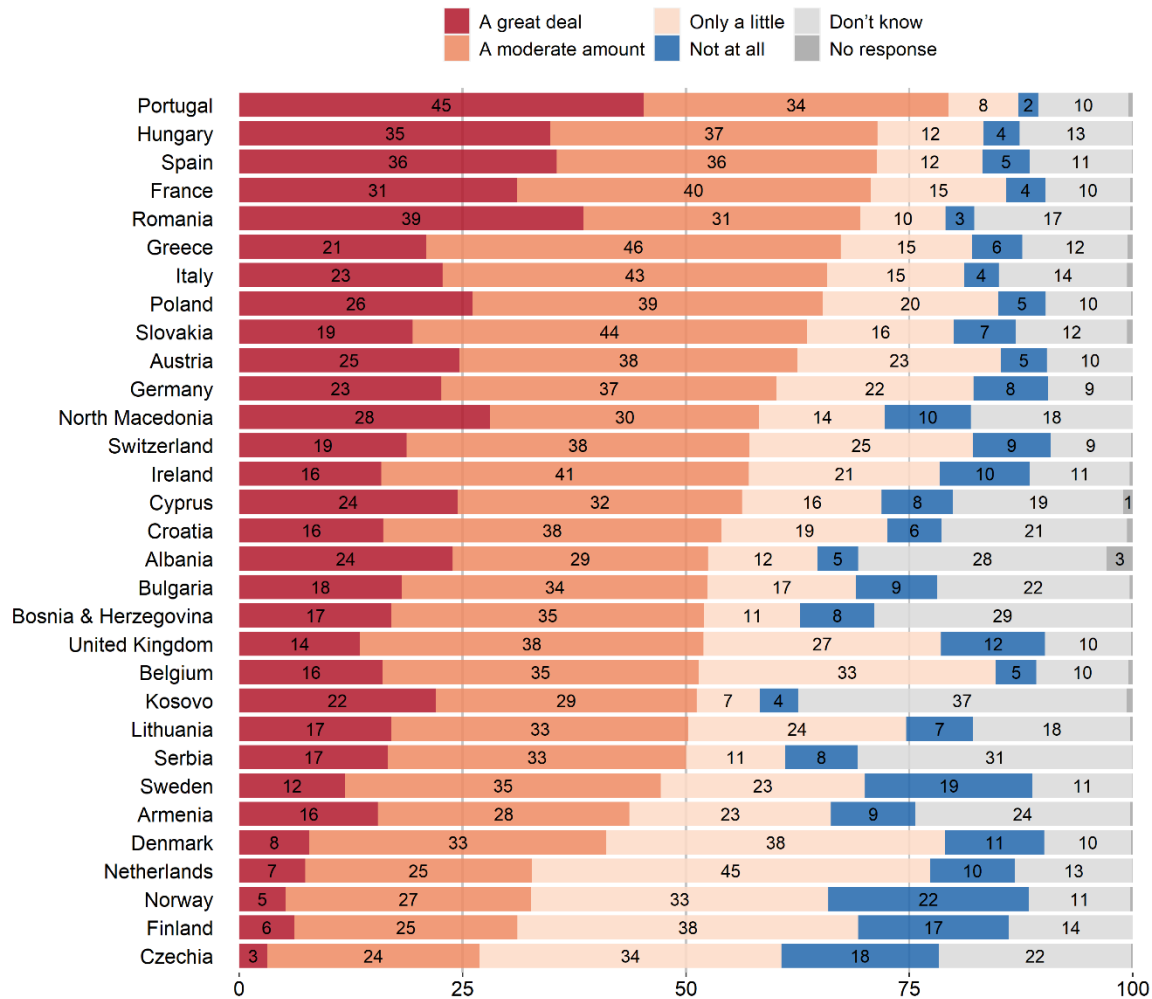

### Climate change will be personally harmful

#### Asia & the Pacific

## Climate change will be personally harmful

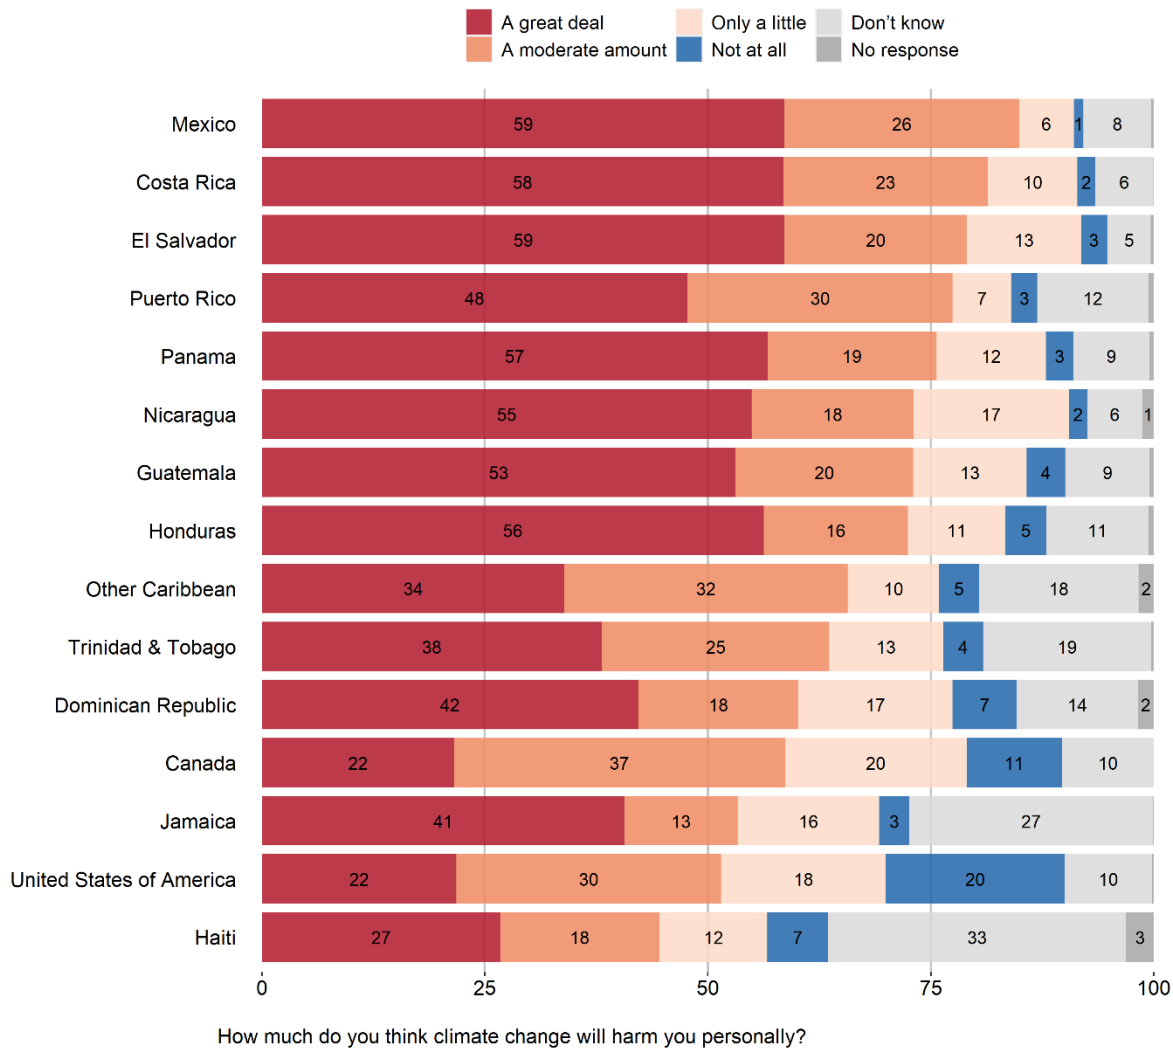

### Europe

How much do you think climate change will harm you personally?

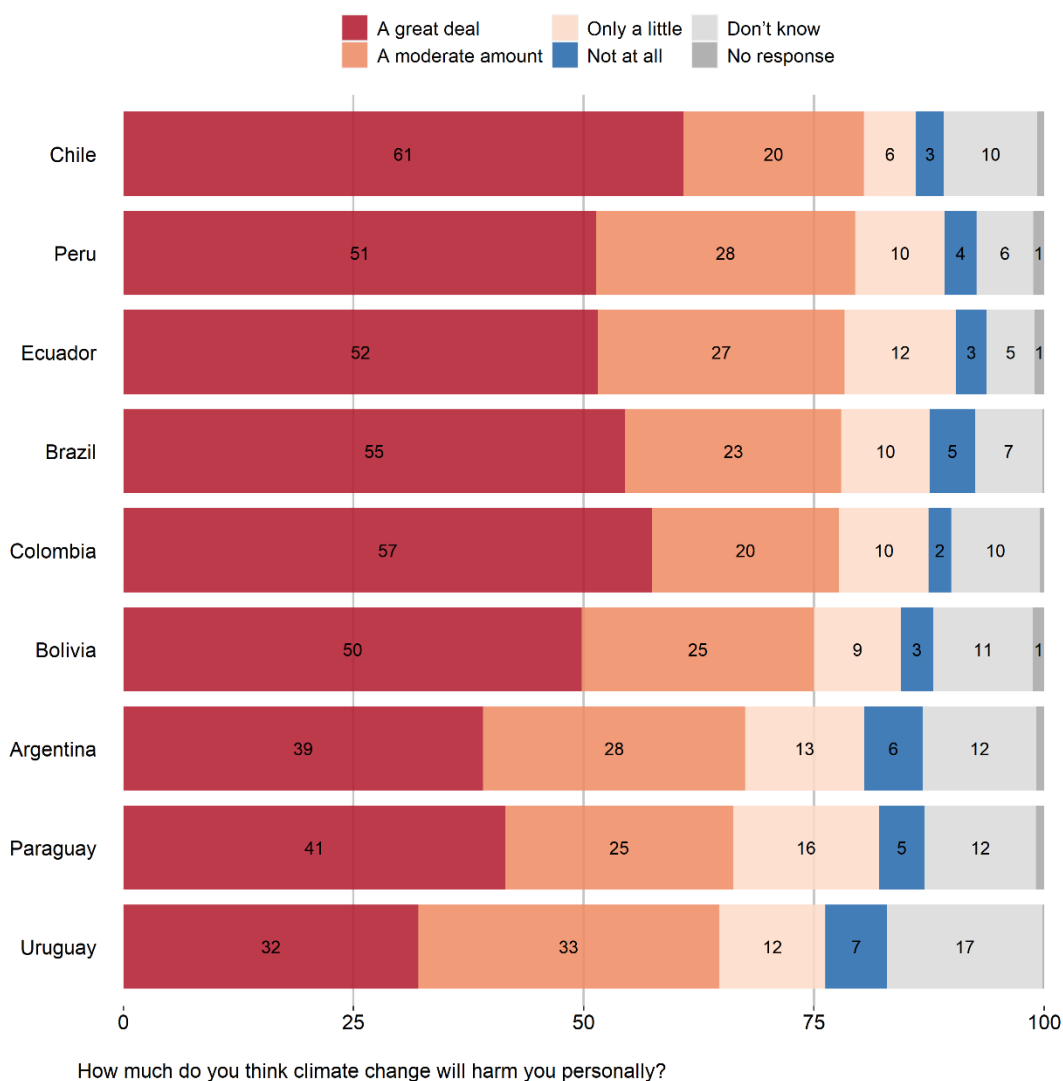

## Climate change will be personally harmful

### North America

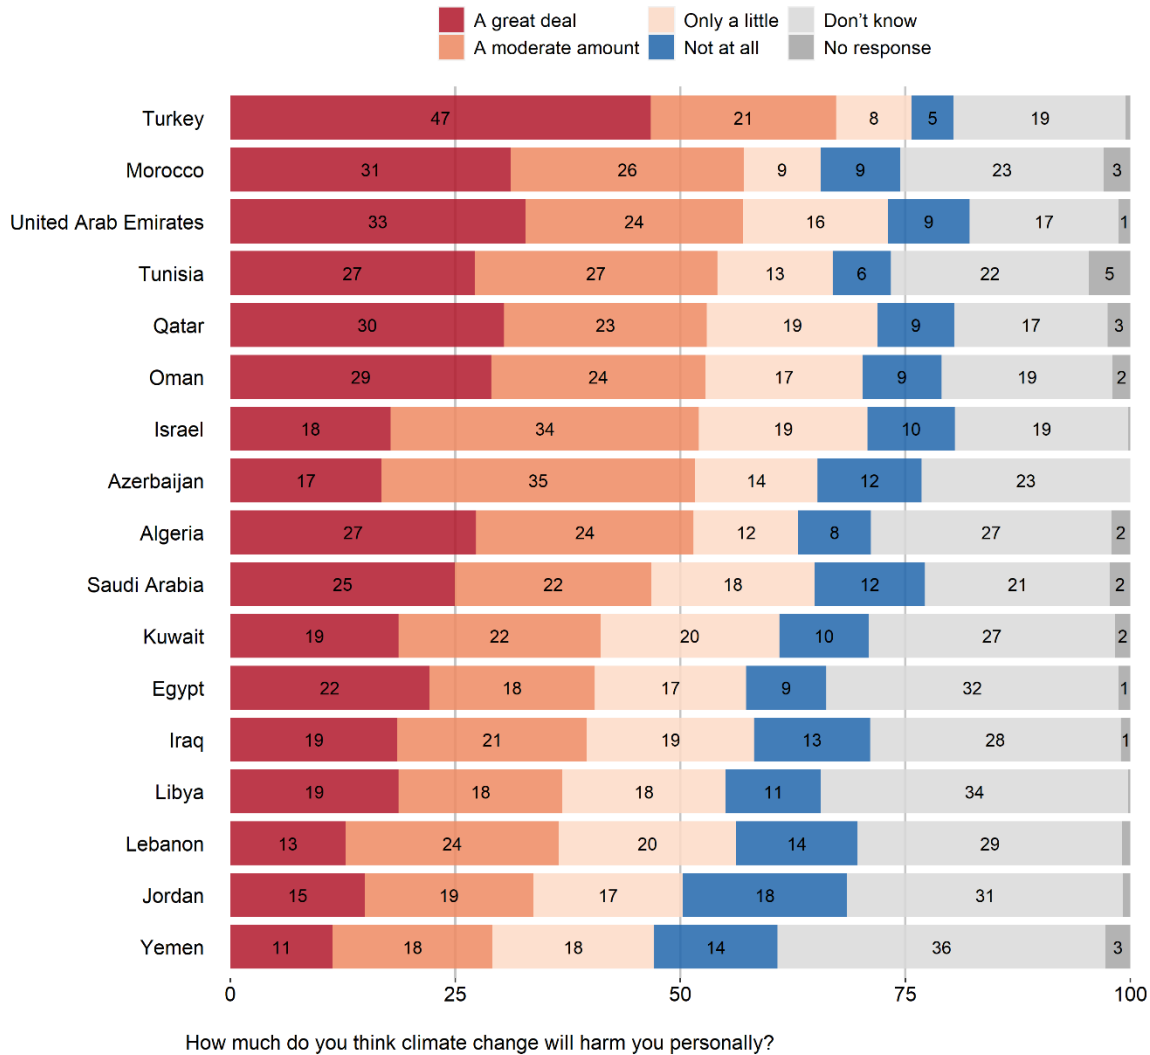

## Climate change will be personally harmful

### South America

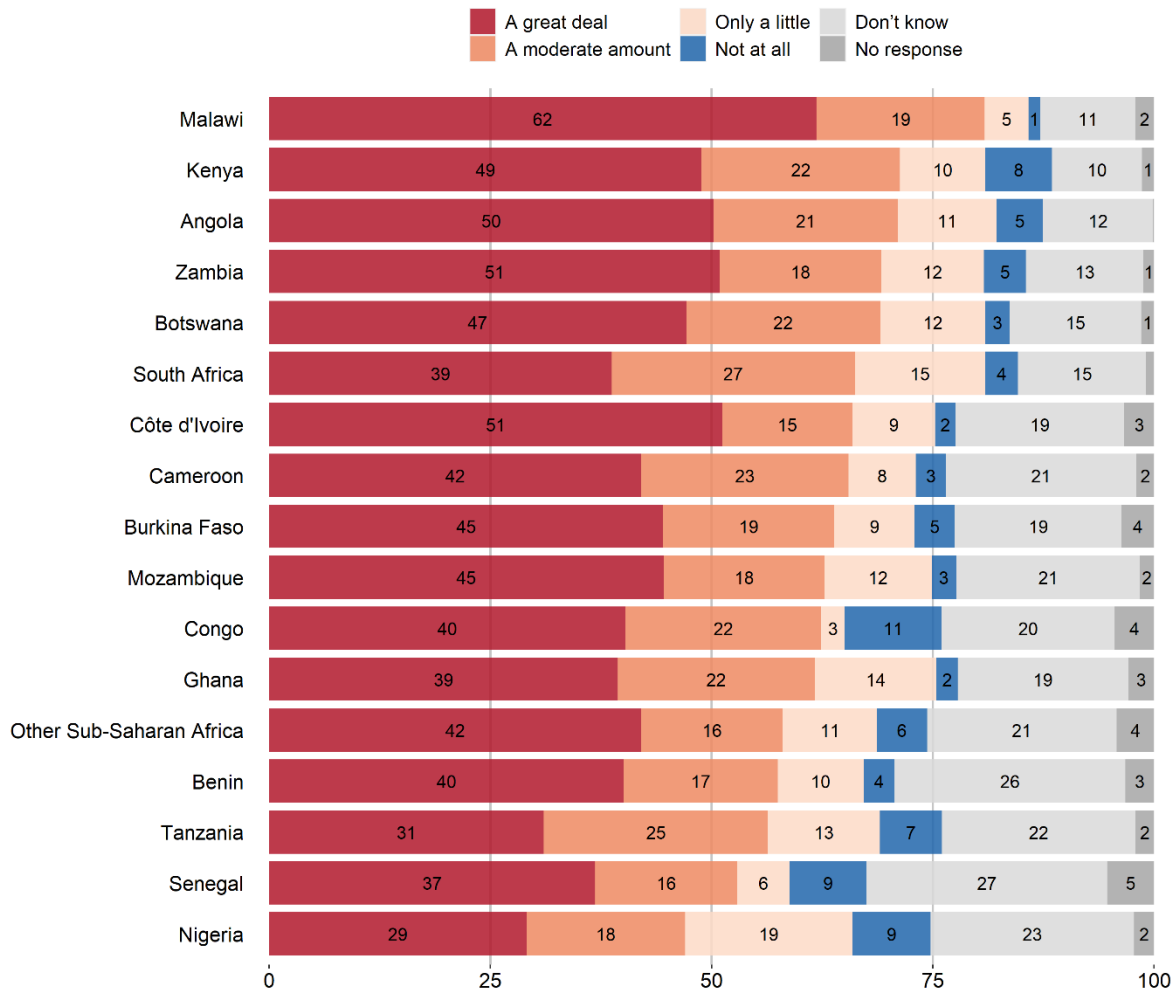

## Climate change will be personally harmful

### Southwest Asia & North Africa

## Climate change will be personally harmful

### Sub-Saharan Africa

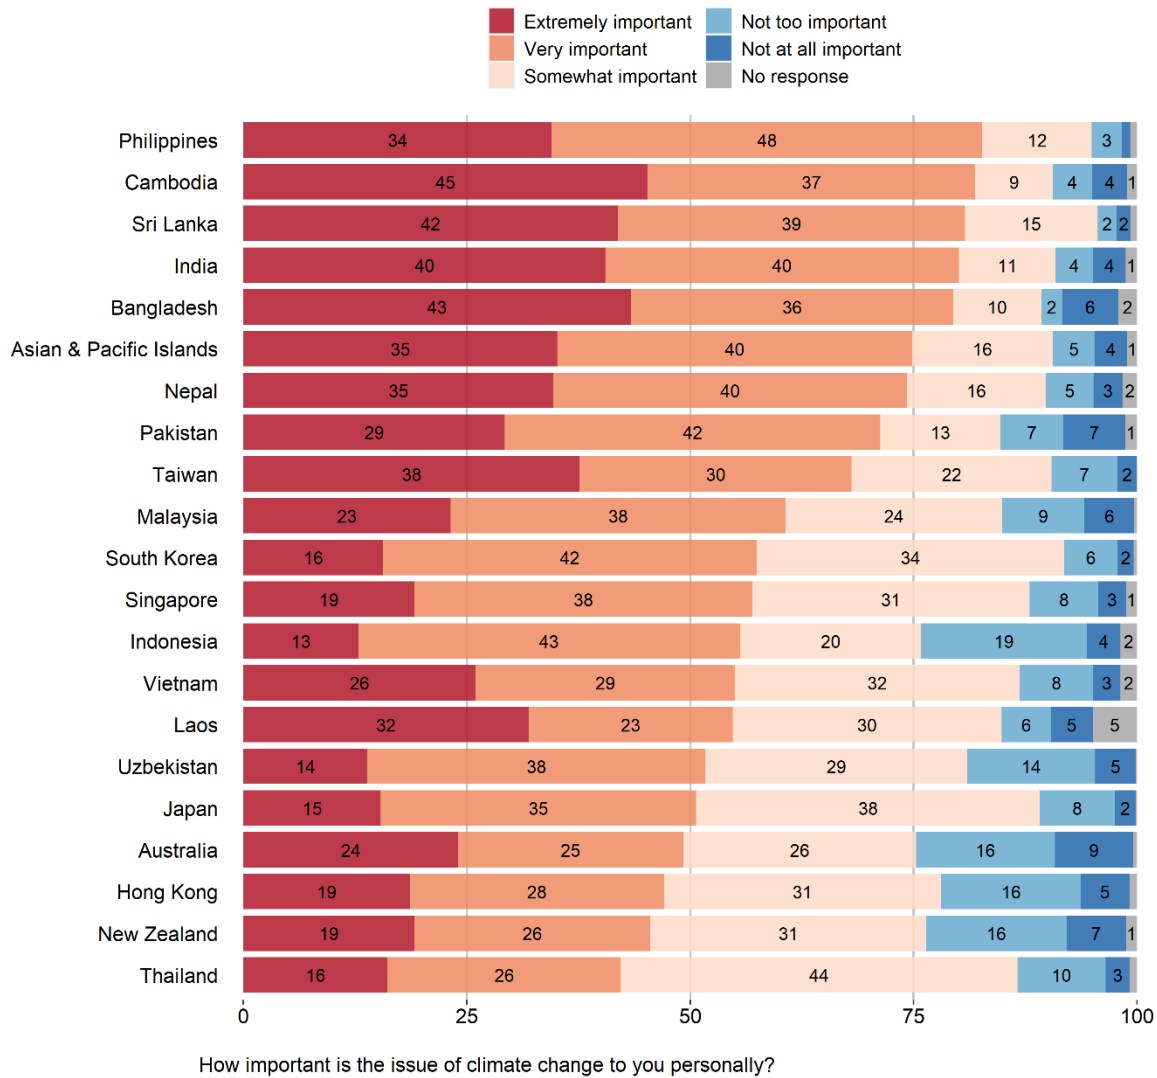

How much do you think climate change will harm you personally?

## 2.4 How important is the issue of climate change to you personally?

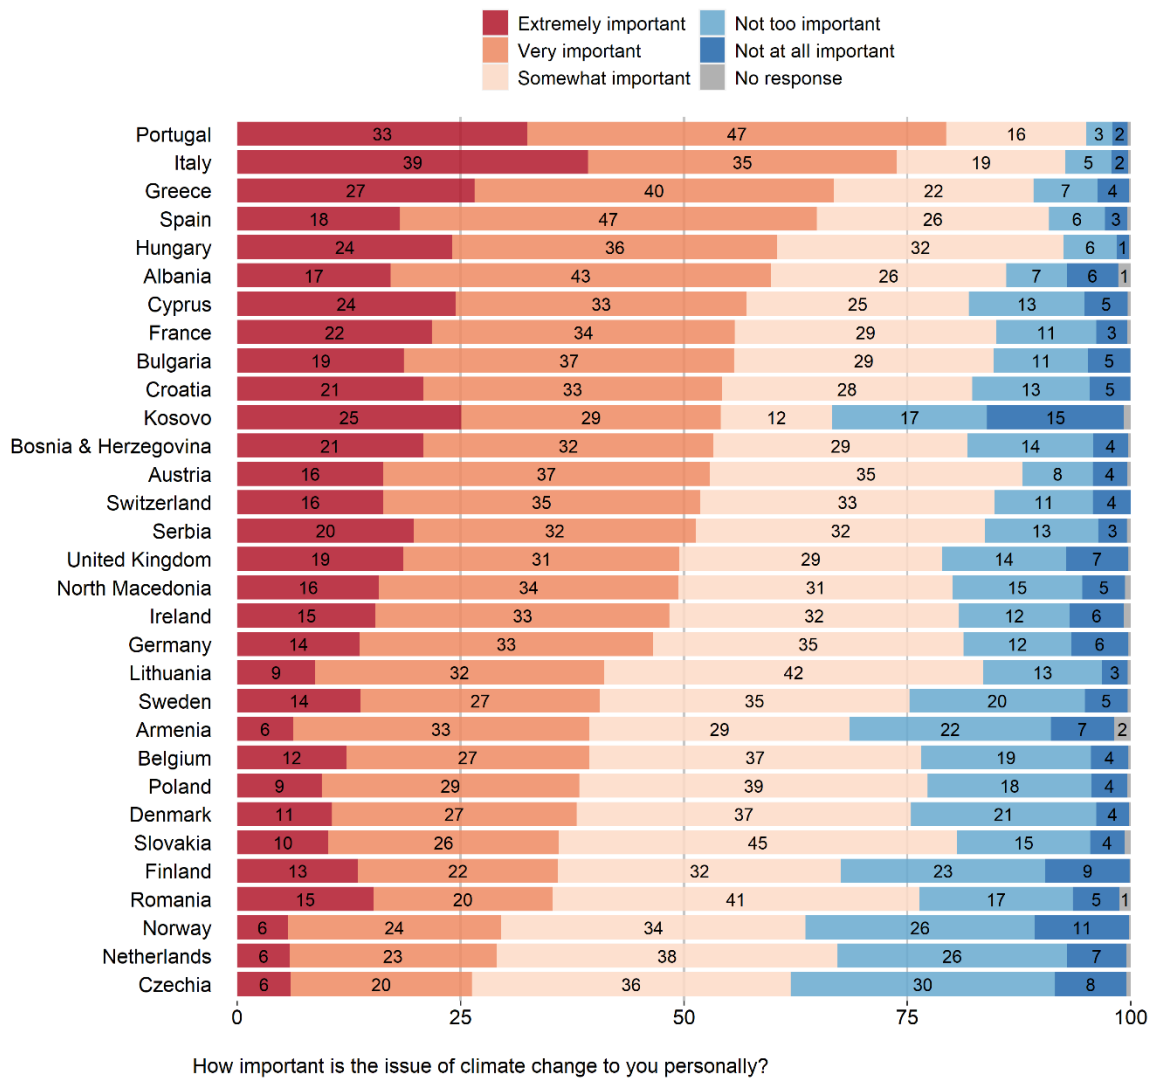

### Climate change is personally important

#### Asia & the Pacific

## Climate change is personally important

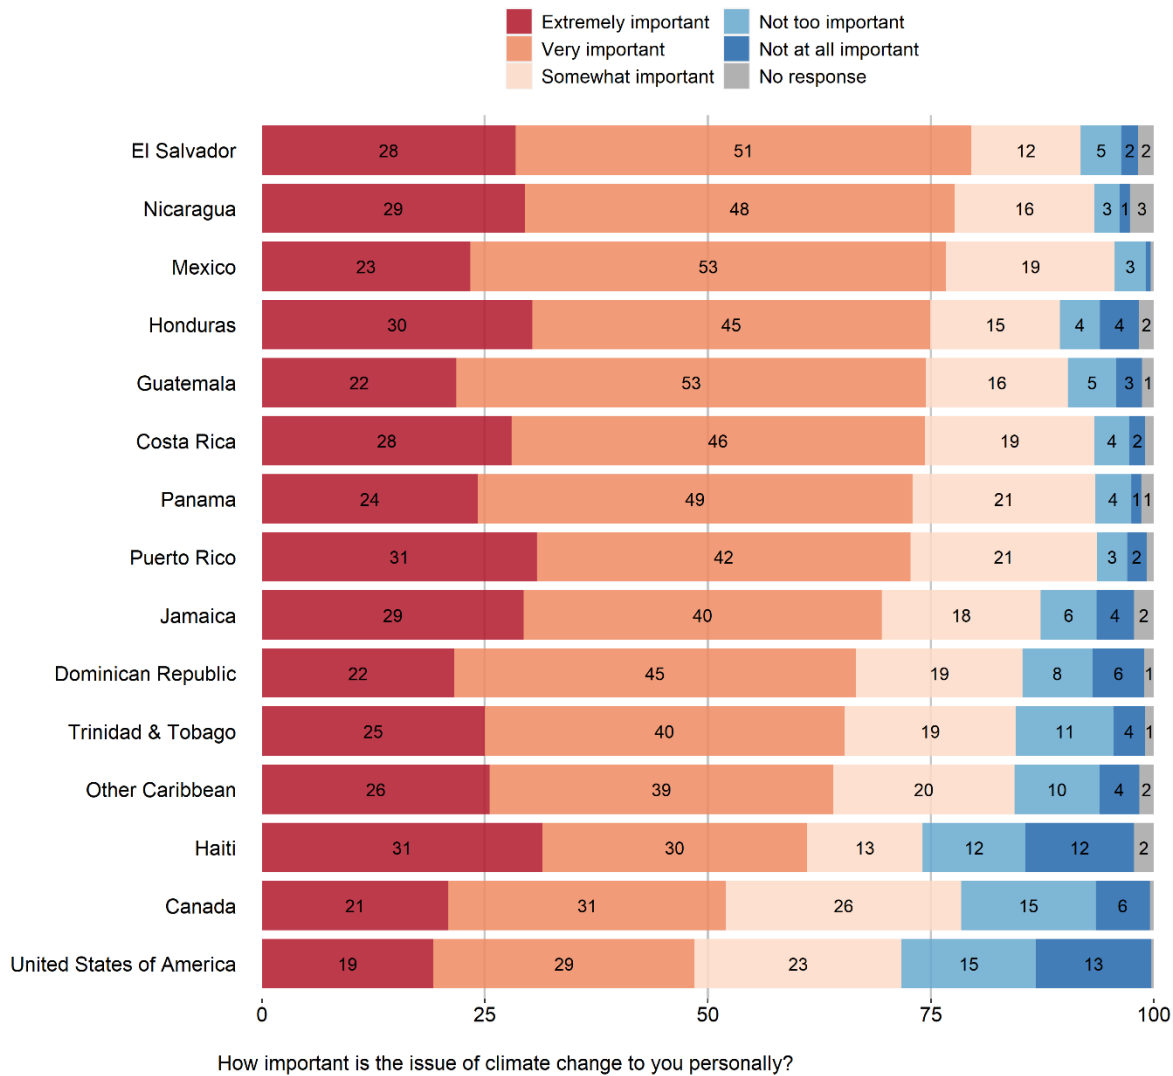

### Europe

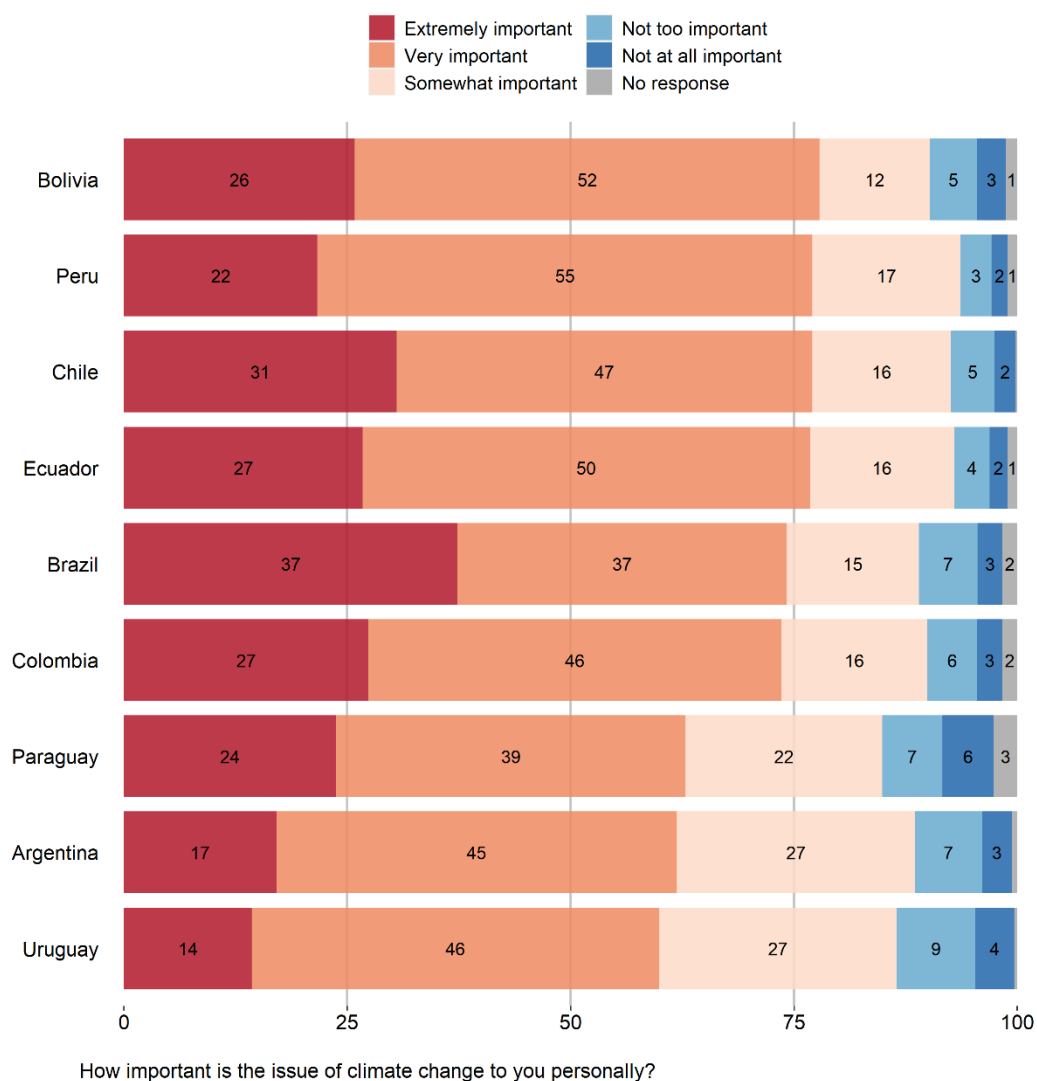

## Climate change is personally important

### North America

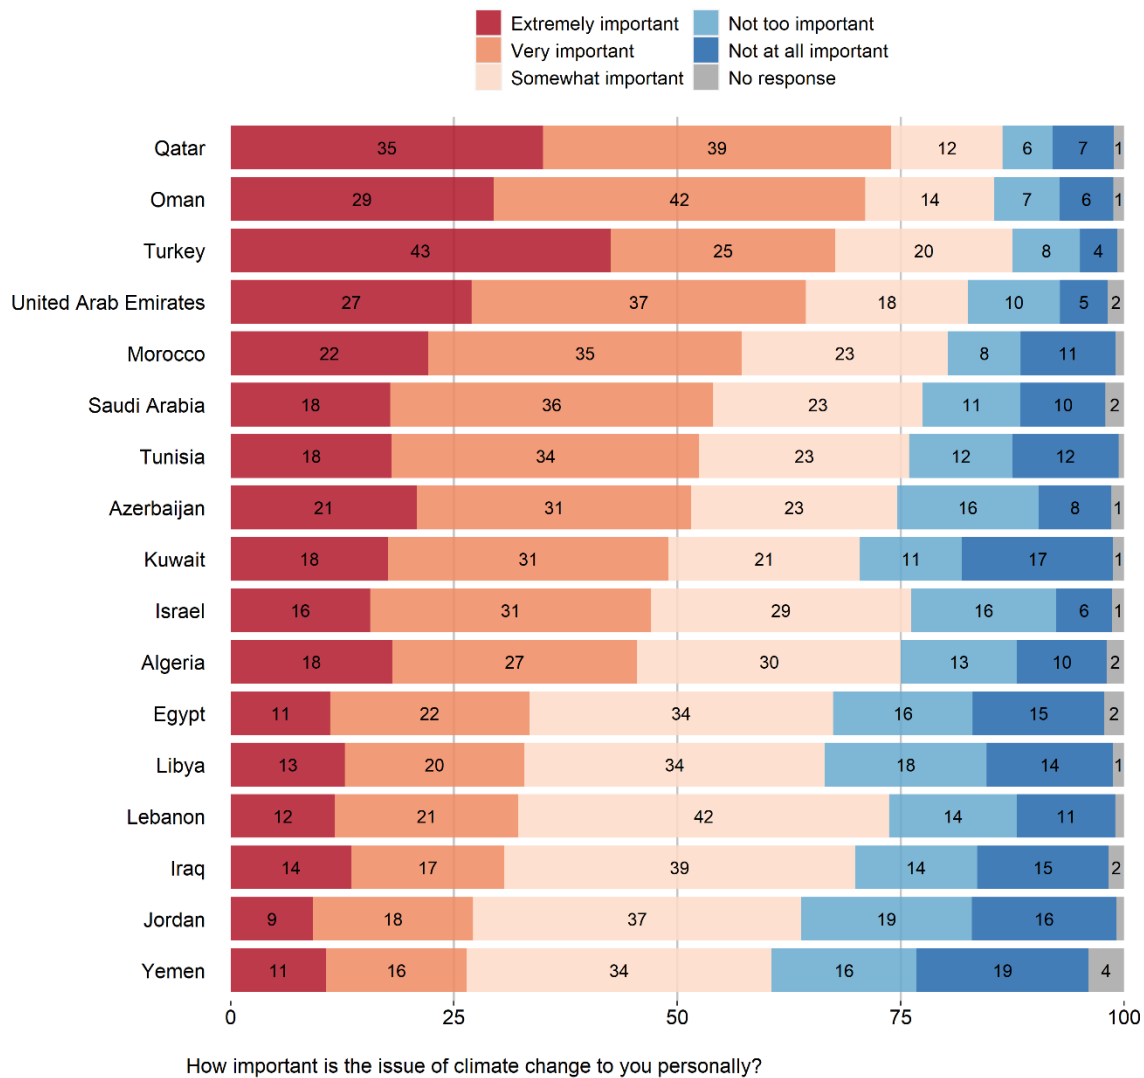

## Climate change is personally important

### South America

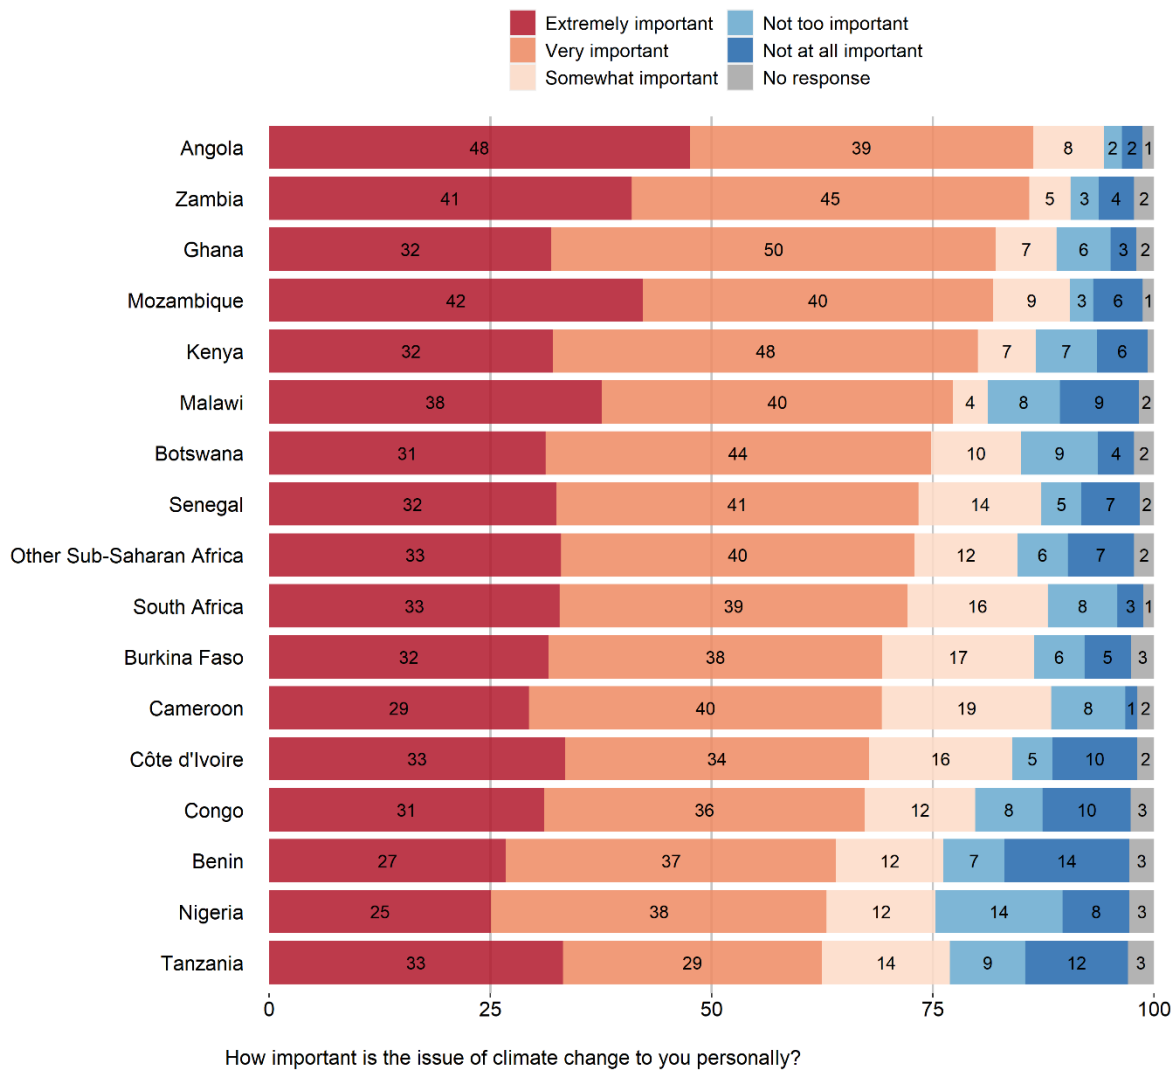

## Climate change is personally important

### Southwest Asia & North Africa

## Climate change is personally important

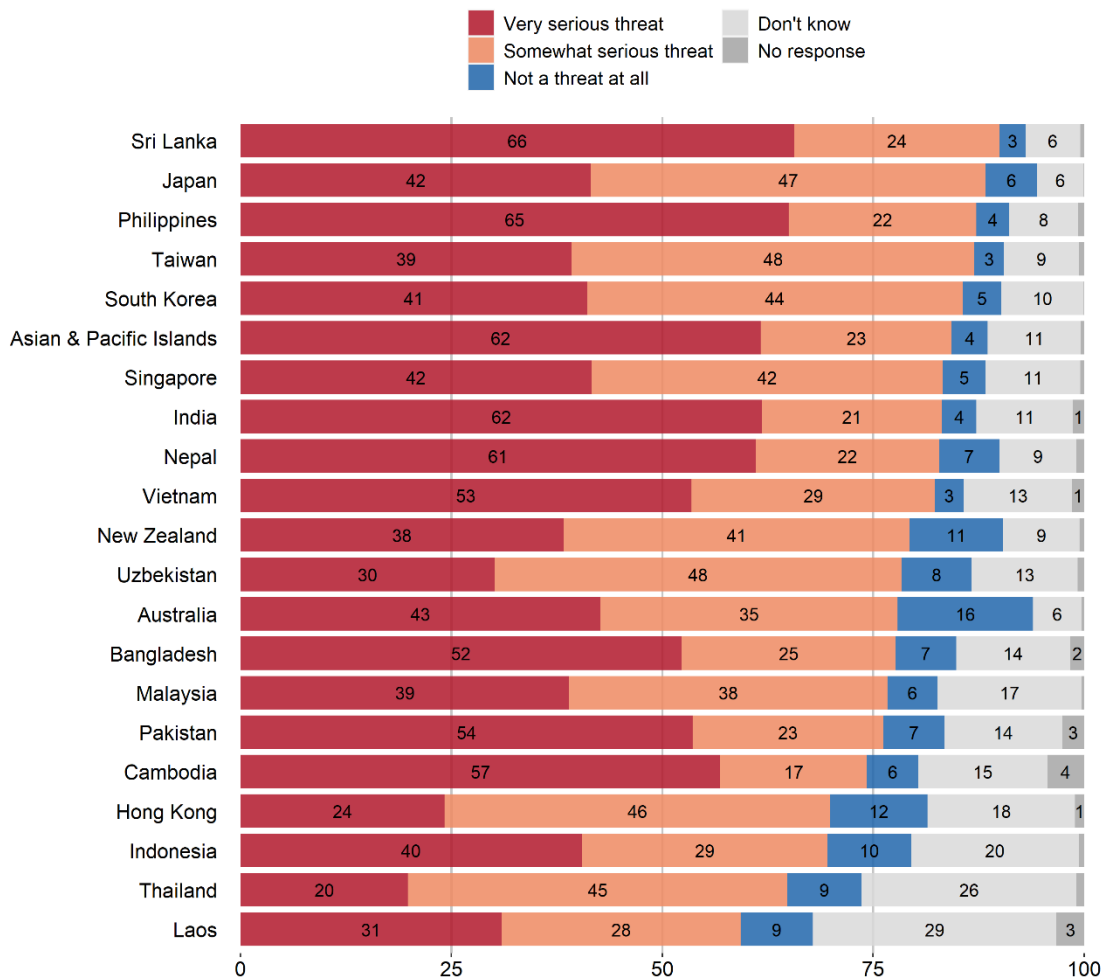

### Sub-Saharan Africa

## 2.5 Do you think that climate change is a very serious threat, a somewhat serious threat, or not a threat at all to the people in the country or territory where you live, over the next 20 years?

### Climate change is a threat in the next 20 years

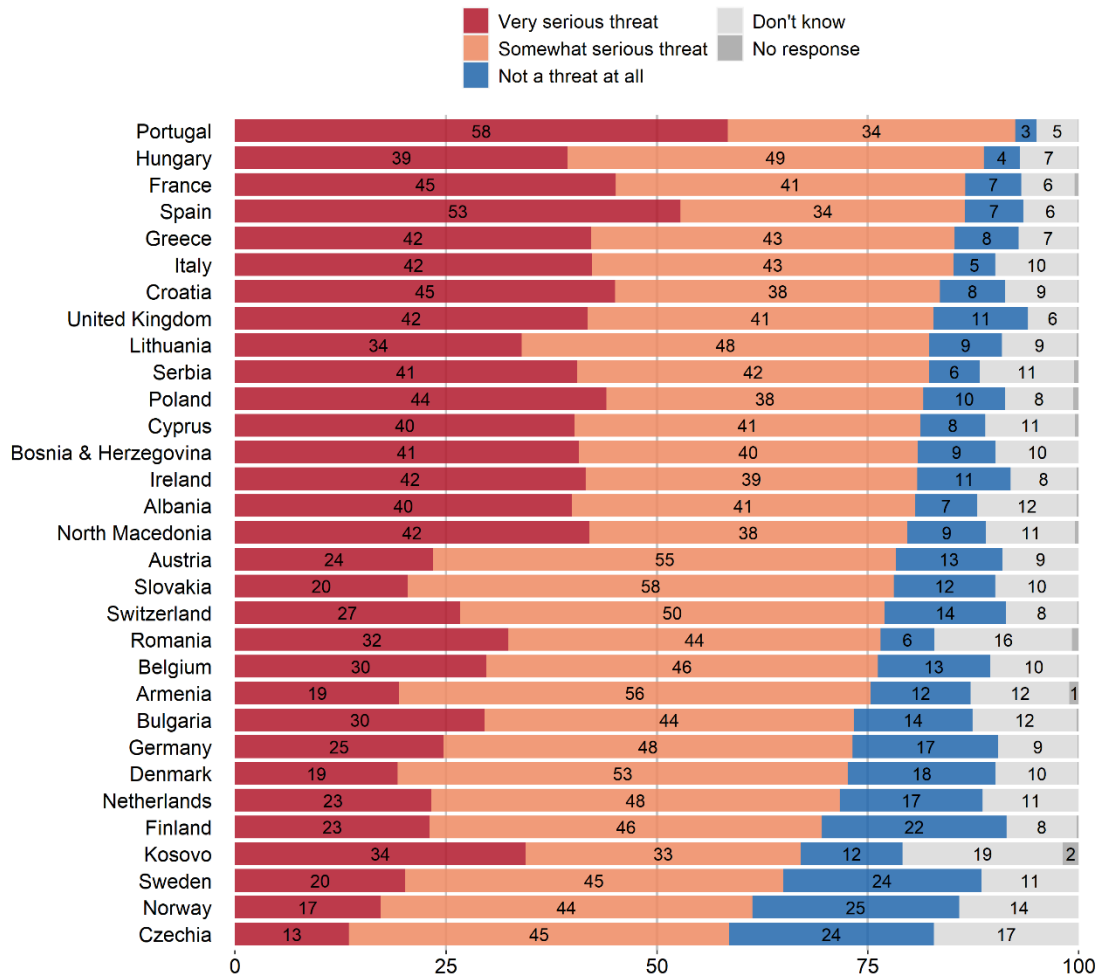

#### Asia & the Pacific

Do you think that climate change is a very serious threat, a somewhat serious threat, or not a threat at all to the people in the country (or territory) where you live, over the next 20 years?

## Climate change is a threat in the next 20 years

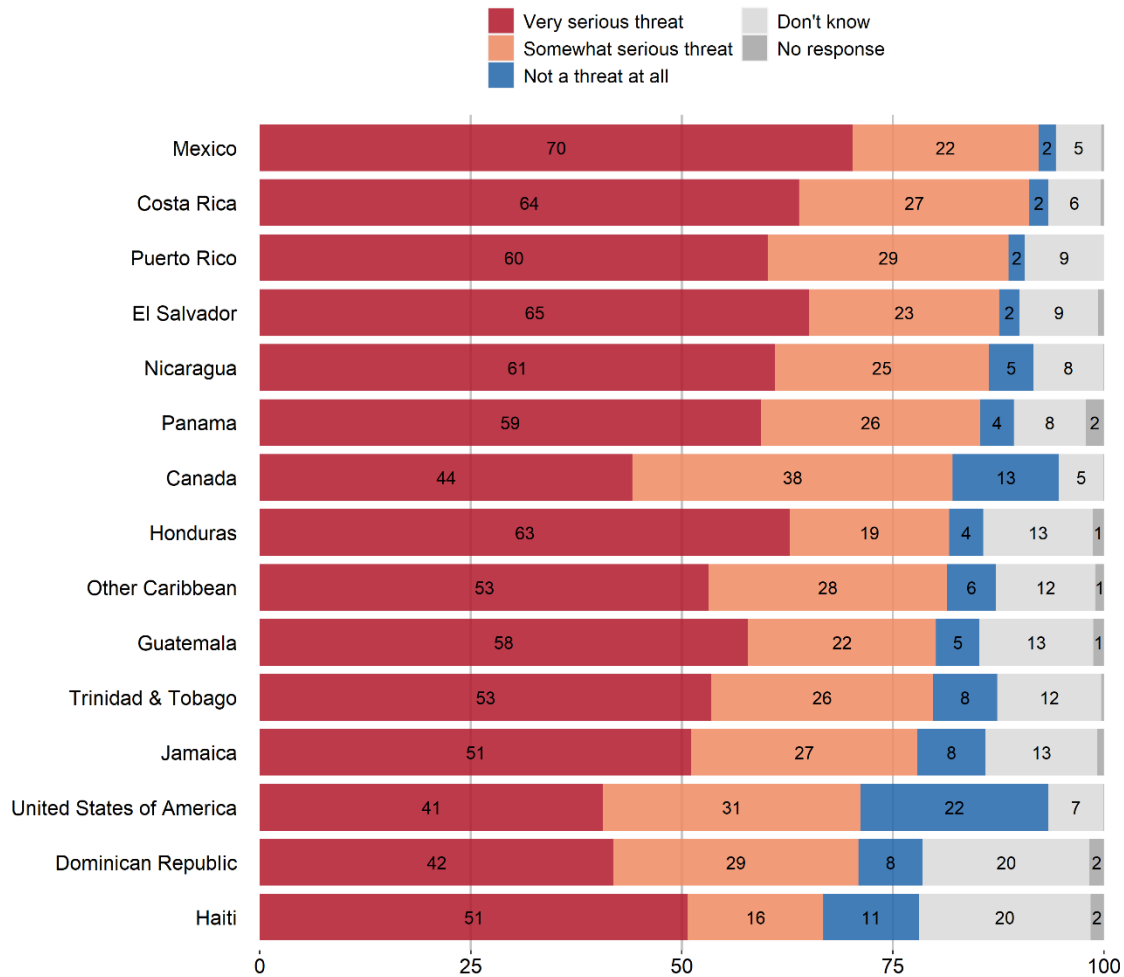

### Europe

Do you think that climate change is a very serious threat, a somewhat serious threat, or not a threat at all to the people in the country (or territory) where you live, over the next 20 years?

## Climate change is a threat in the next 20 years

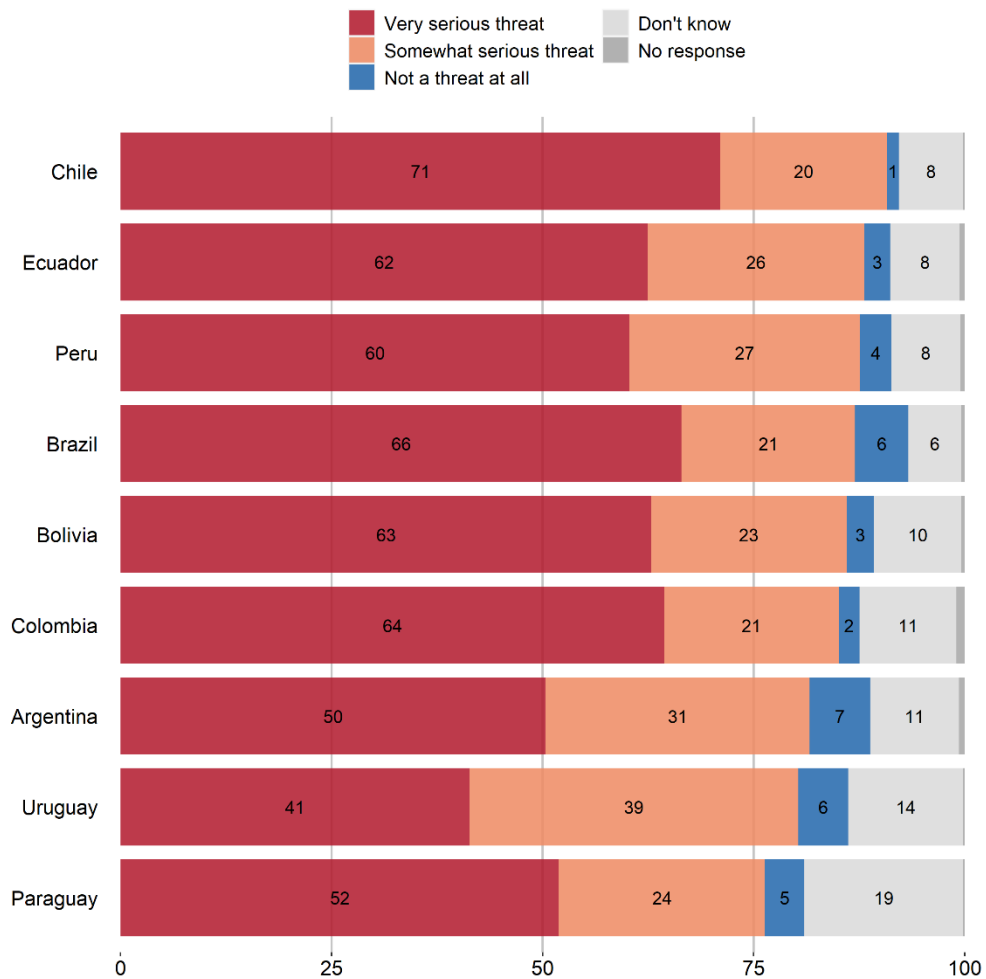

### North America

Do you think that climate change is a very serious threat, a somewhat serious threat, or not a threat at all to the people in the country (or territory) where you live, over the next 20 years?

## Climate change is a threat in the next 20 years

### South America

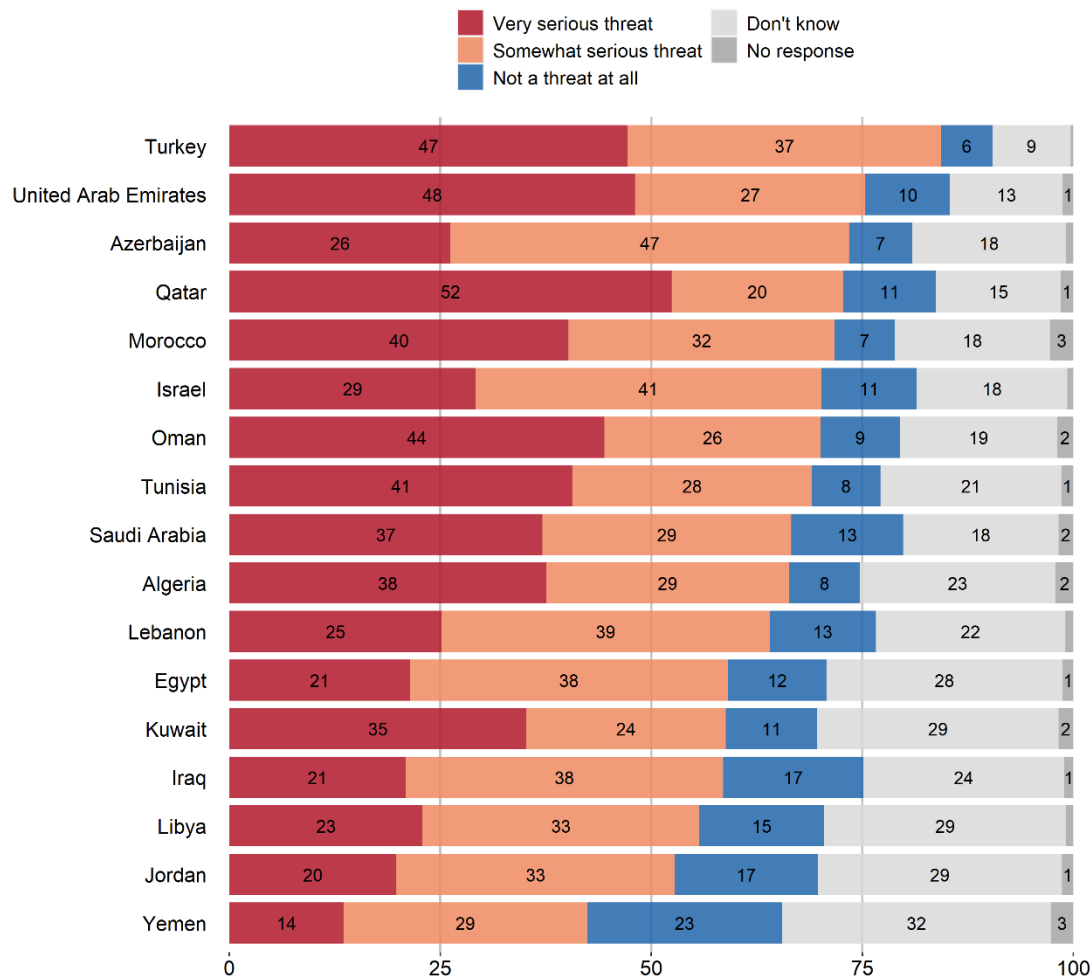

Do you think that climate change is a very serious threat, a somewhat serious threat, or not a threat at all to the people in the country (or territory) where you live, over the next 20 years?

## Climate change is a threat in the next 20 years

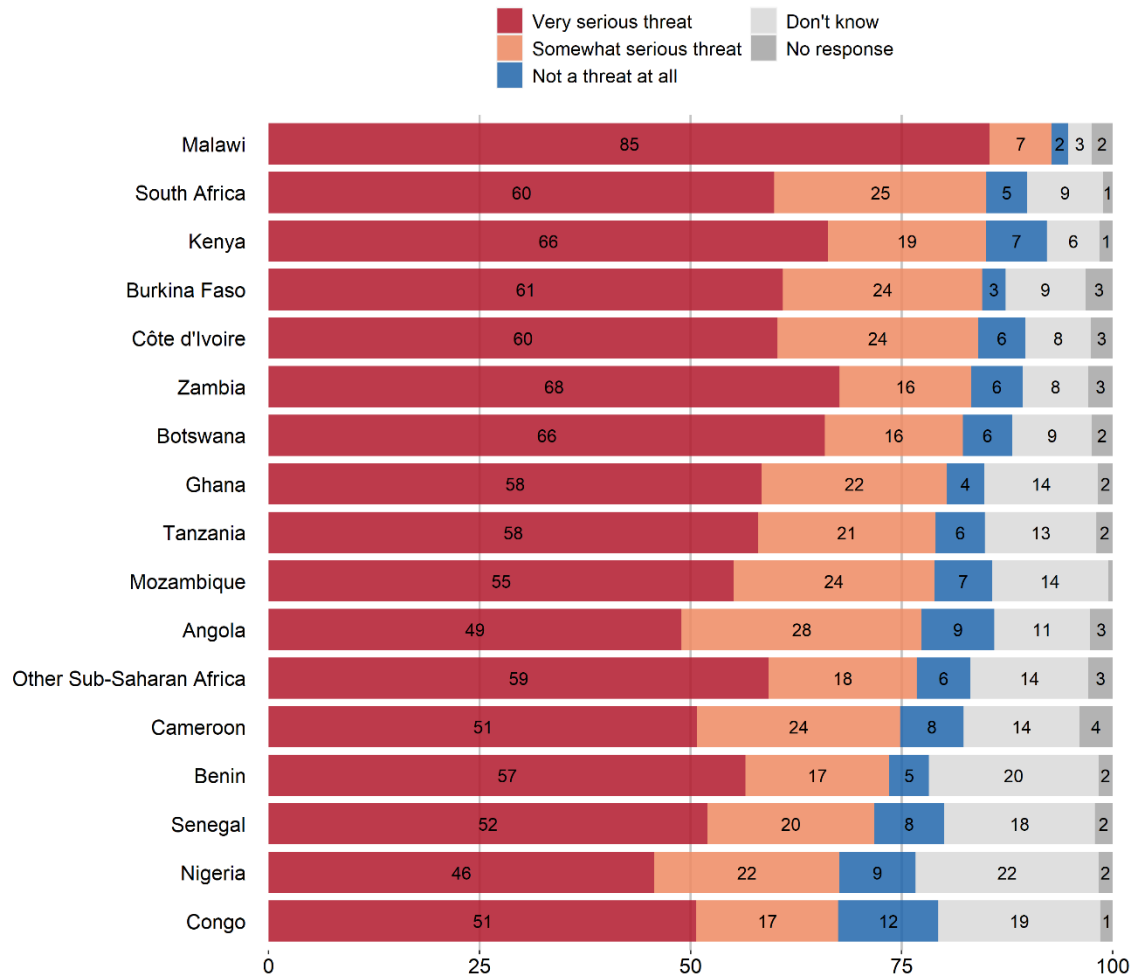

### Southwest Asia & North Africa

Do you think that climate change is a very serious threat, a somewhat serious threat, or not a threat at all to the people in the country (or territory) where you live, over the next 20 years?

## Climate change is a threat in the next 20 years

### Sub-Saharan Africa

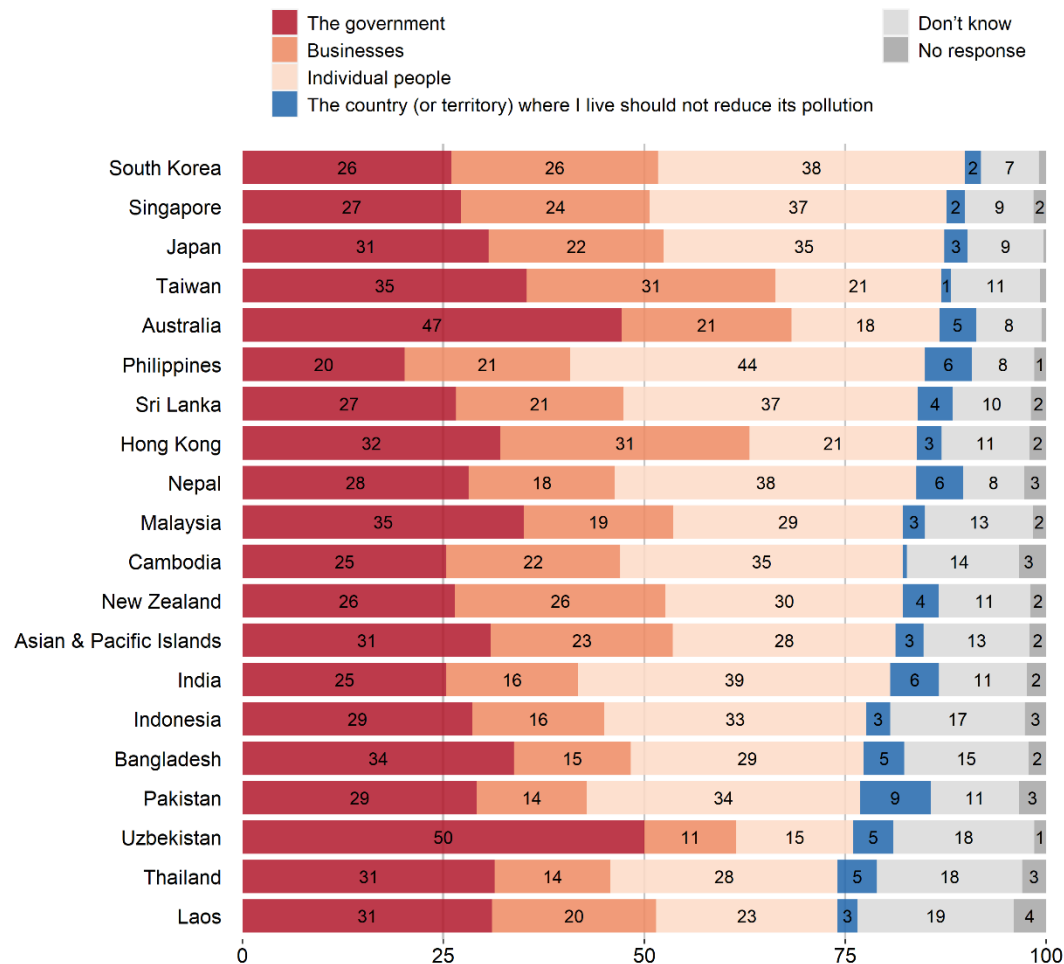

Do you think that climate change is a very serious threat, a somewhat serious threat, or not a threat at all to the people in the country (or territory) where you live, over the next 20 years?

### 3.1 In the country or territory where you live, who do you think is most responsible for reducing the pollution that causes climate change?

#### Who is most responsible for reducing causes of climate change?

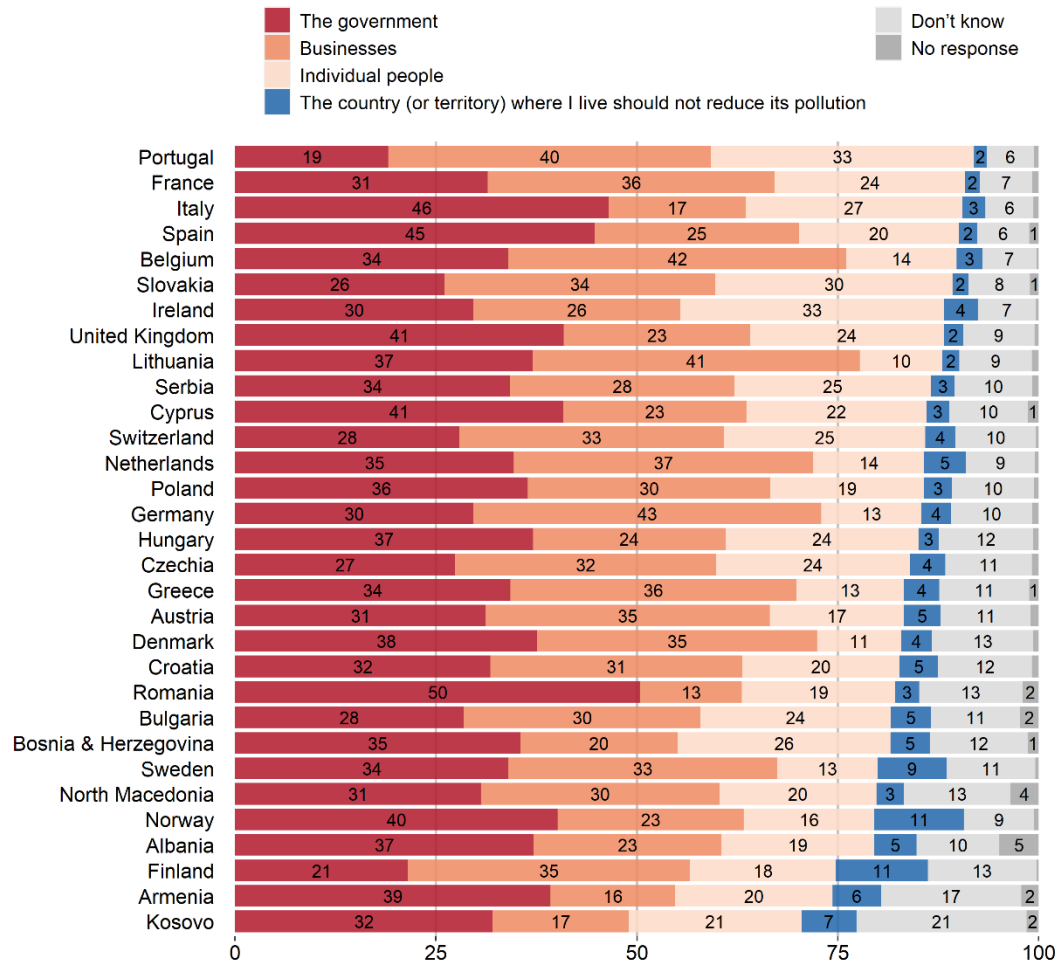

##### Asia & the Pacific

In the country (or territory) where you live, who do you think is most responsible for reducing the pollution that causes climate change?

## Who is most responsible for reducing causes of climate change?

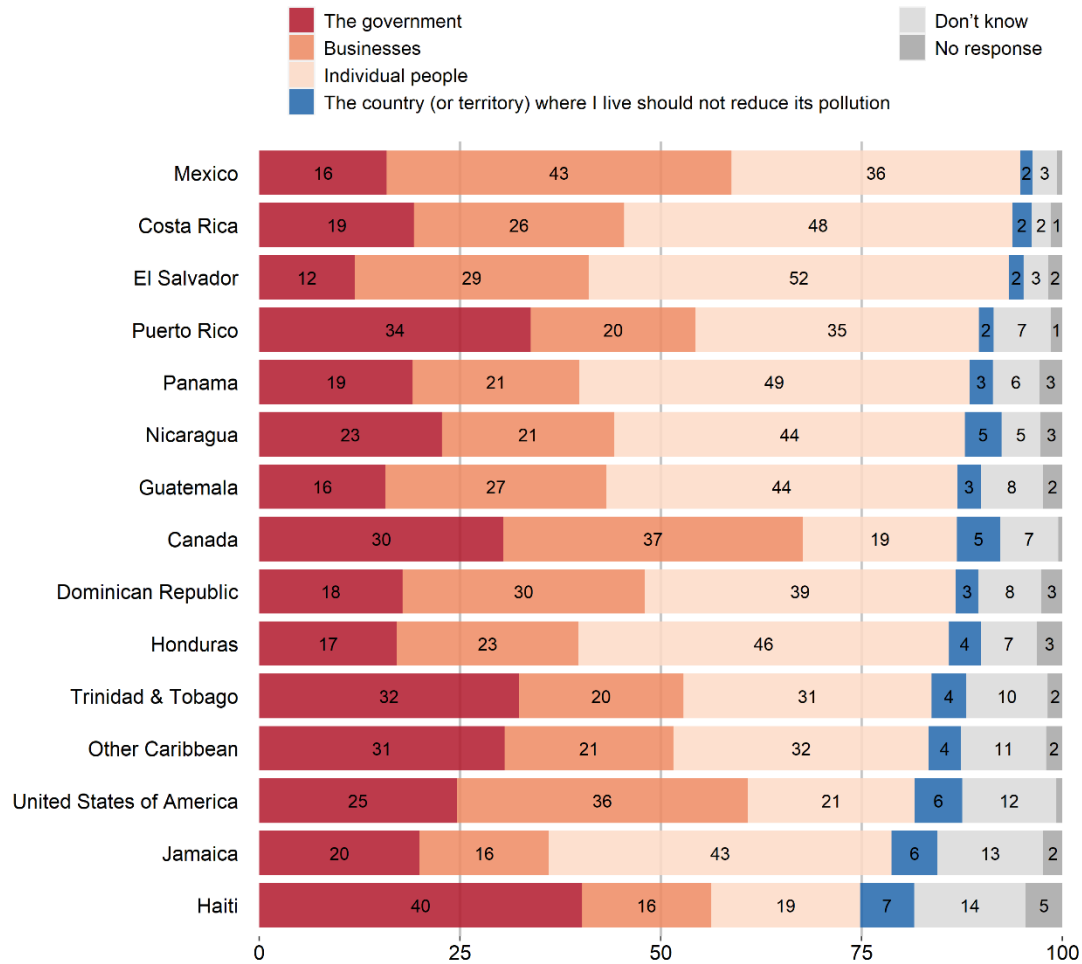

### Europe

In the country (or territory) where you live, who do you think is most responsible for reducing the pollution that causes climate change?

## Who is most responsible for reducing causes of climate change?

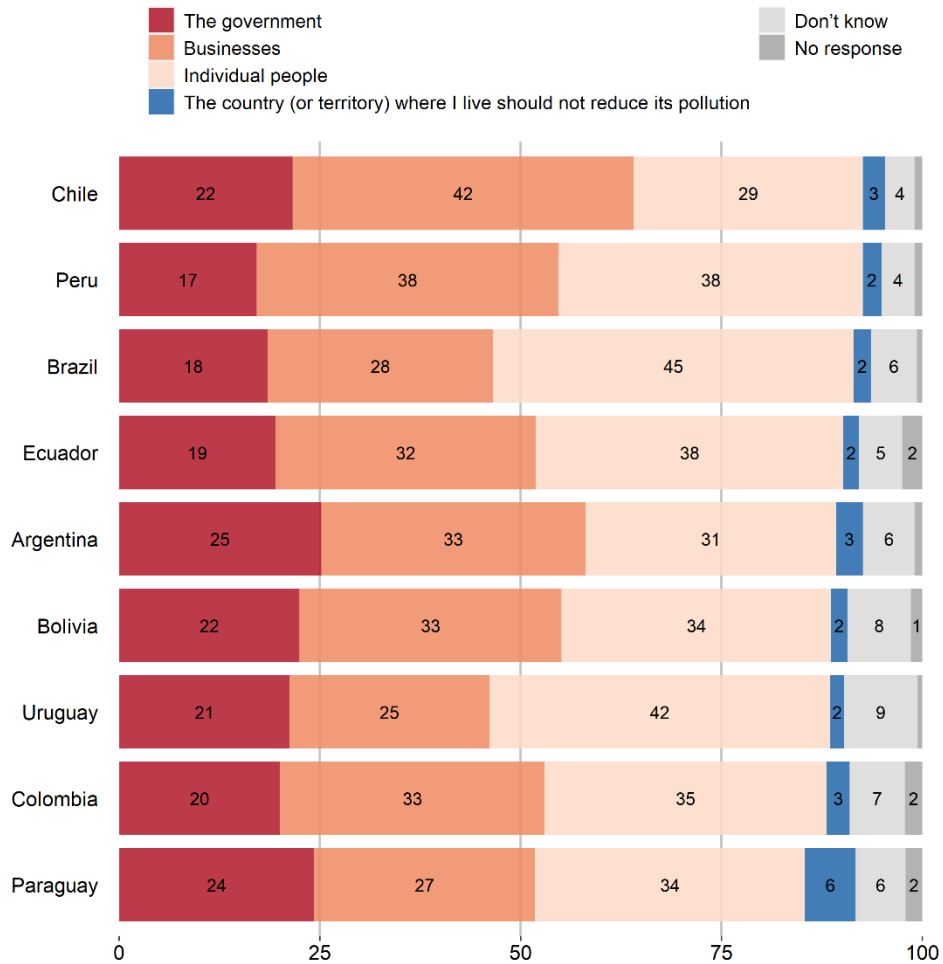

### North America

In the country (or territory) where you live, who do you think is most responsible for reducing the pollution that causes climate change?

## Who is most responsible for reducing causes of climate change?

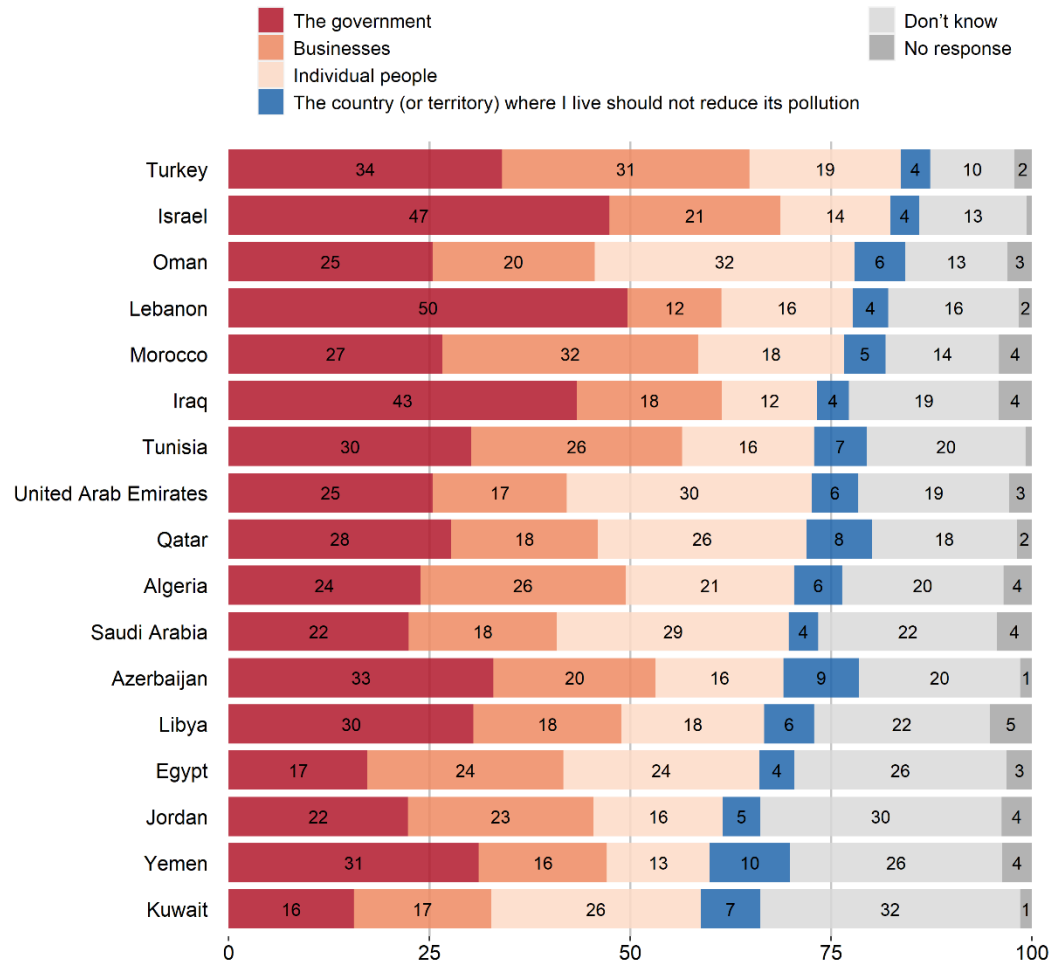

### South America

In the country (or territory) where you live, who do you think is most responsible for reducing the pollution that causes climate change?

## Who is most responsible for reducing causes of climate change?

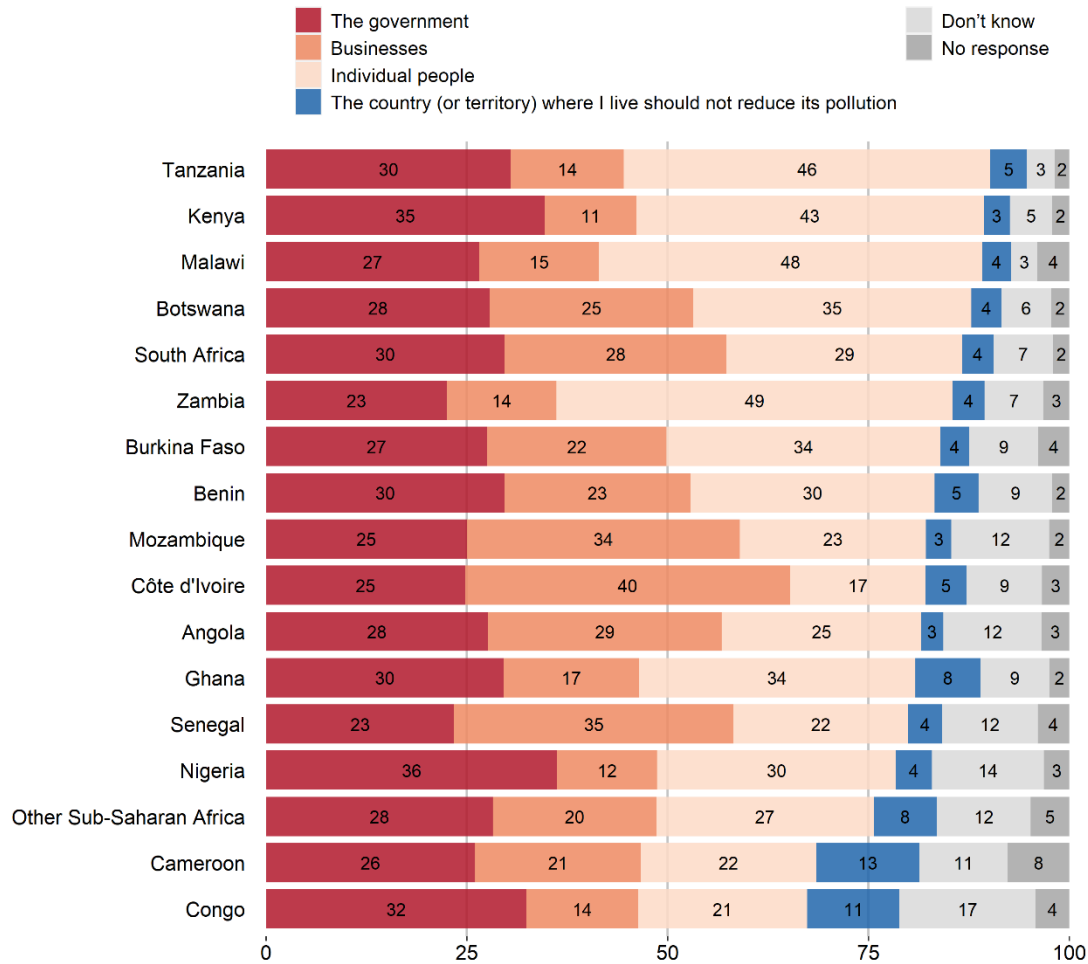

### Southwest Asia & North Africa

In the country (or territory) where you live, who do you think is most responsible for reducing the pollution that causes climate change?

## Who is most responsible for reducing causes of climate change?

### Sub-Saharan Africa

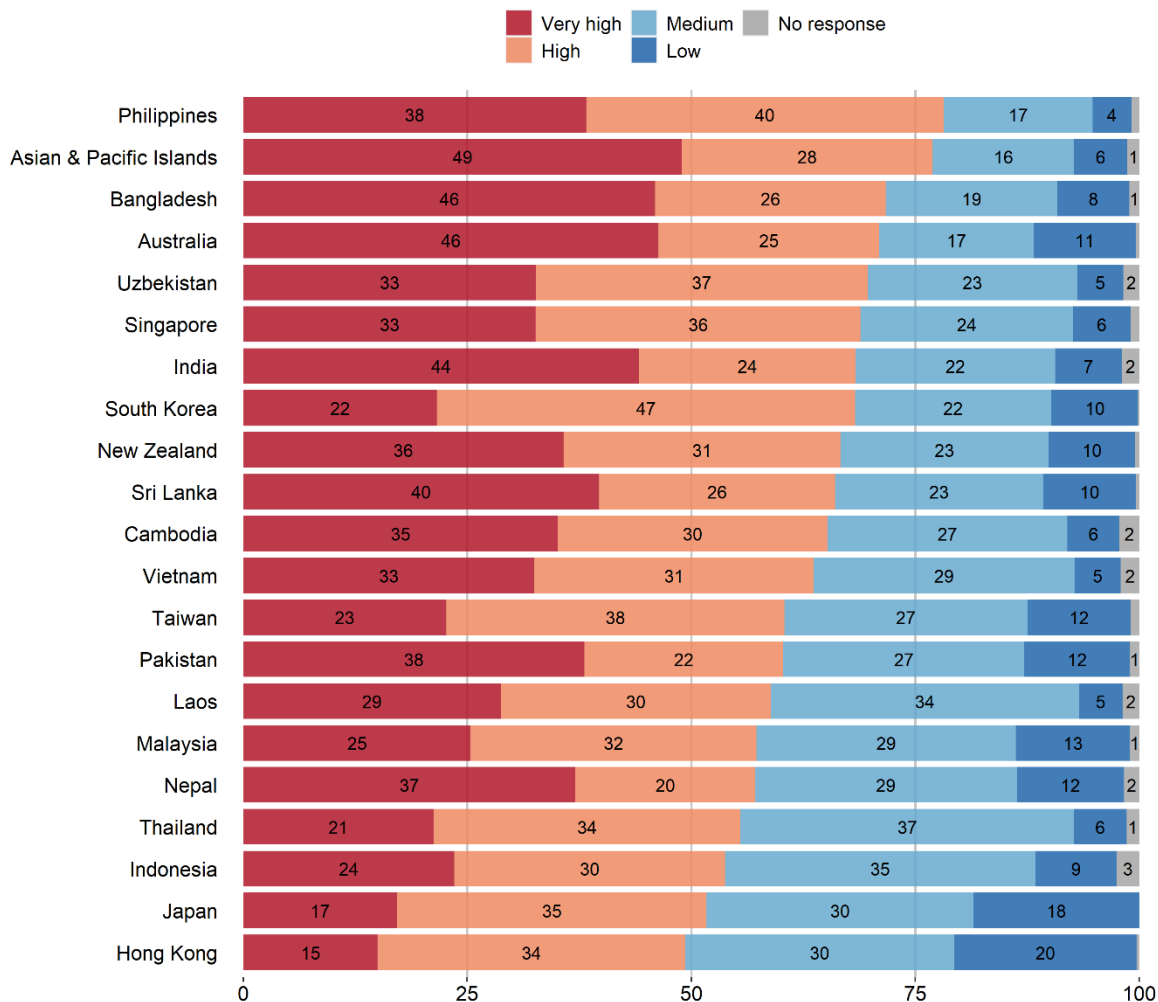

In the country (or territory) where you live, who do you think is most responsible for reducing the pollution that causes climate change?

### 3.2 Do you think climate change should be a very high, high, medium, or low priority for the government of the country or territory where you live?

#### Climate change should be a government priority

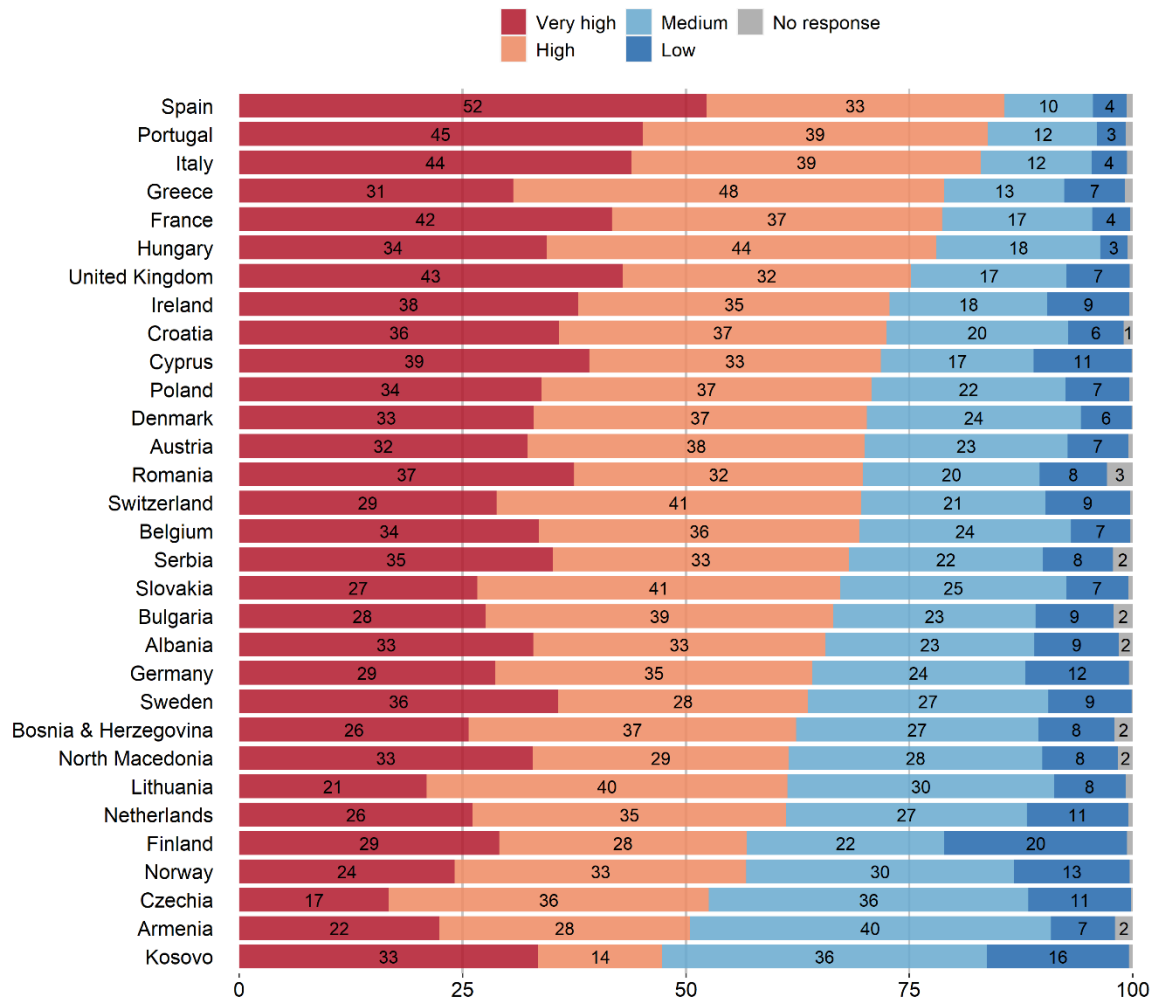

##### Asia & the Pacific

Do you think climate change should be a very high, high, medium, or low priority for the government of the country (or territory) where you live?

## Climate change should be a government priority

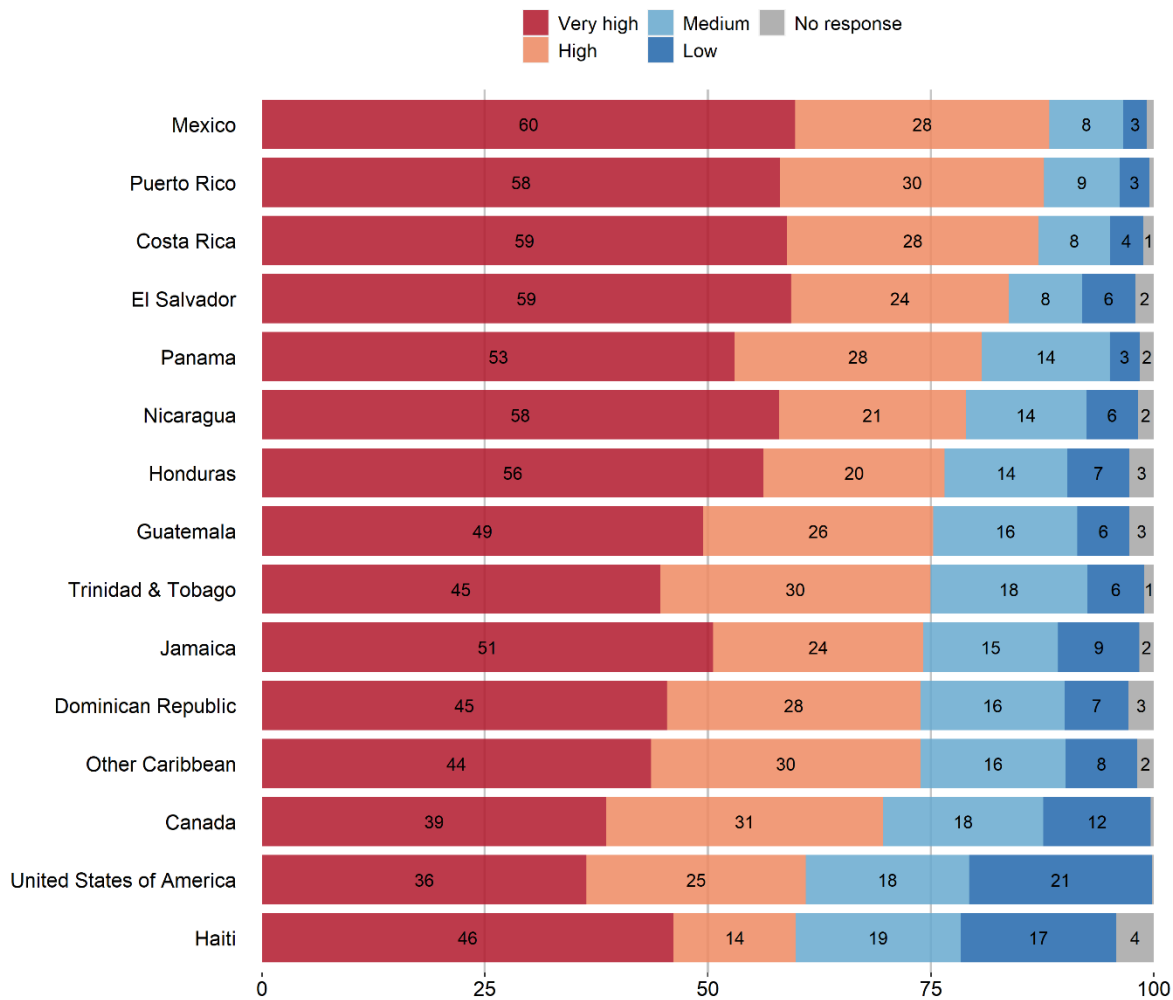

### Europe

Do you think climate change should be a very high, high, medium, or low priority for the government of the country (or territory) where you live?

## Climate change should be a government priority

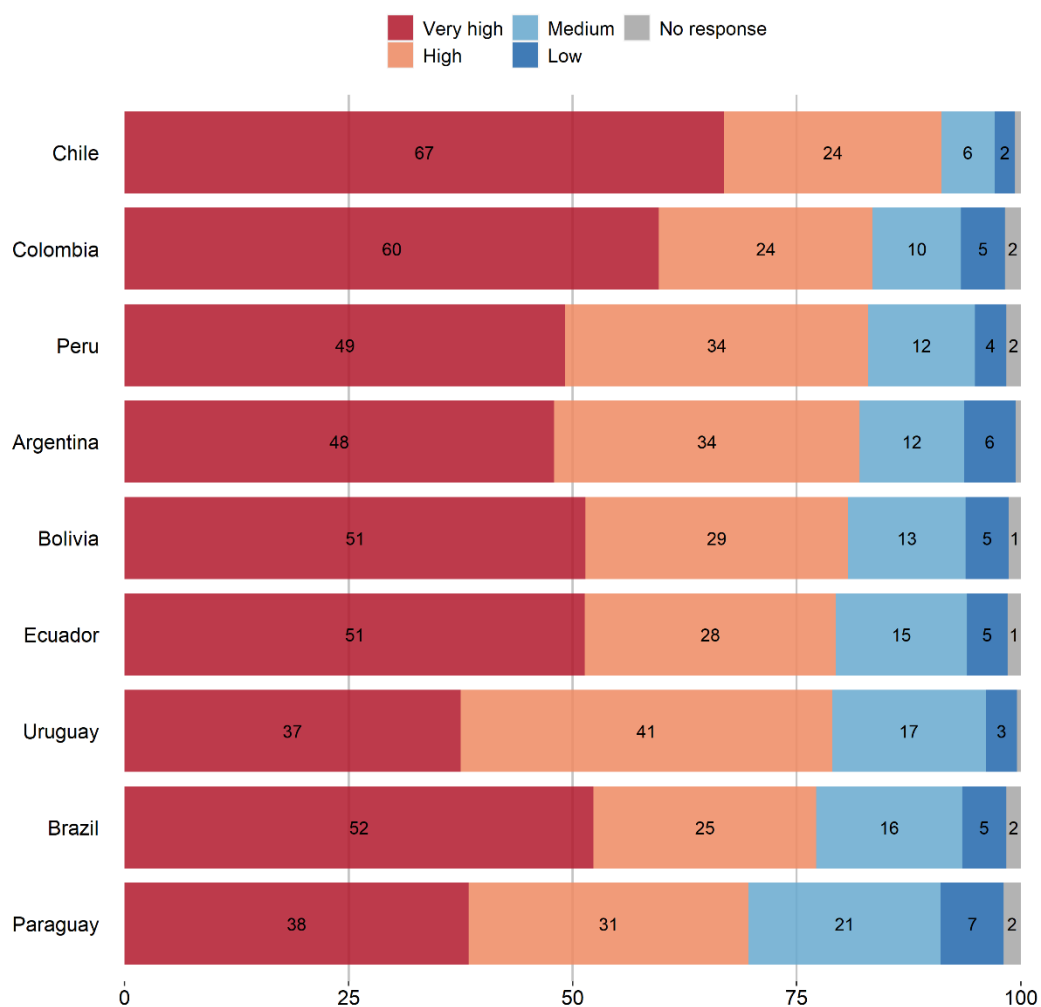

### North America

Do you think climate change should be a very high, high, medium, or low priority for the government of the country (or territory) where you live?

## Climate change should be a government priority

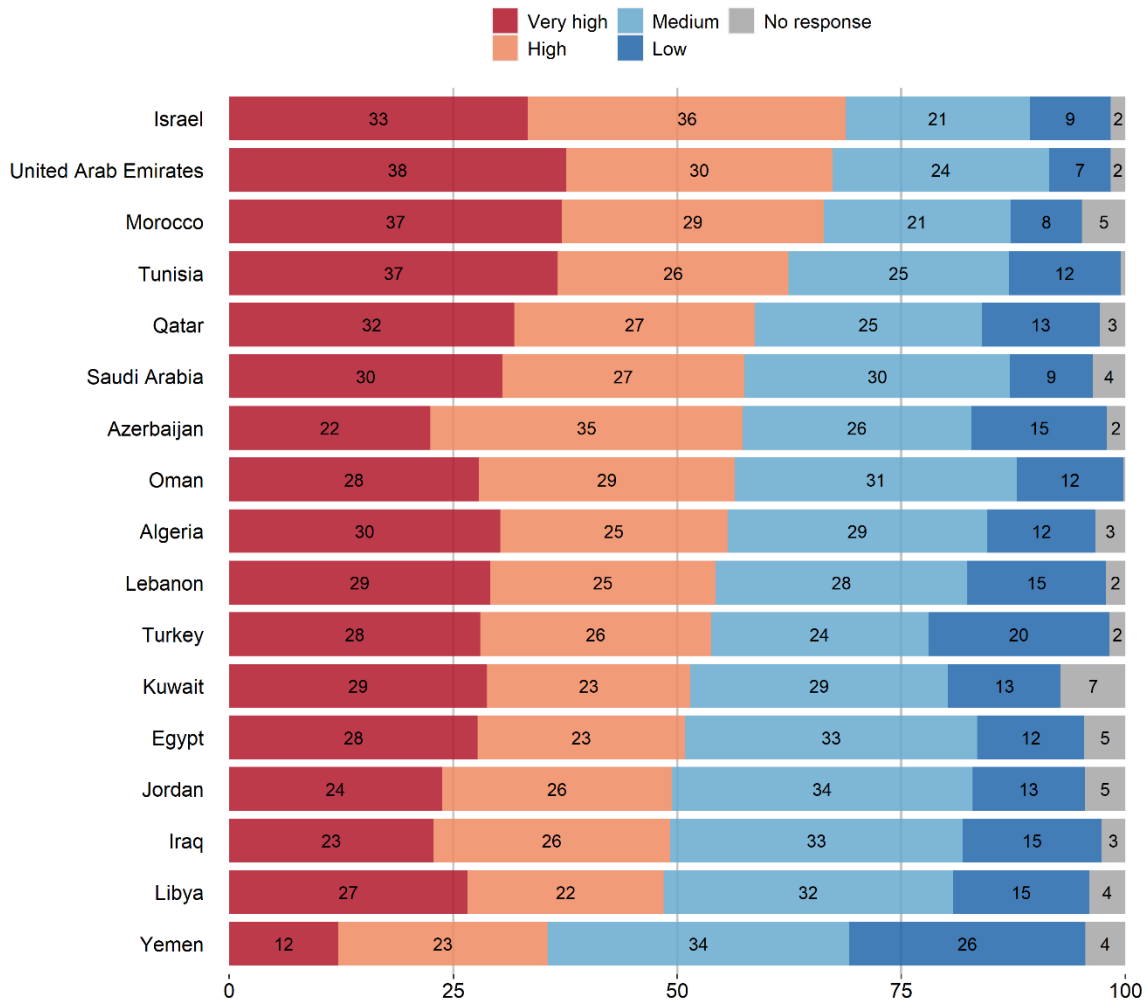

### South America

Do you think climate change should be a very high, high, medium, or low priority for the government of the country (or territory) where you live?

## Climate change should be a government priority

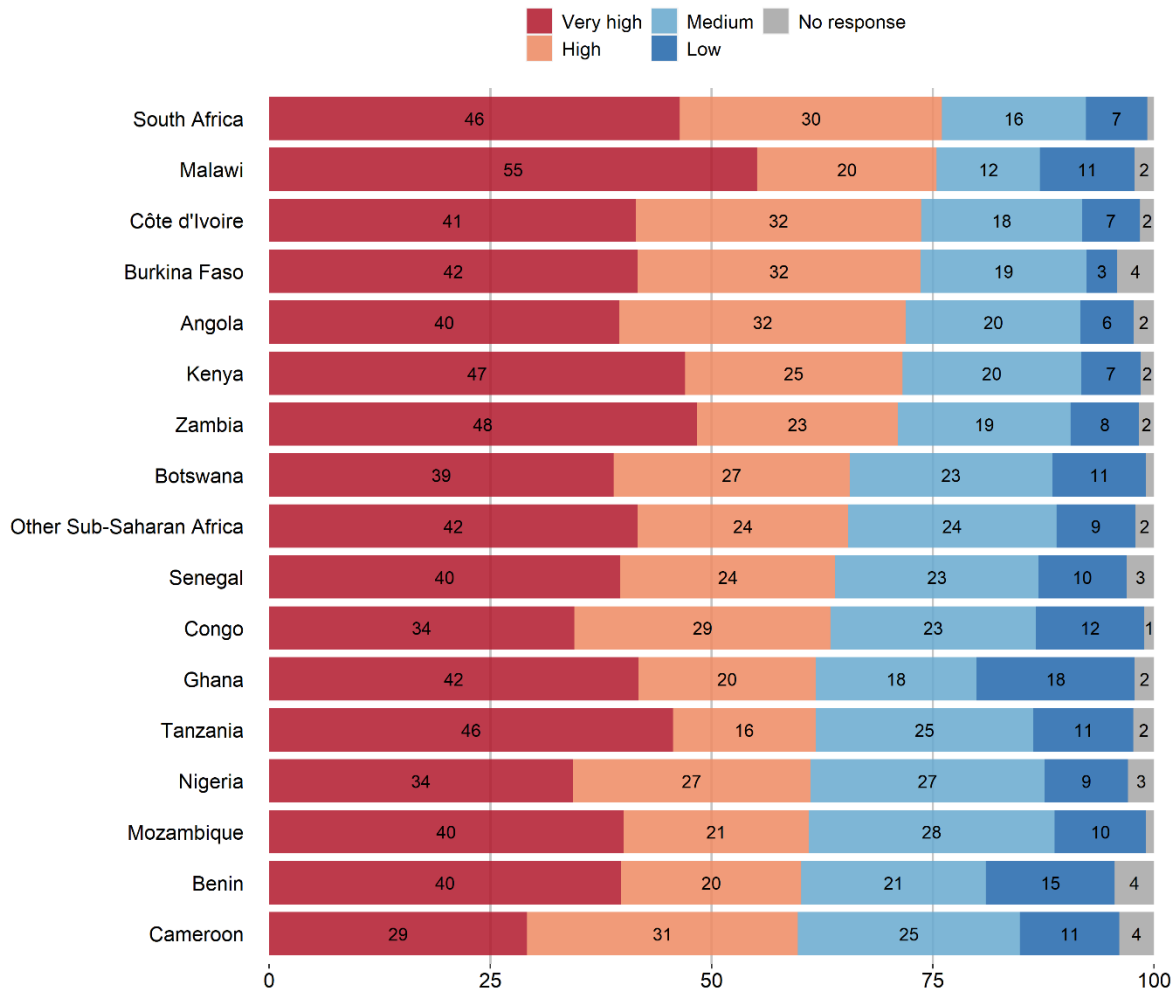

### Southwest Asia & North Africa

Do you think climate change should be a very high, high, medium, or low priority for the government of the country (or territory) where you live?

## Climate change should be a government priority

### Sub-Saharan Africa

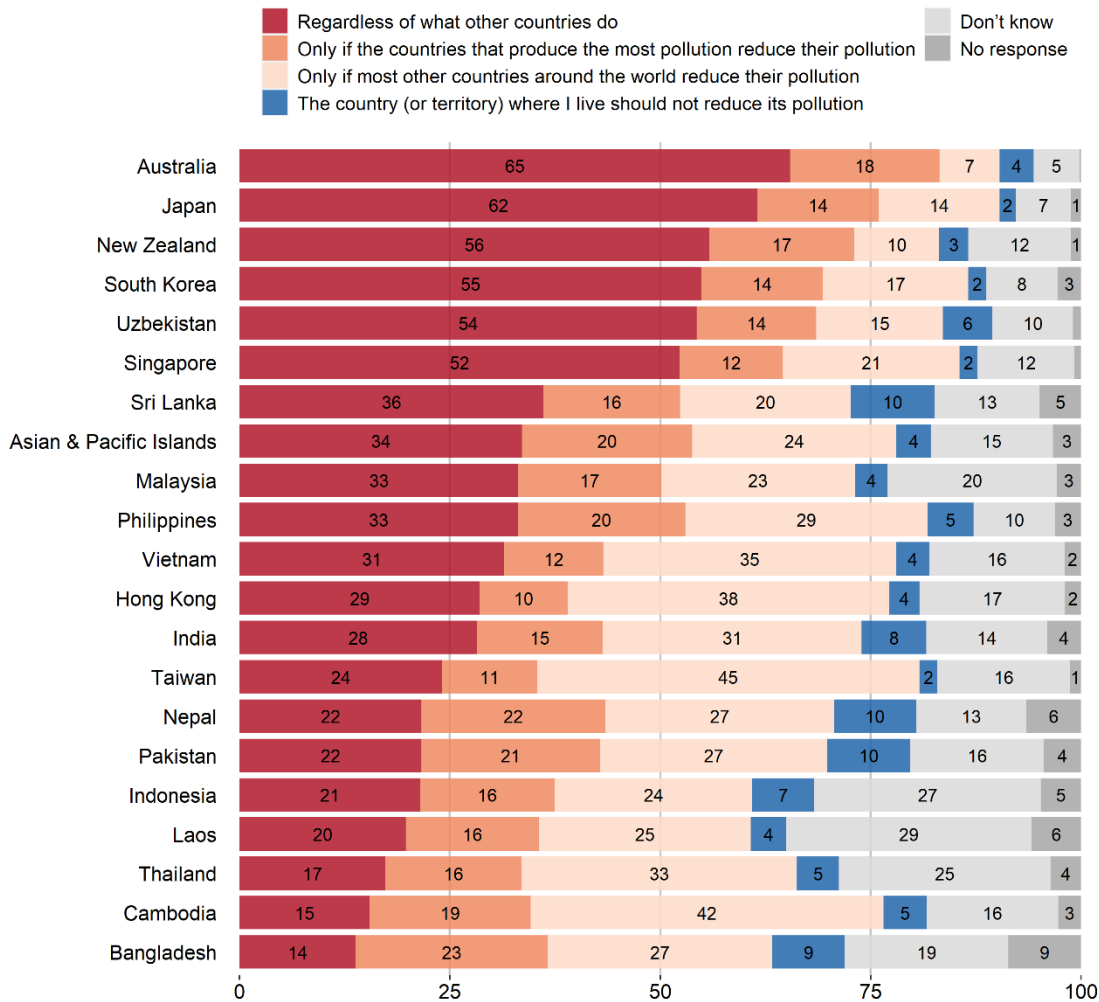

Do you think climate change should be a very high, high, medium, or low priority for the government of the country (or territory) where you live?

### 3.3 Do you think that the country or territory where you live should reduce its pollution that causes climate change...

#### National responsibility to reduce carbon pollution

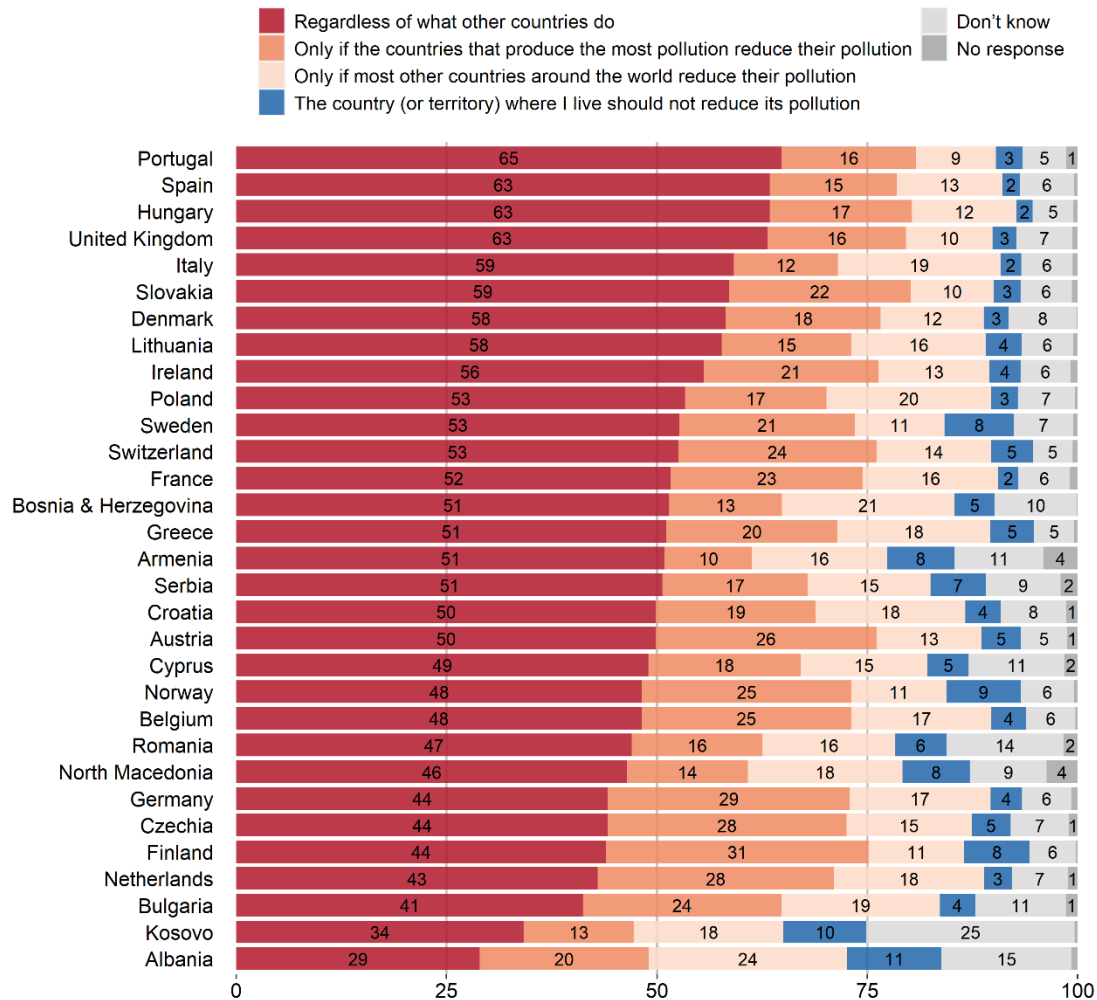

##### Asia & the Pacific

Do you think that the country (or territory) where you live should reduce its pollution that causes climate change...

## National responsibility to reduce carbon pollution

### Europe

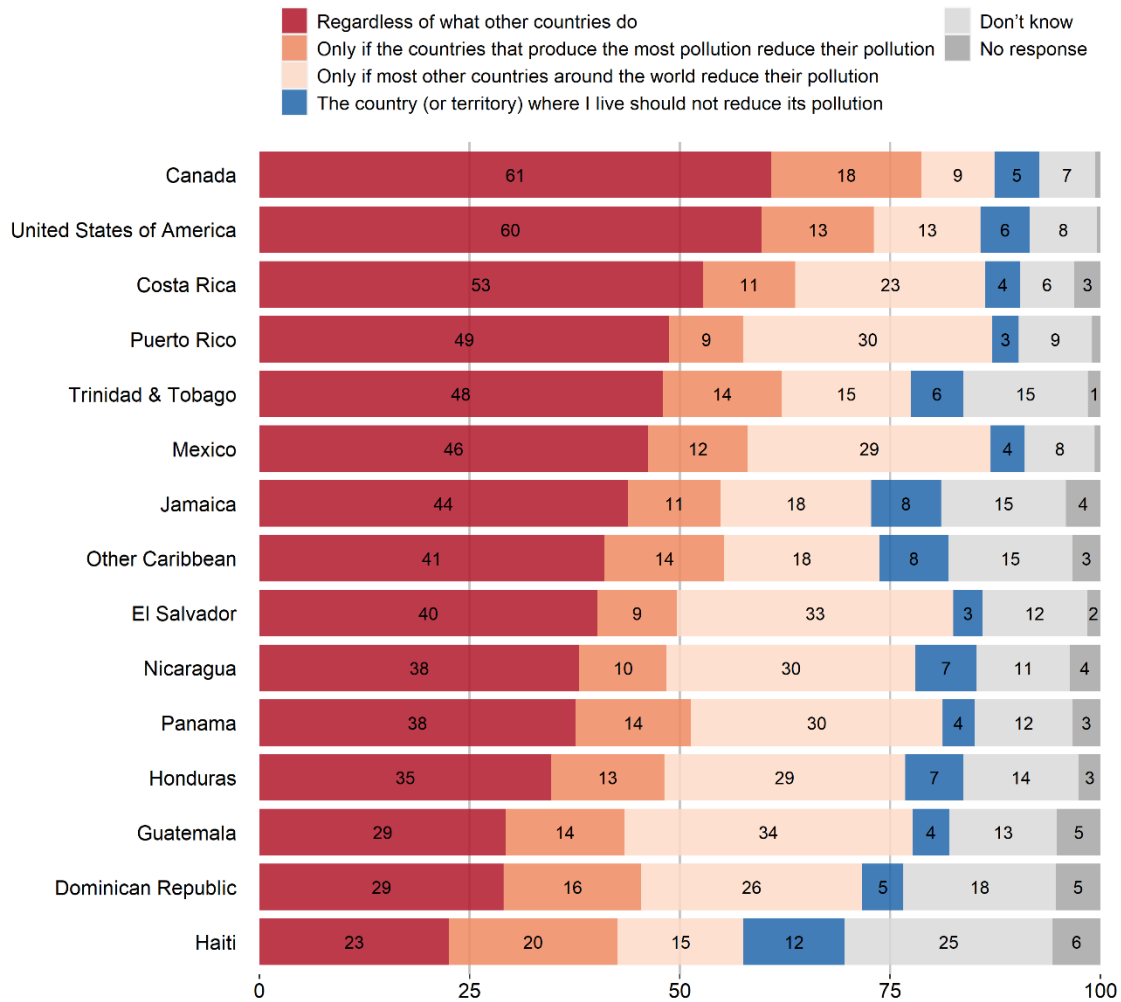

Do you think that the country (or territory) where you live should reduce its pollution that causes climate change...

## National responsibility to reduce carbon pollution

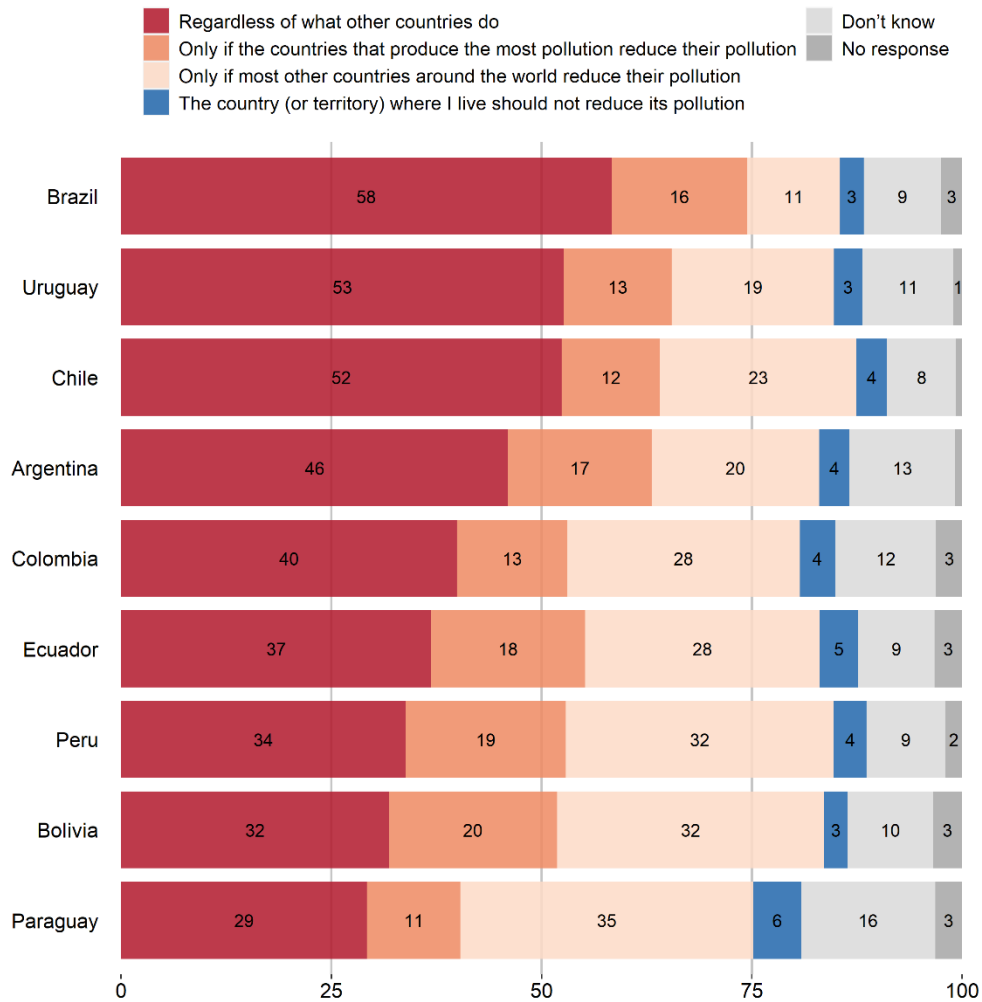

### North America

Do you think that the country (or territory) where you live should reduce its pollution that causes climate change...

## National responsibility to reduce carbon pollution

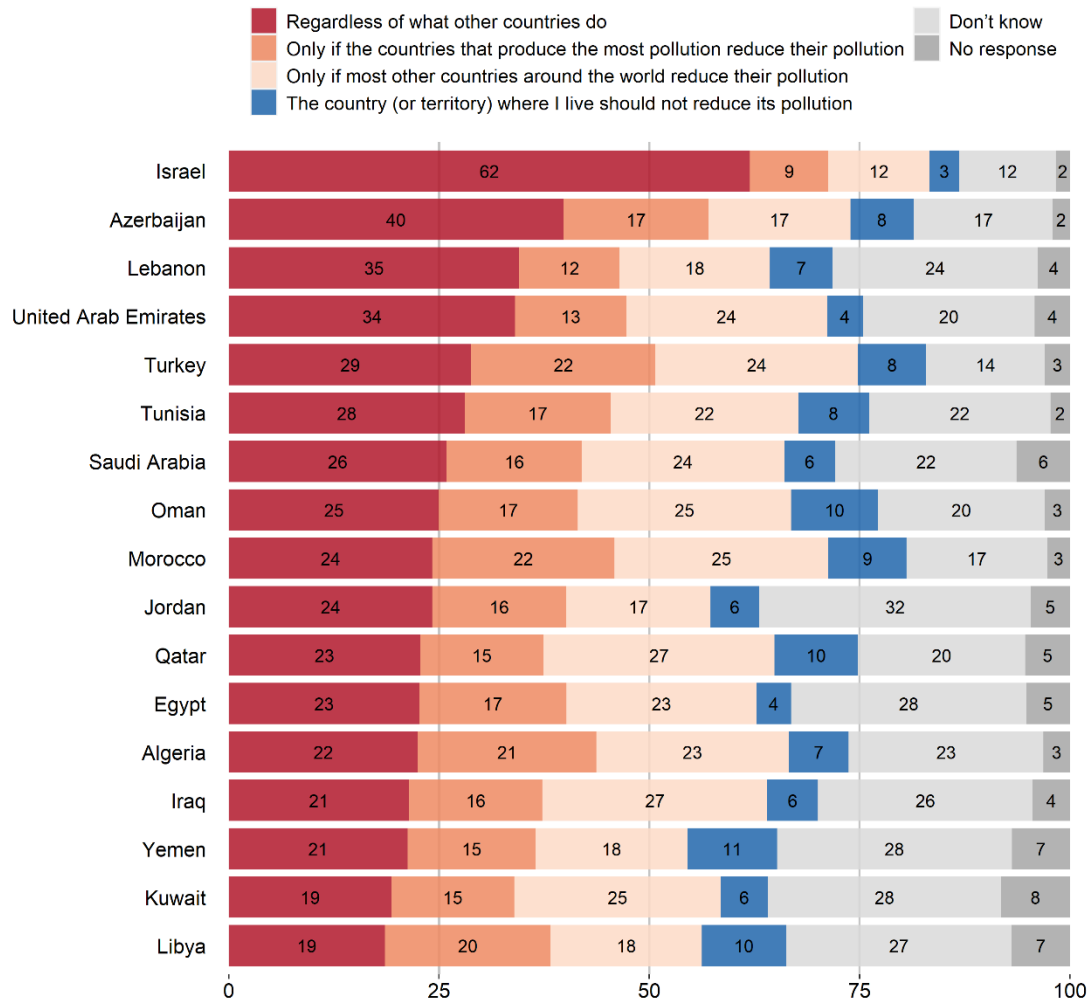

### South America

Do you think that the country (or territory) where you live should reduce its pollution that causes climate change...

## National responsibility to reduce carbon pollution

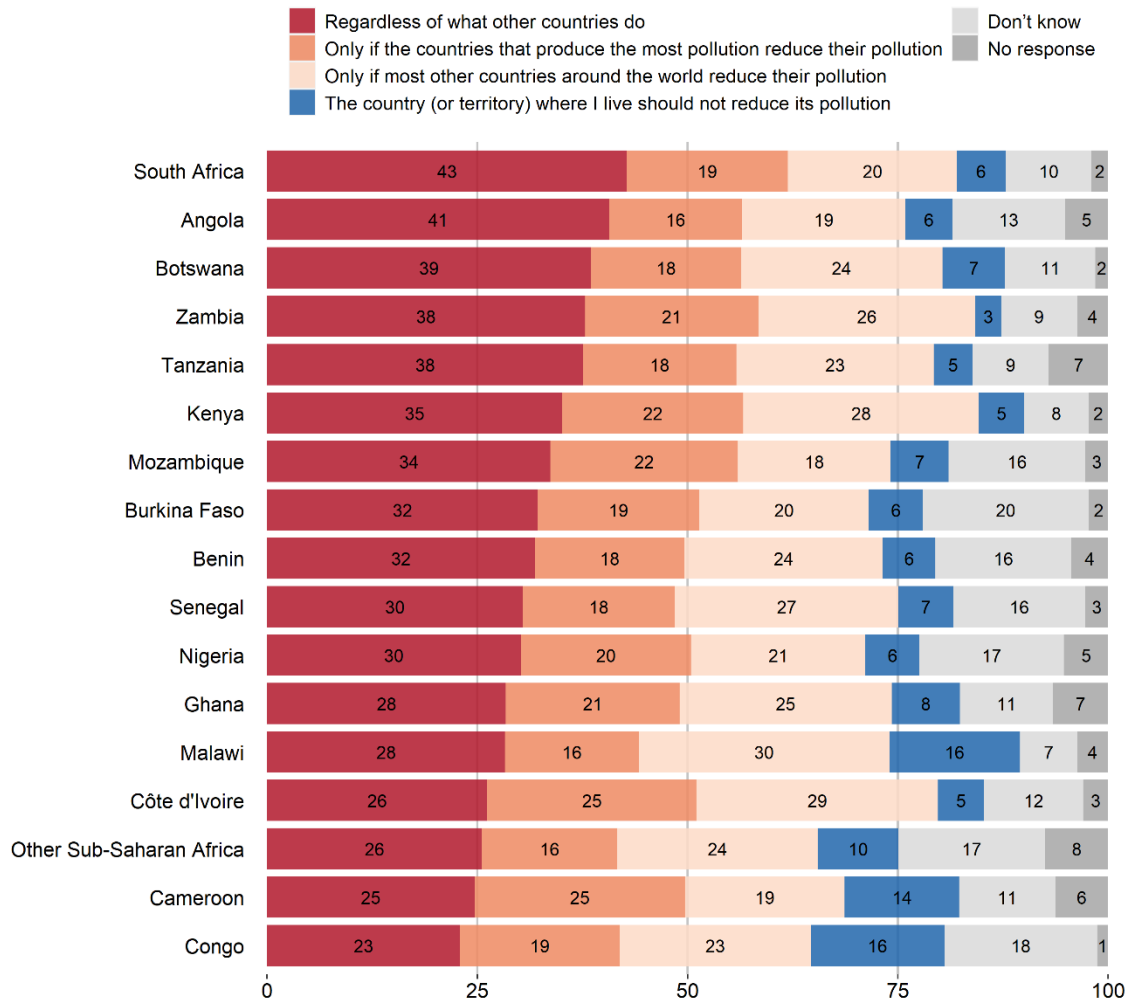

### Southwest Asia & North Africa

Do you think that the country (or territory) where you live should reduce its pollution that causes climate change...

## National responsibility to reduce carbon pollution

### Sub-Saharan Africa

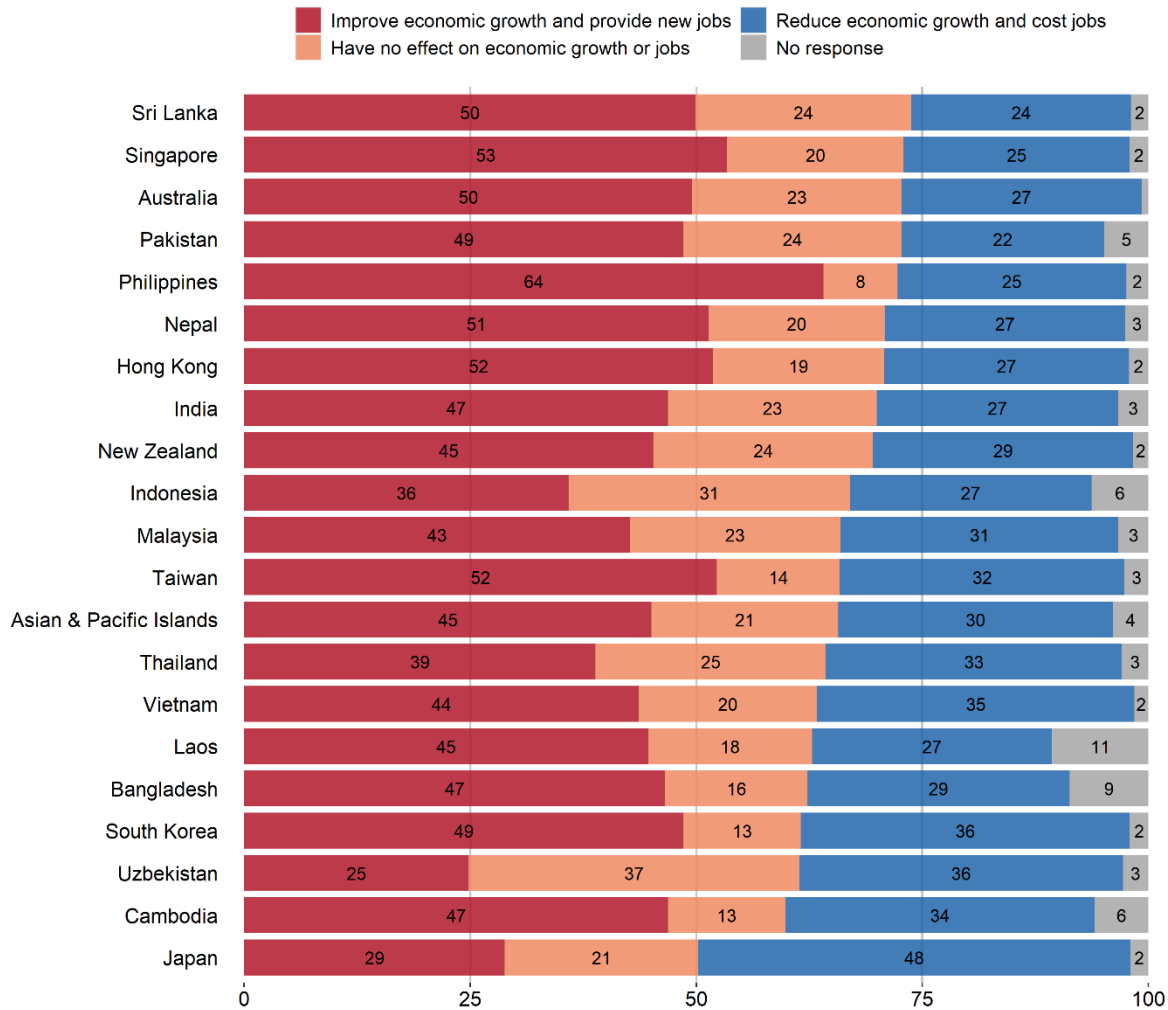

Do you think that the country (or territory) where you live should reduce its pollution that causes climate change...

#### 4.1 Overall, do you think that taking action to reduce climate change will:

### Reducing climate change will provide economic benefits

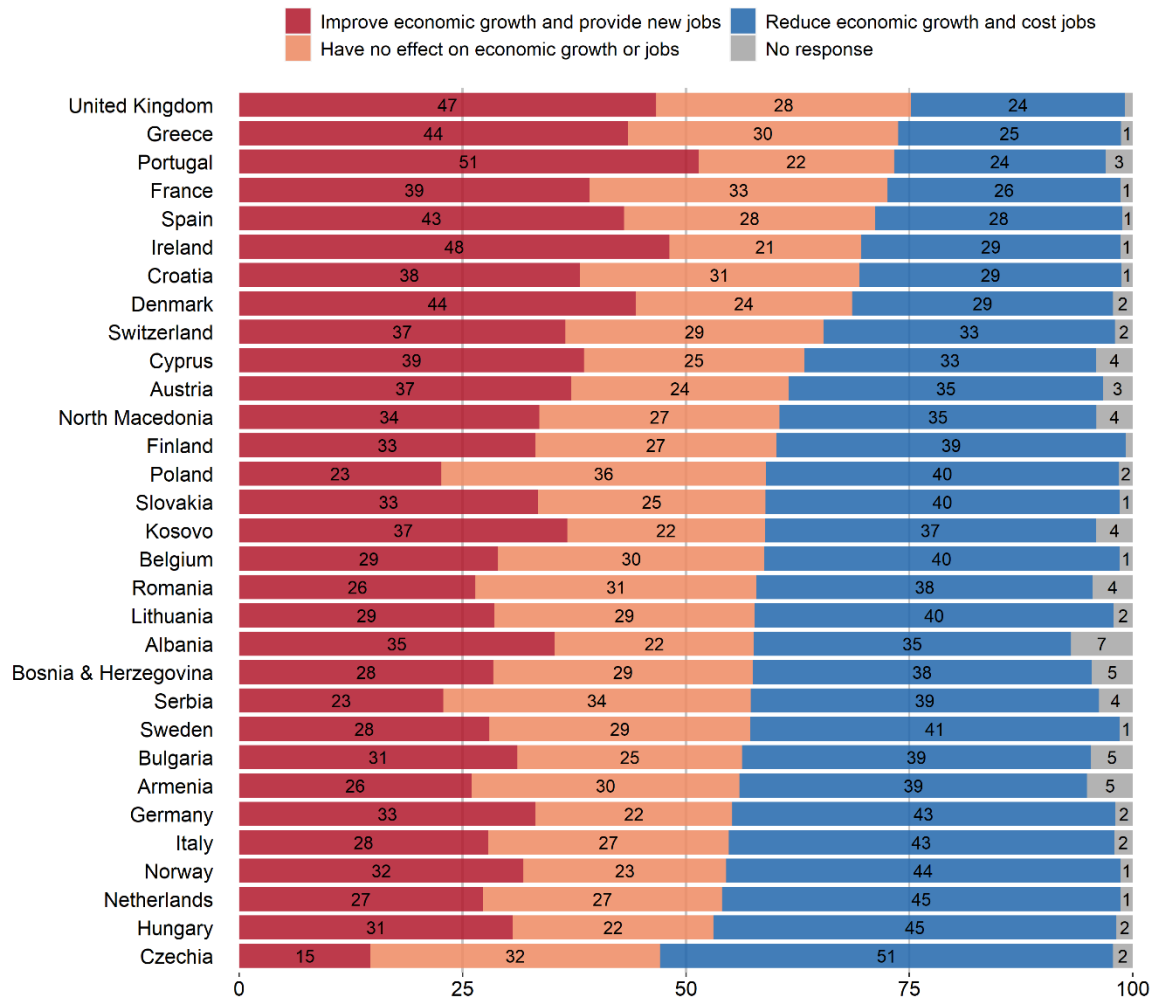

#### Asia & the Pacific

Overall, do you think that taking action to reduce climate change will:

## Reducing climate change will provide economic benefits

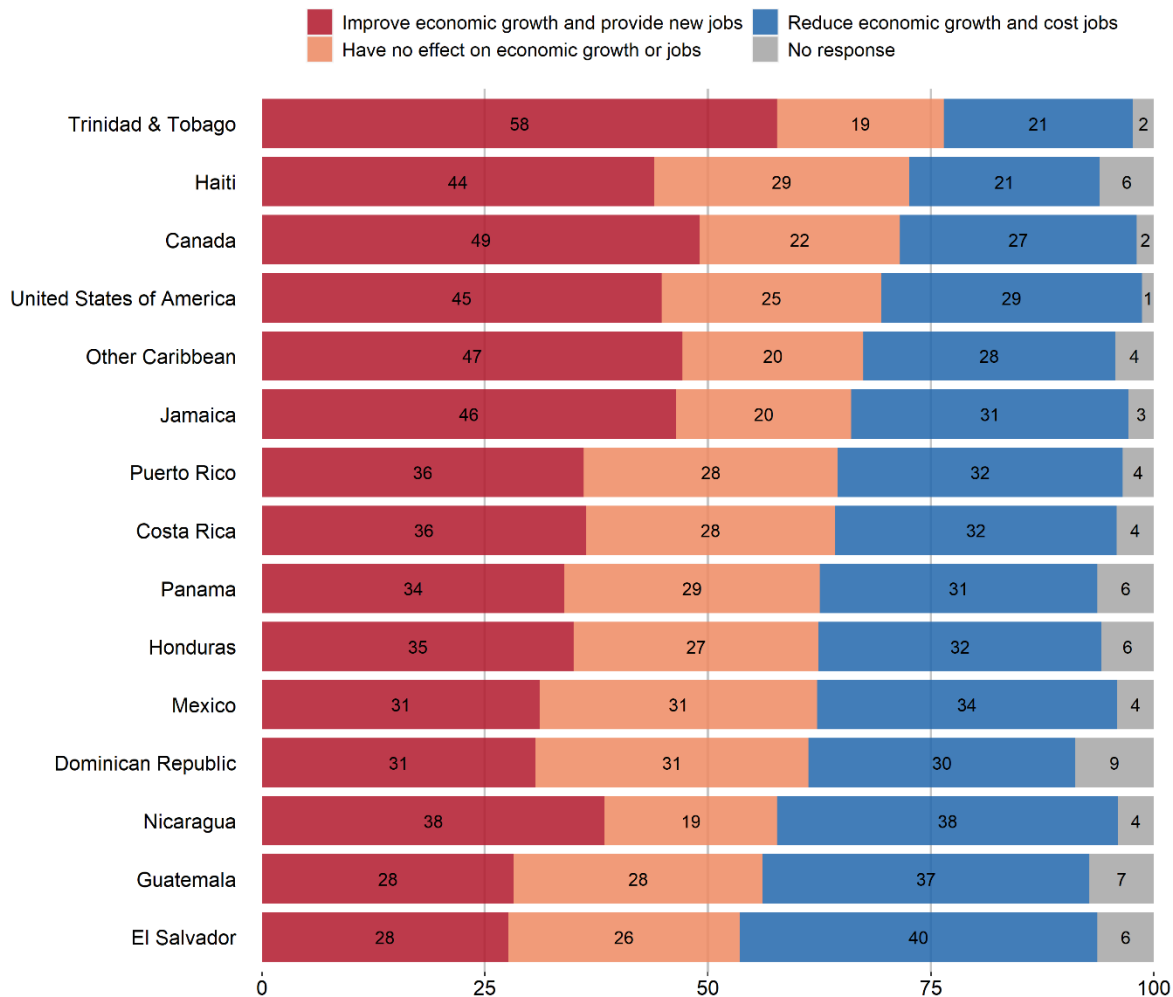

### Europe

Overall, do you think that taking action to reduce climate change will:

## Reducing climate change will provide economic benefits

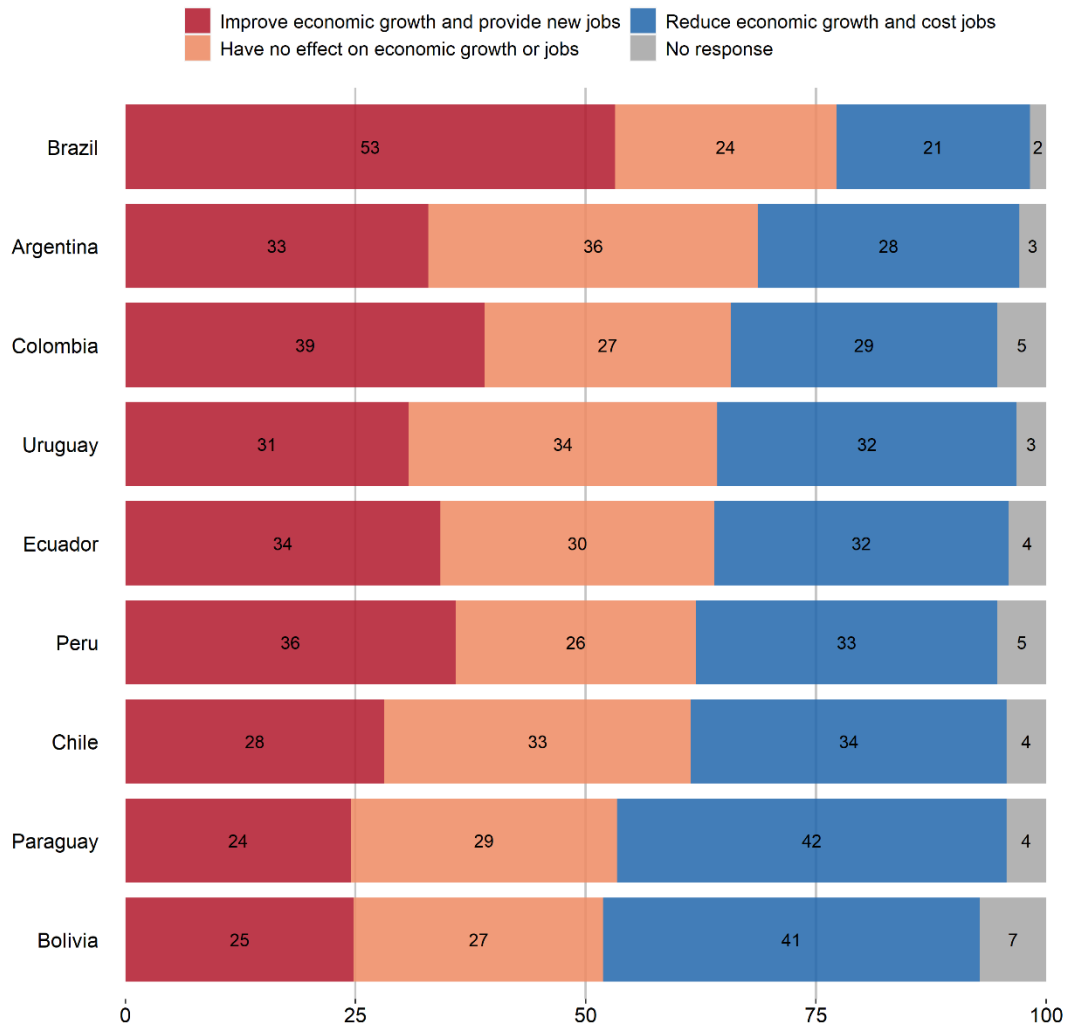

### North America

Overall, do you think that taking action to reduce climate change will:

## Reducing climate change will provide economic benefits

### South America

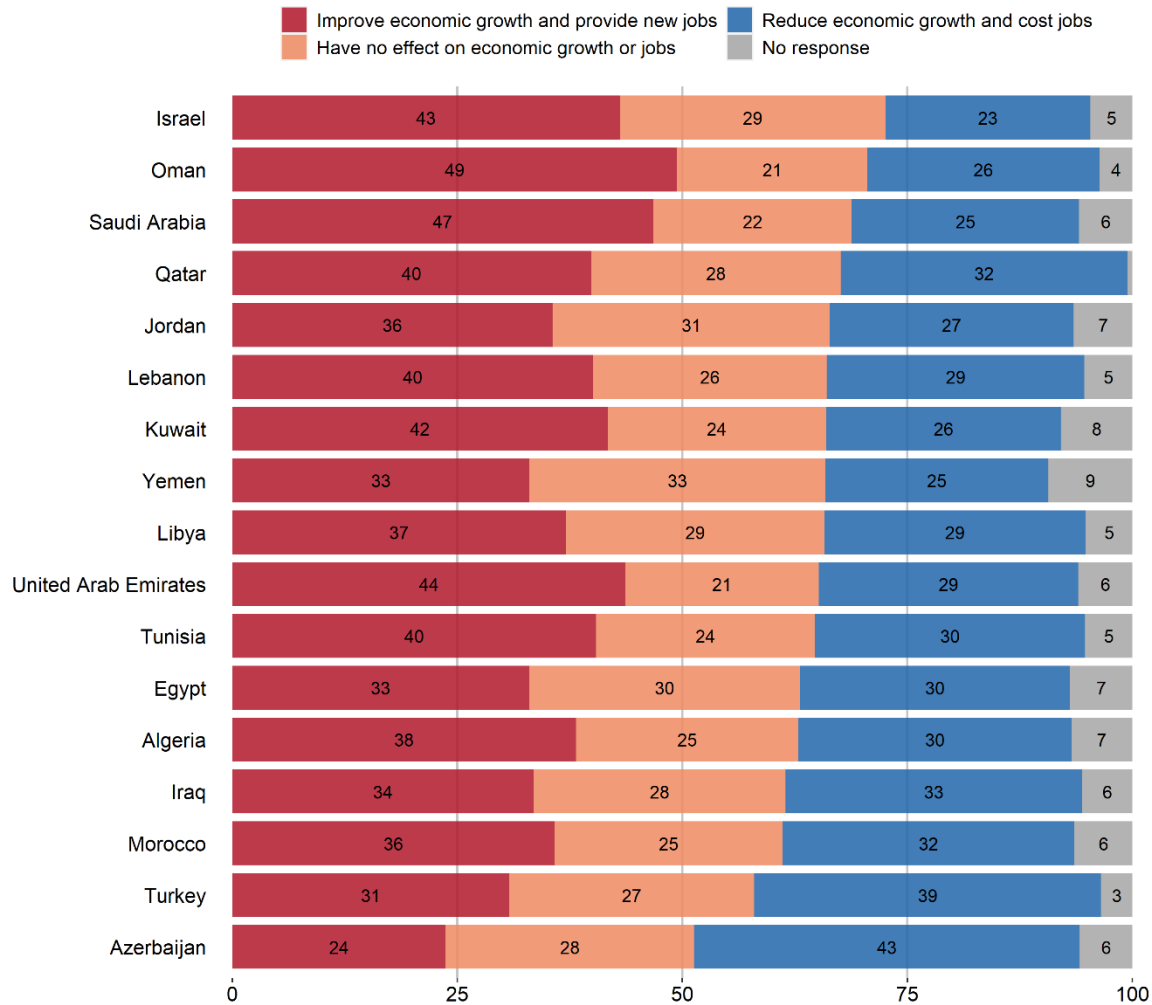

Overall, do you think that taking action to reduce climate change will:

## Reducing climate change will provide economic benefits

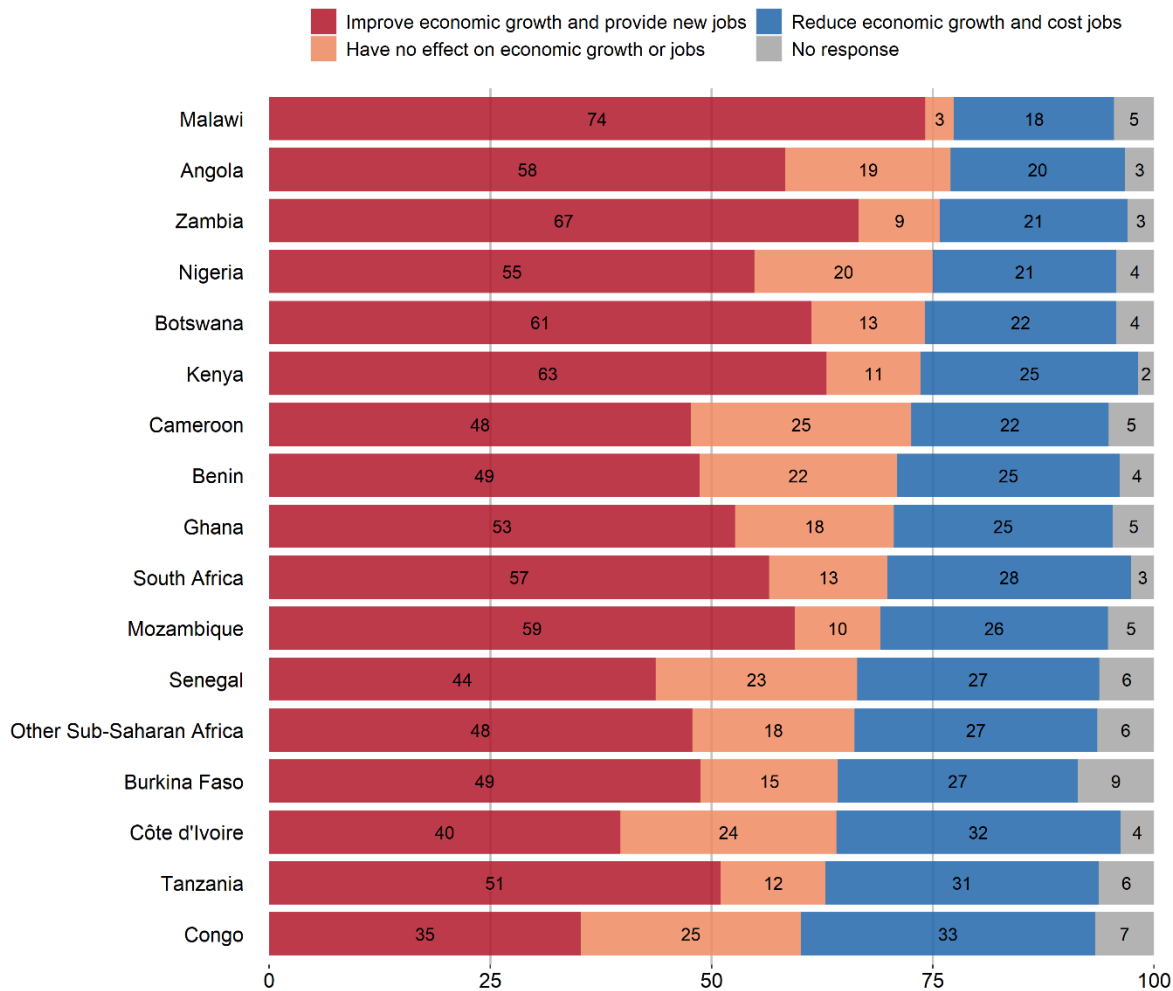

### Southwest Asia & North Africa

Overall, do you think that taking action to reduce climate change will:

## Reducing climate change will provide economic benefits

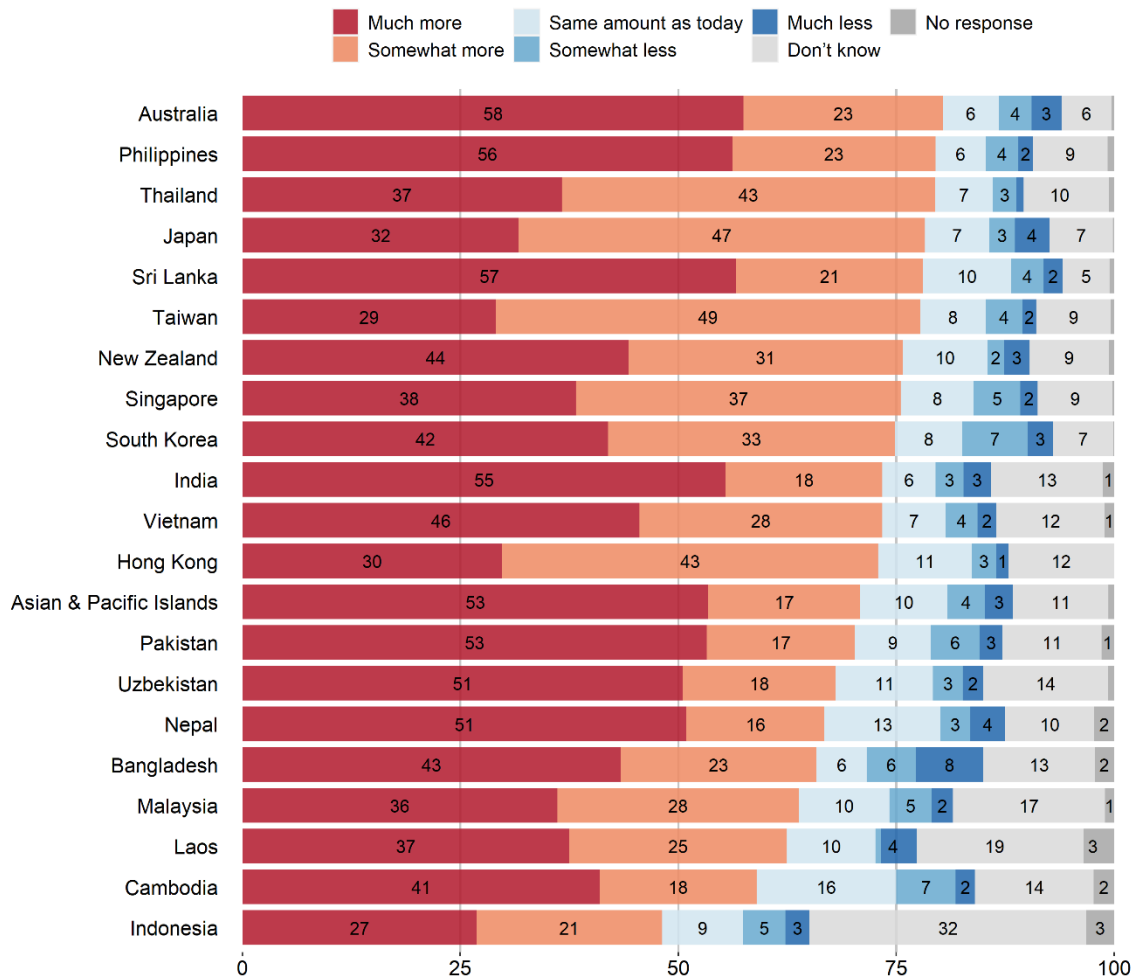

### Sub-Saharan Africa

## 4.2 Do you think that in the future the country or territory where you live should use more, less, or about the same amount of renewable sources of energy, like solar panels and wind turbines, as it does today?

### Support for increasing renewable energy

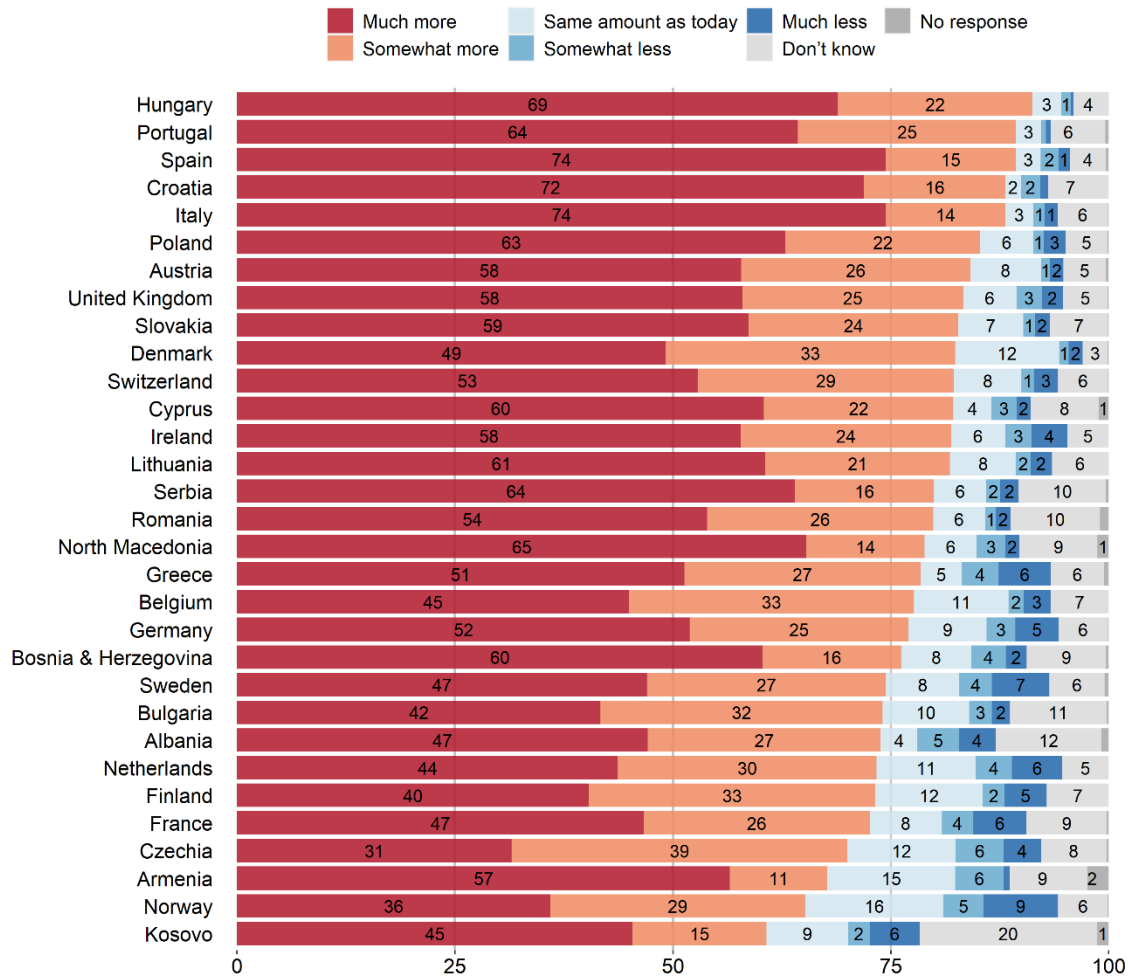

#### Asia & the Pacific

Do you think that in the future the country (or territory) where you live should use more, less, or about the same amount of renewable sources of energy, like solar panels and wind turbines, as it does today?

## Support for increasing renewable energy

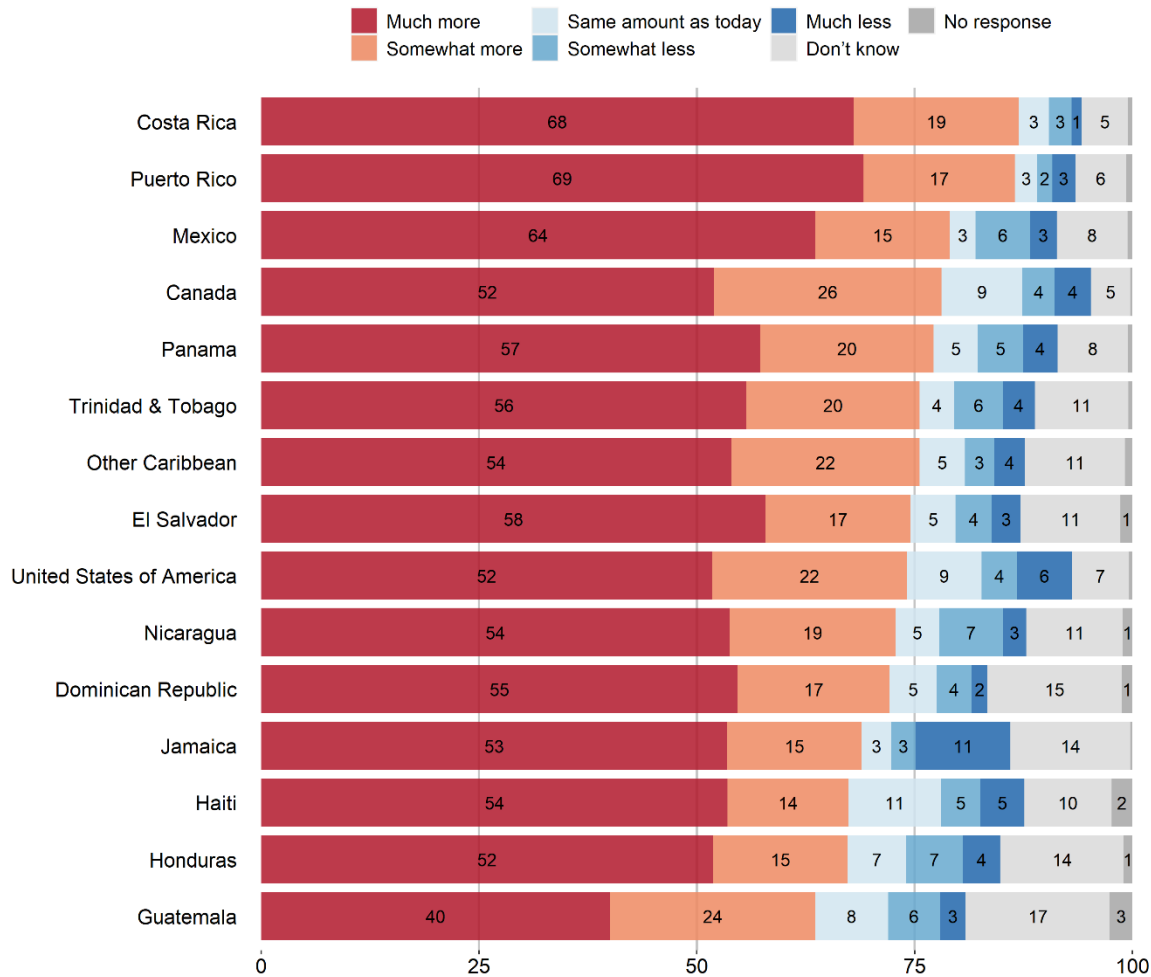

### Europe

Do you think that in the future the country (or territory) where you live should use more, less, or about the same amount of renewable sources of energy, like solar panels and wind turbines, as it does today?

## Support for increasing renewable energy

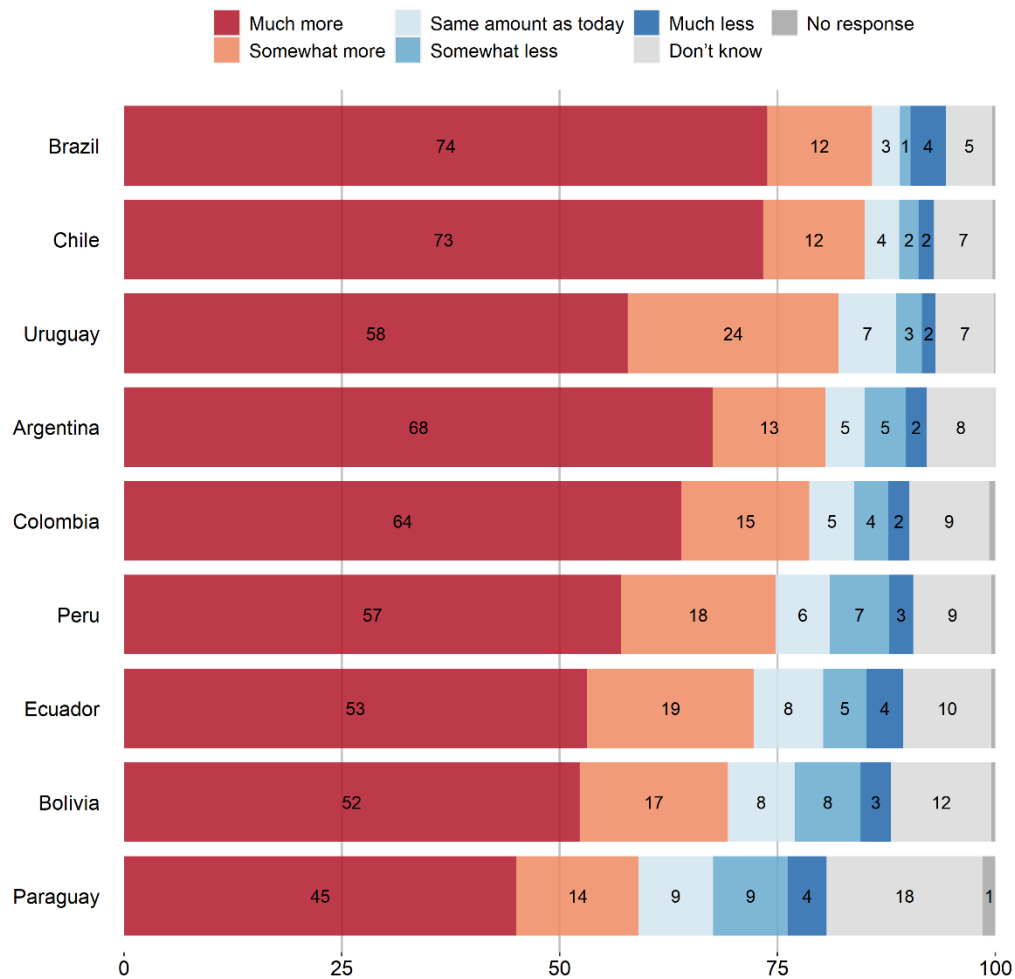

### North America

Do you think that in the future the country (or territory) where you live should use more, less, or about the same amount of renewable sources of energy, like solar panels and wind turbines, as it does today?

## Support for increasing renewable energy

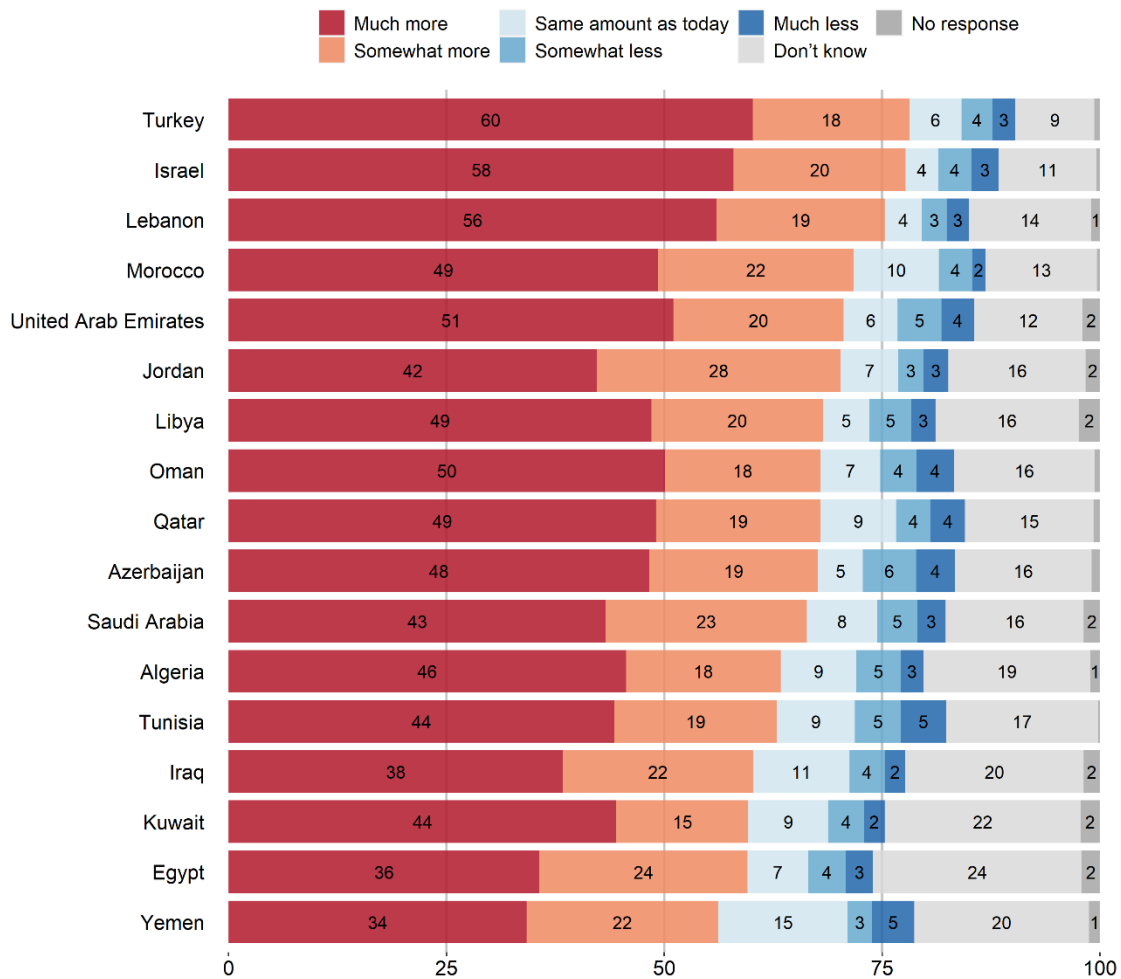

### South America

Do you think that in the future the country (or territory) where you live should use more, less, or about the same amount of renewable sources of energy, like solar panels and wind turbines, as it does today?

## Support for increasing renewable energy

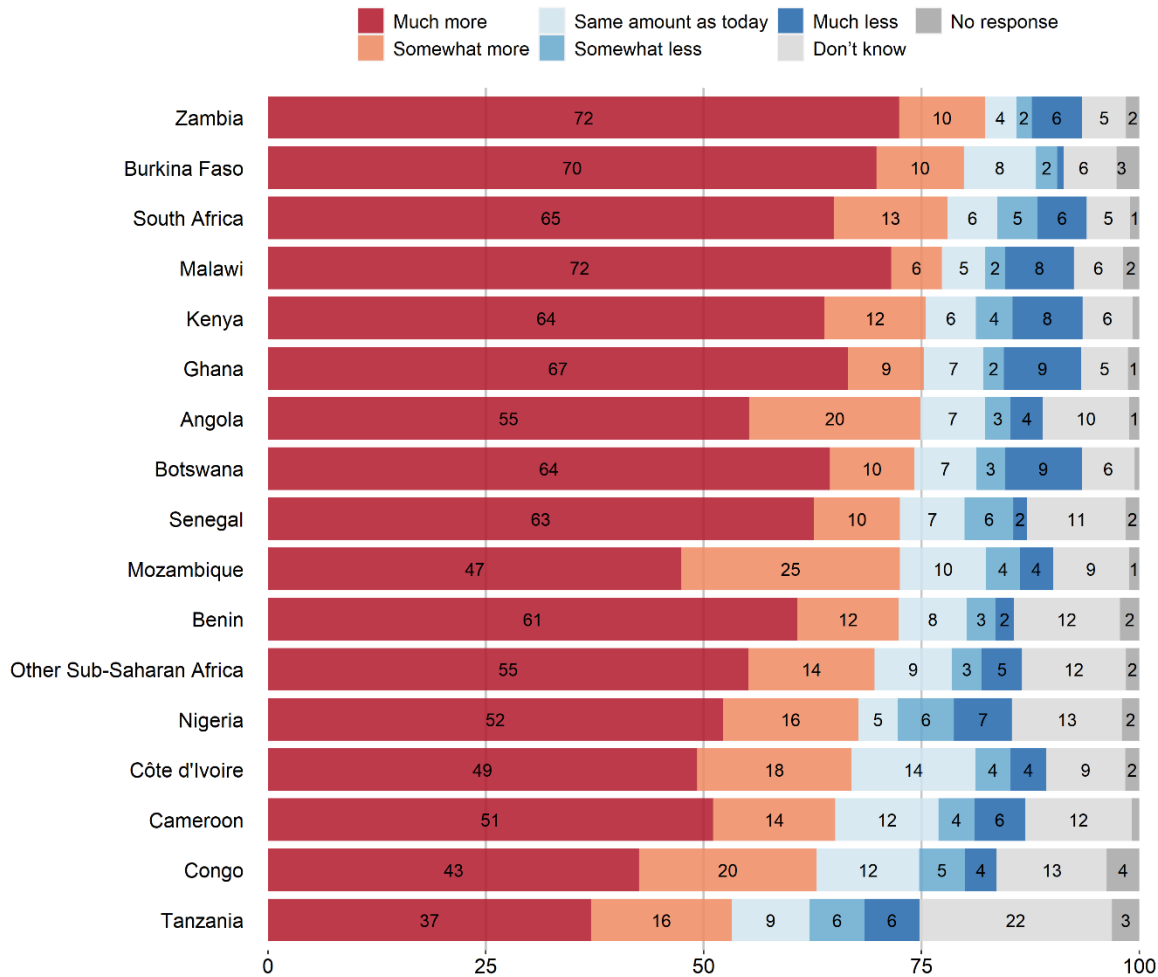

### Southwest Asia & North Africa

Do you think that in the future the country (or territory) where you live should use more, less, or about the same amount of renewable sources of energy, like solar panels and wind turbines, as it does today?

## Support for increasing renewable energy

### Sub-Saharan Africa

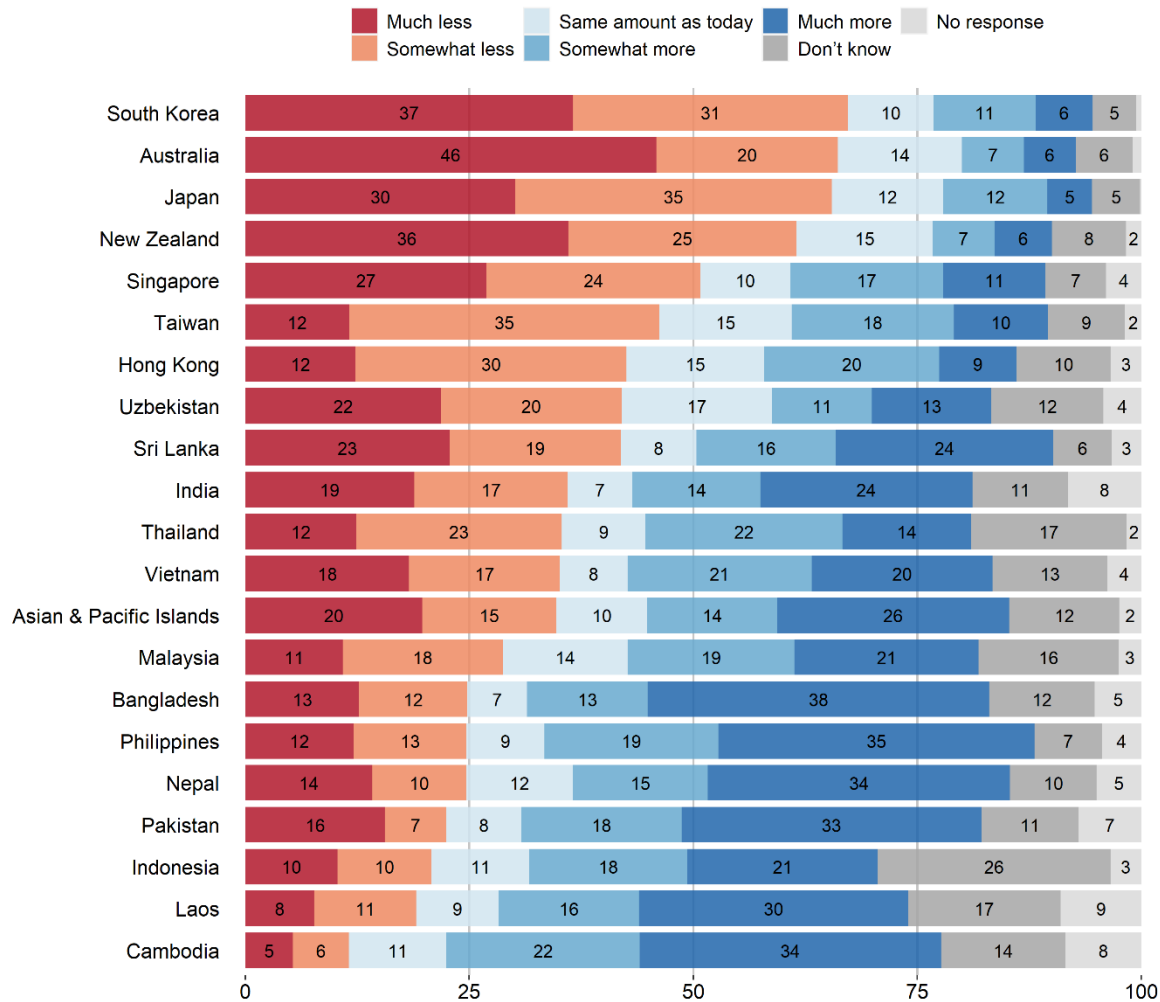

Do you think that in the future the country (or territory) where you live should use more, less, or about the same amount of renewable sources of energy, like solar panels and wind turbines, as it does today?

### 4.3 Do you think that in the future the country or territory where you live should use more, less, or about the same amount of fossil fuels, like coal, oil, and gas, as it does today?

#### Support for reducing fossil fuels

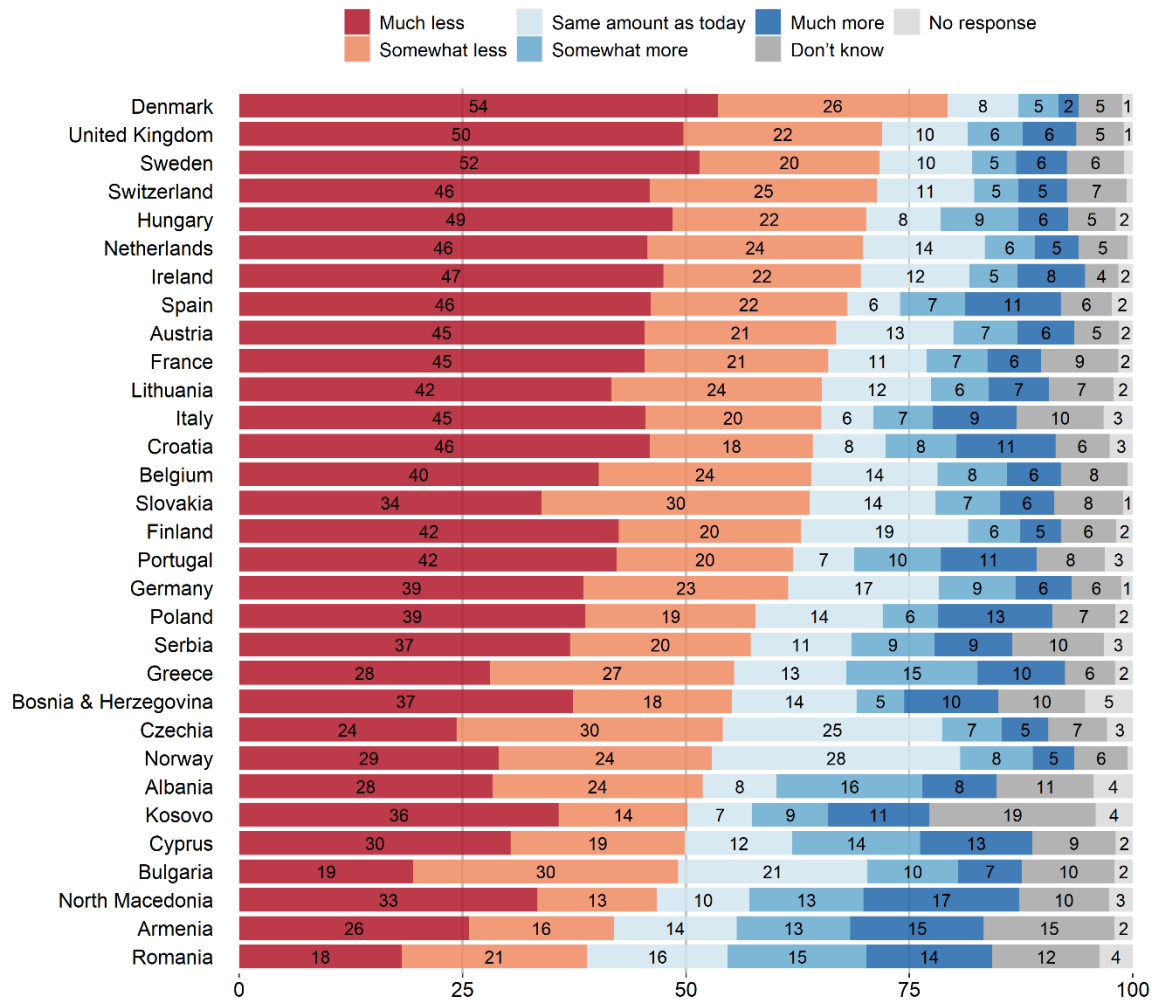

##### Asia & the Pacific

Do you think that in the future the country (or territory) where you live should use more, less, or about the same amount of fossil fuels, like coal, oil, and gas, as it does today?

## Support for reducing fossil fuels

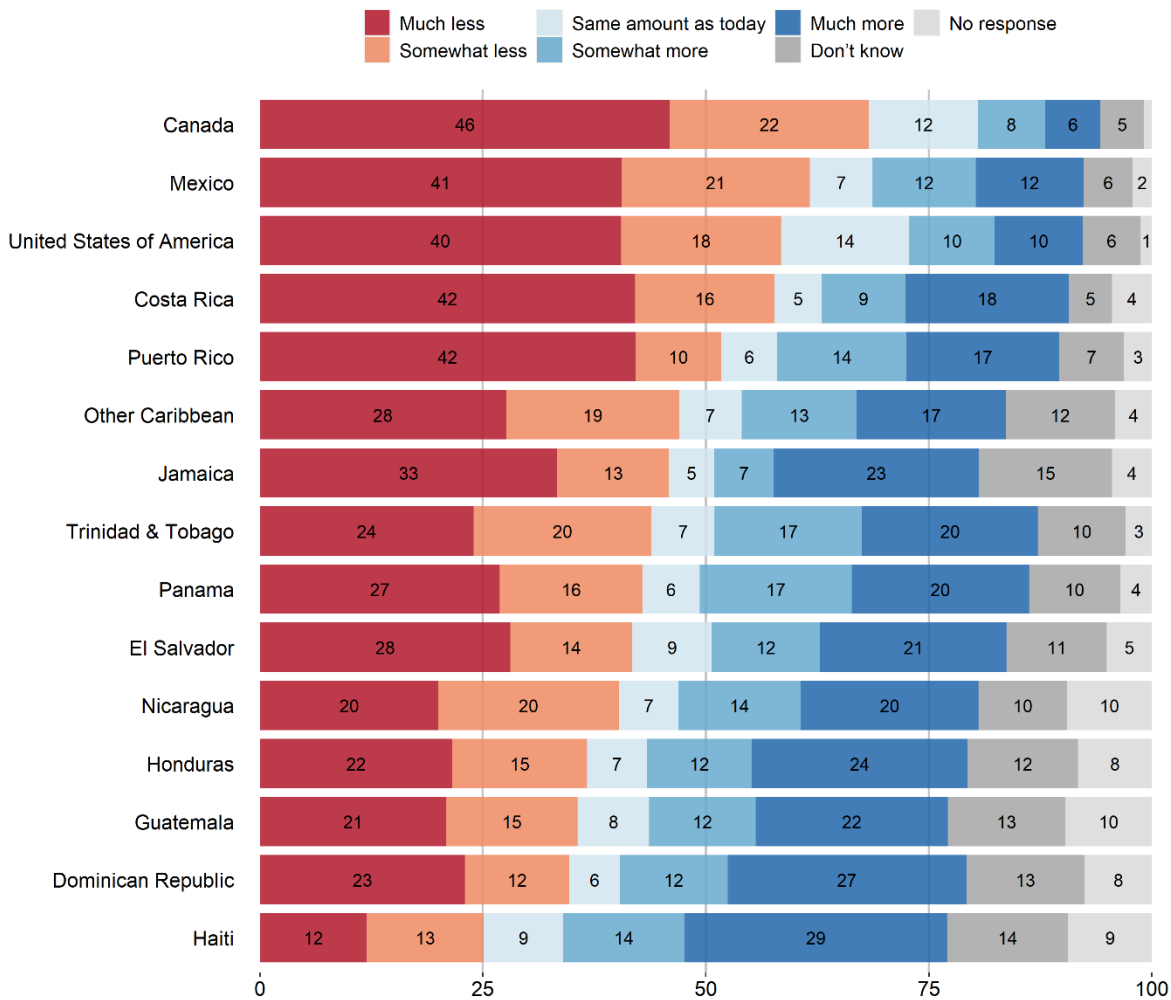

### Europe

Do you think that in the future the country (or territory) where you live should use more, less, or about the same amount of fossil fuels, like coal, oil, and gas, as it does today?

## Support for reducing fossil fuels

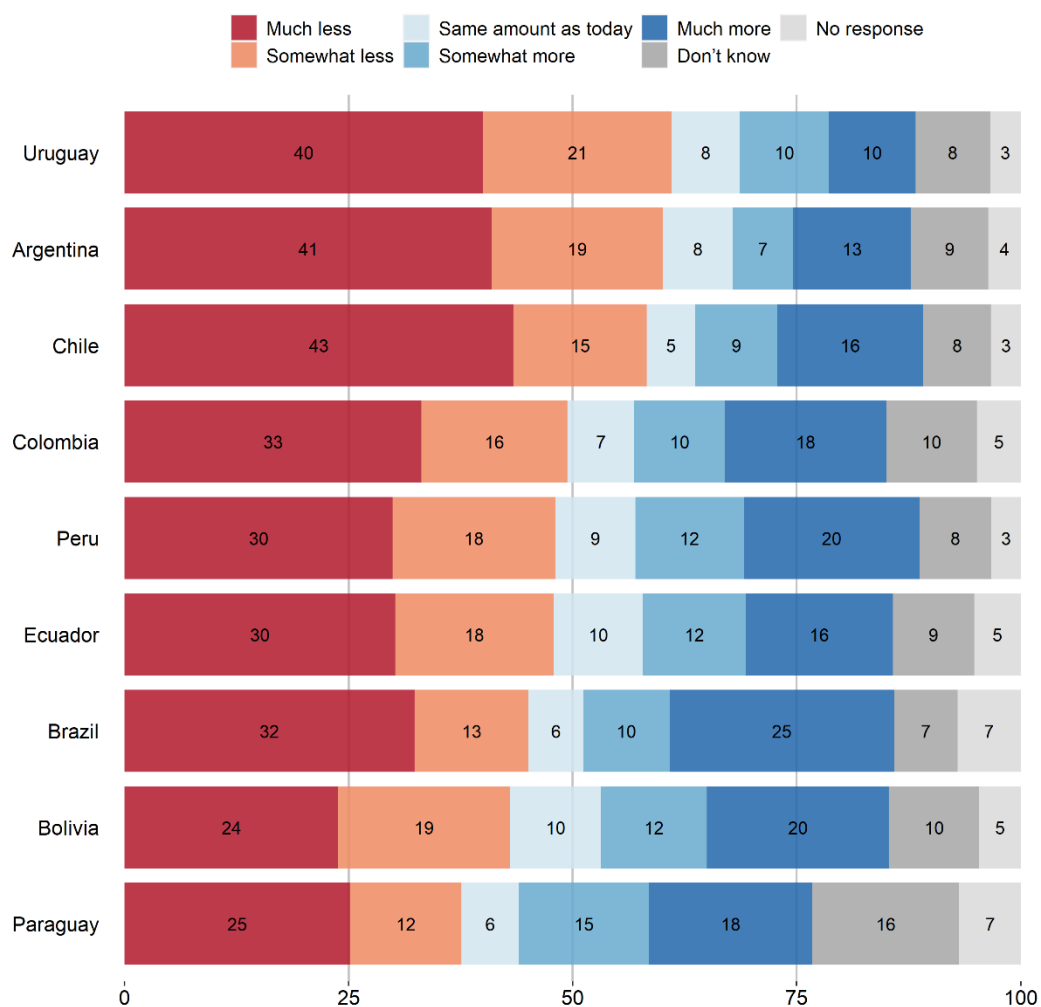

### North America

Do you think that in the future the country (or territory) where you live should use more, less, or about the same amount of fossil fuels, like coal, oil, and gas, as it does today?

## Support for reducing fossil fuels

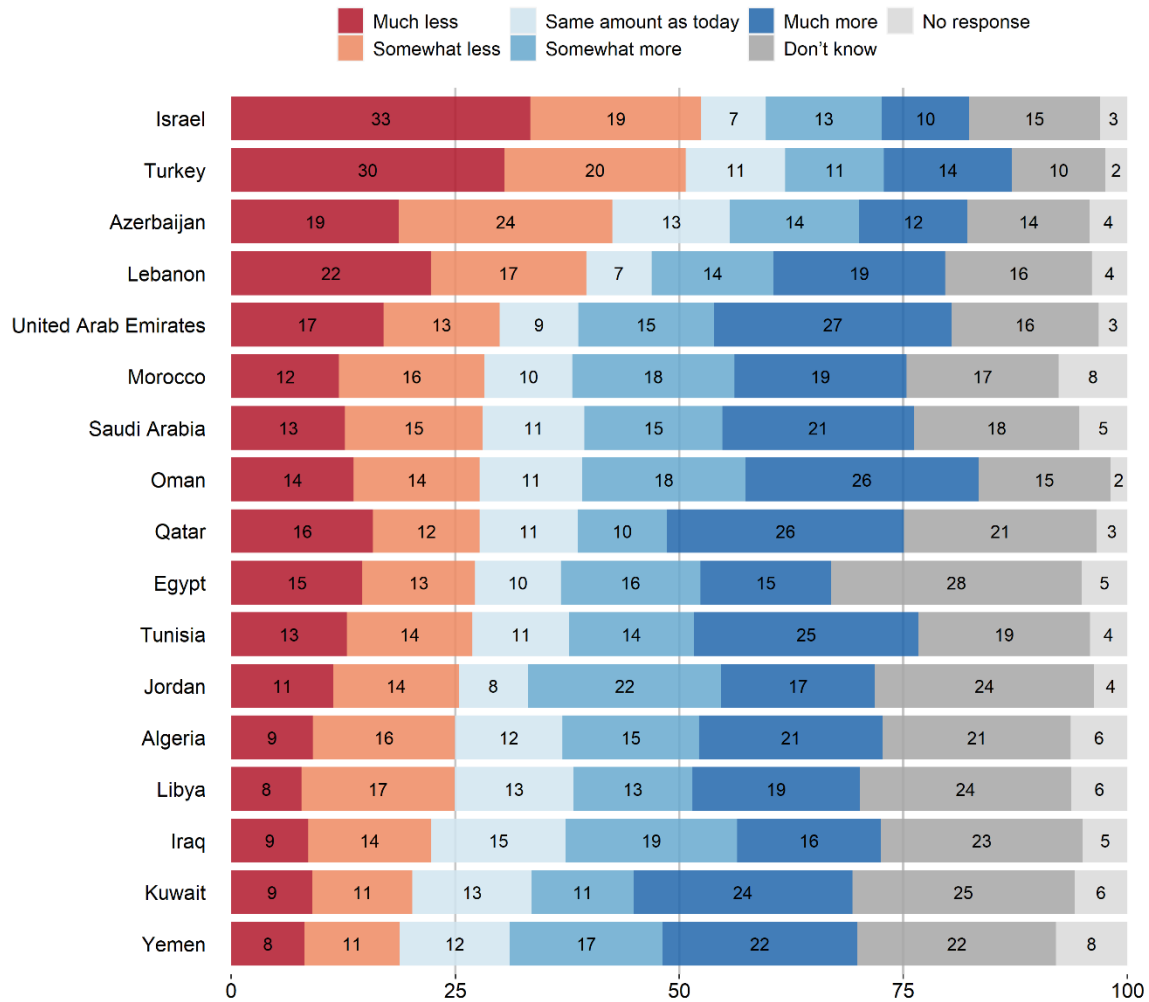

### South America

Do you think that in the future the country (or territory) where you live should use more, less, or about the same amount of fossil fuels, like coal, oil, and gas, as it does today?

## Support for reducing fossil fuels

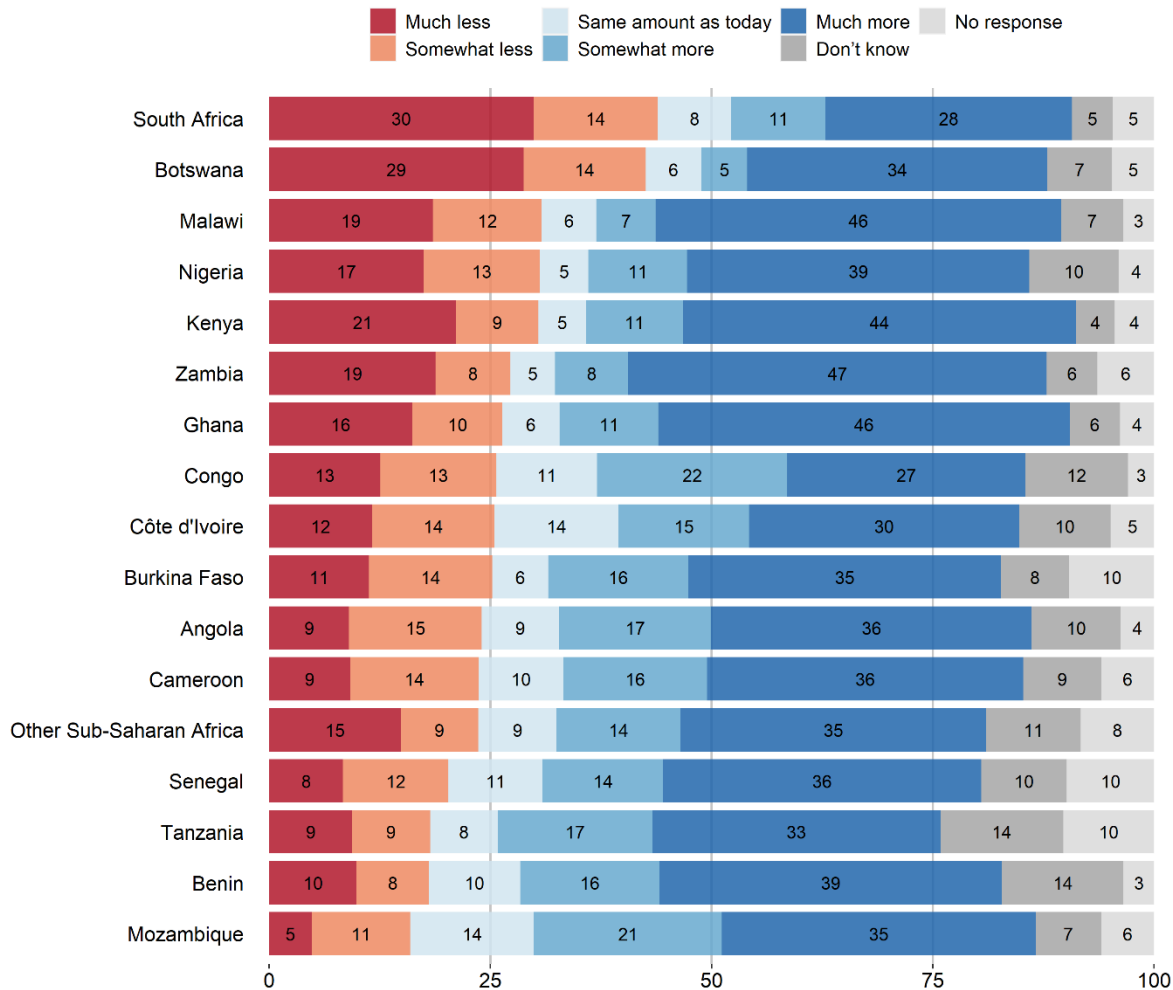

### Southwest Asia & North Africa

Do you think that in the future the country (or territory) where you live should use more, less, or about the same amount of fossil fuels, like coal, oil, and gas, as it does today?

## Support for reducing fossil fuels

### Sub-Saharan Africa

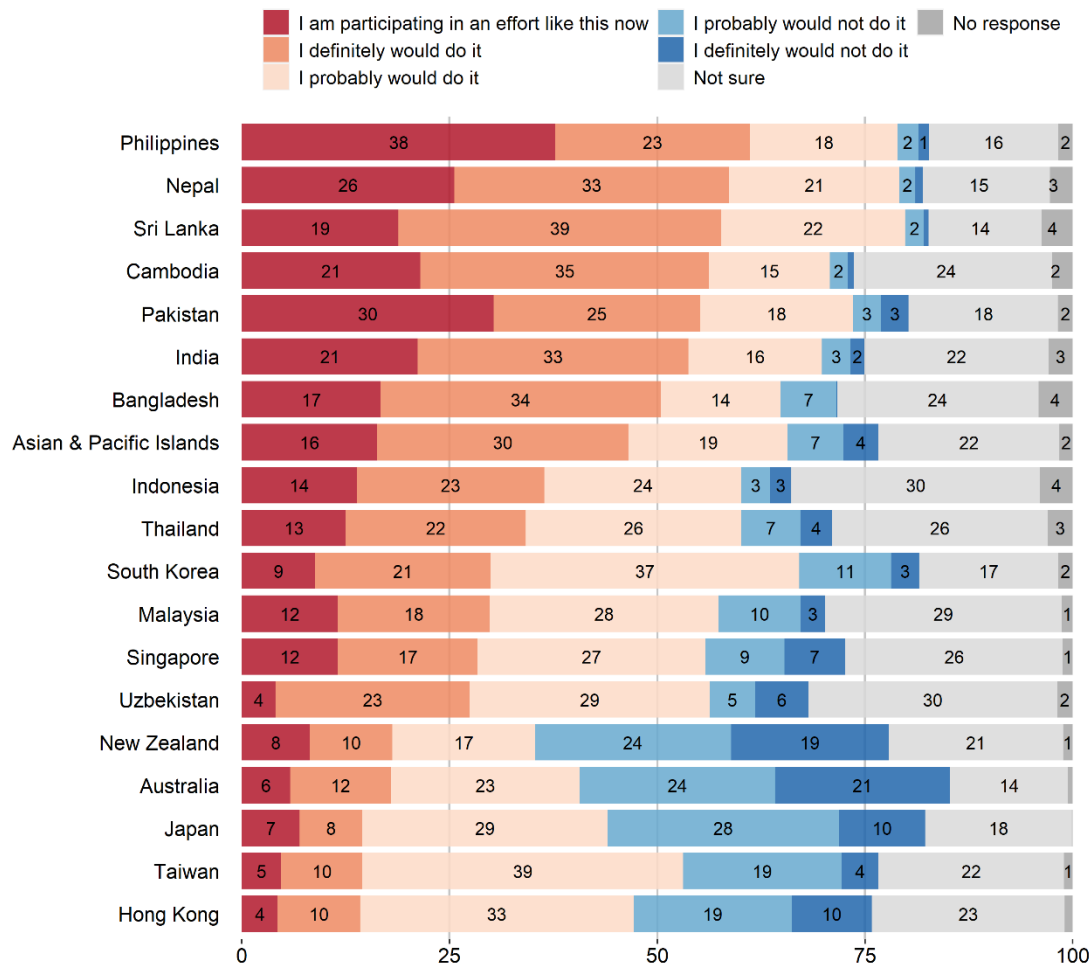

Do you think that in the future the country (or territory) where you live should use more, less, or about the same amount of fossil fuels, like coal, oil, and gas, as it does today?

## 5.1 How willing or unwilling are you to join an organized group working to convince leaders in the country or territory where you live to take action to reduce climate change?

### Willingness to participate in an organized group for climate action

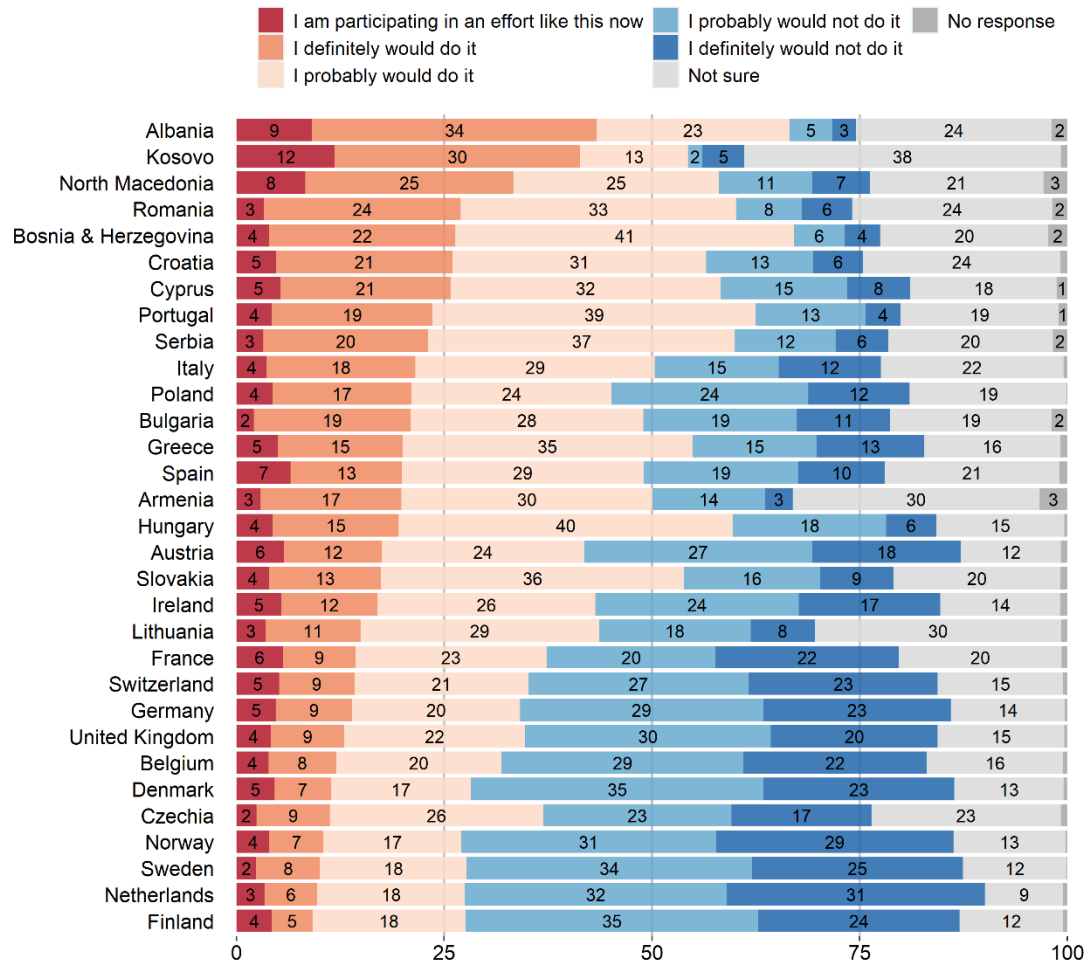

#### Asia & the Pacific

How willing or unwilling are you to join an organized group working to convince leaders in the country (or territory) where you live to take action to reduce climate change?

## Willingness to participate in an organized group for climate action

### Europe

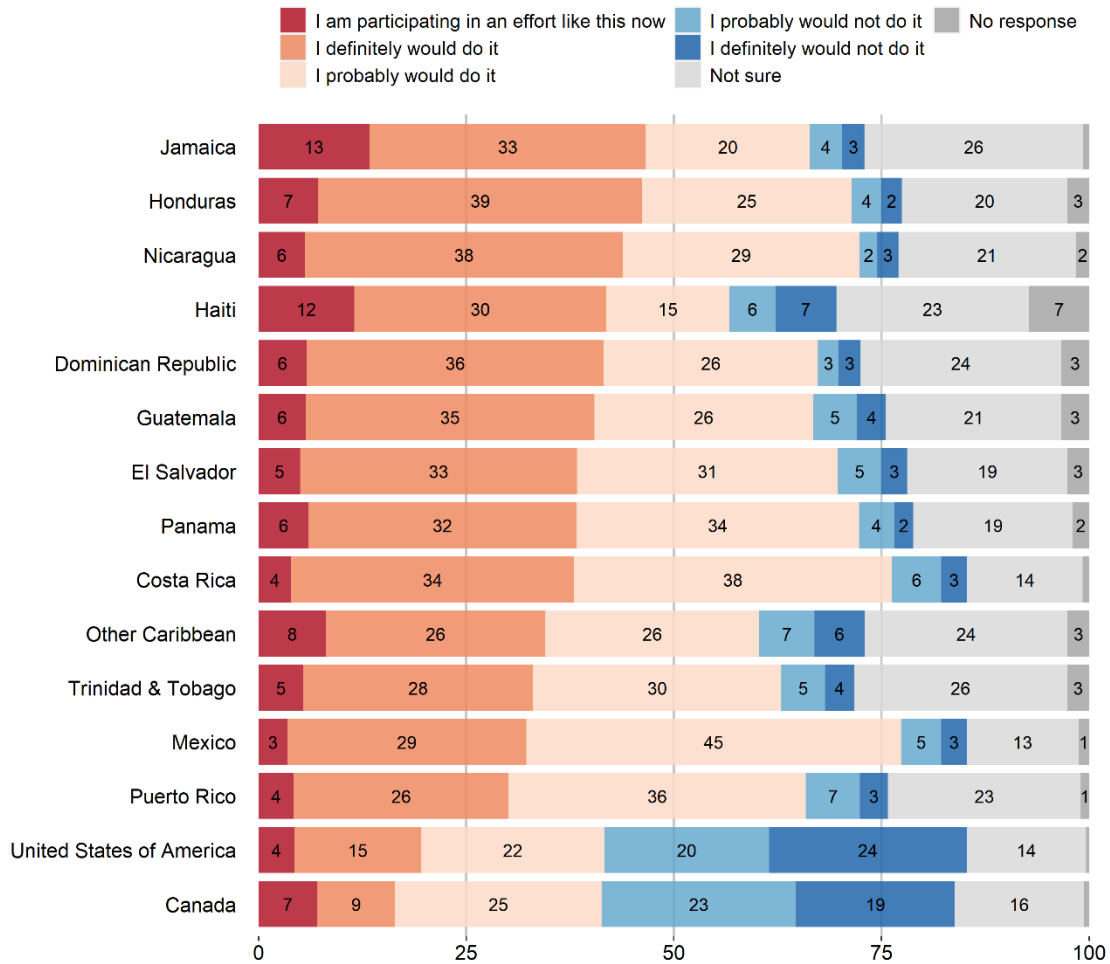

How willing or unwilling are you to join an organized group working to convince leaders in the country (or territory) where you live to take action to reduce climate change?

## Willingness to participate in an organized group for climate action

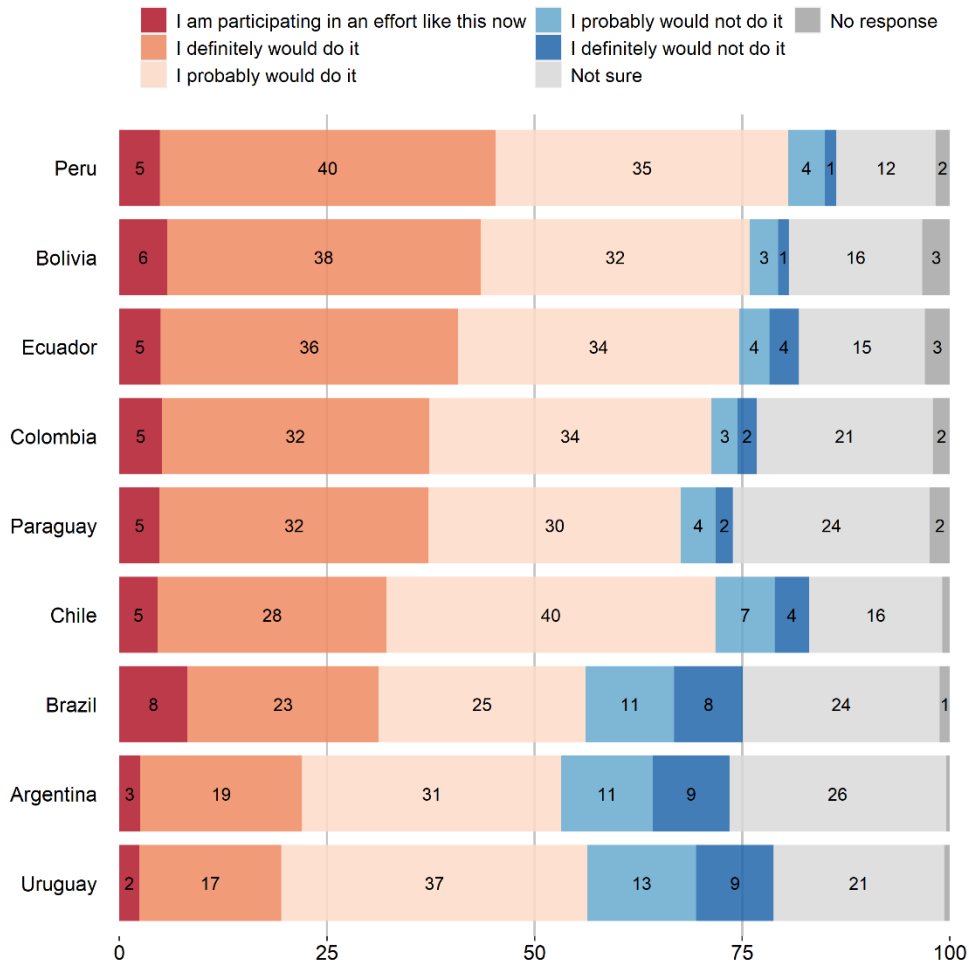

### North America

How willing or unwilling are you to join an organized group working to convince leaders in the country (or territory) where you live to take action to reduce climate change?

## Willingness to participate in an organized group for climate action

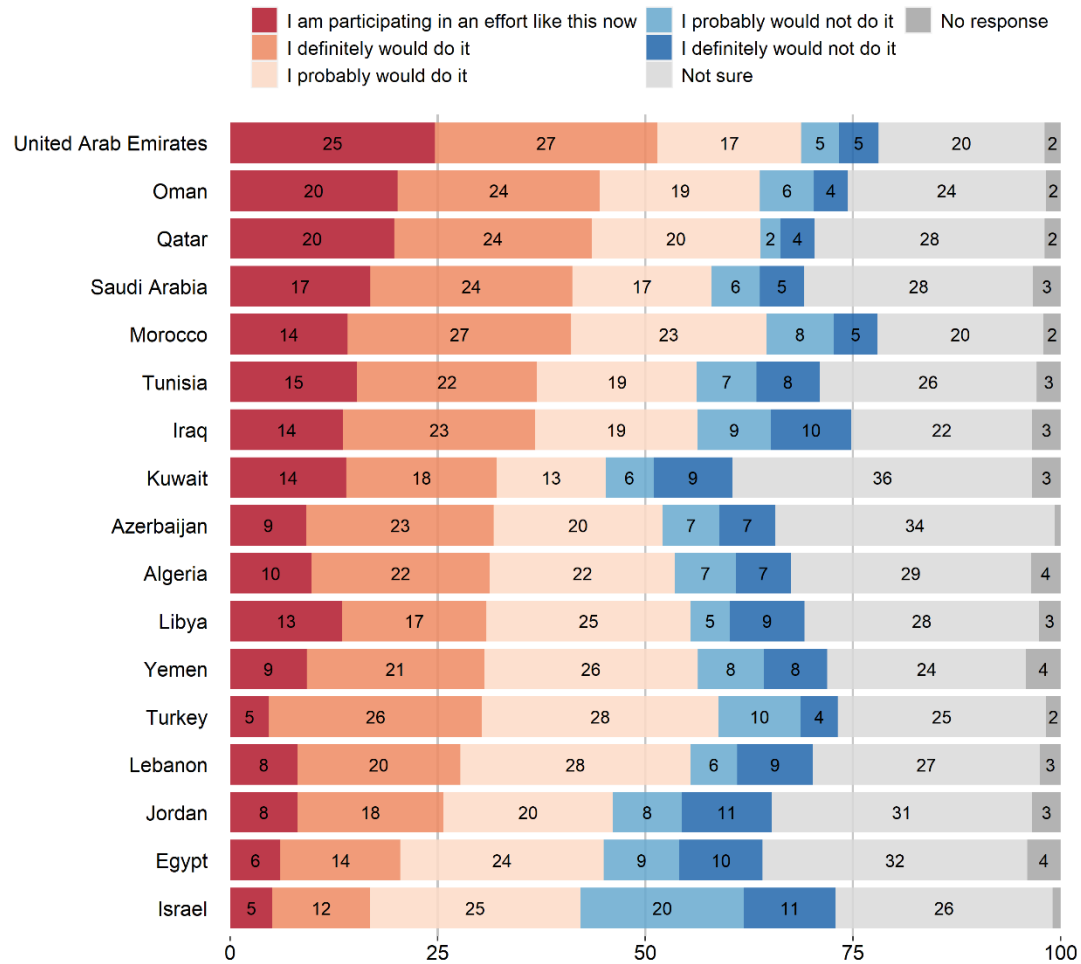

### South America

How willing or unwilling are you to join an organized group working to convince leaders in the country (or territory) where you live to take action to reduce climate change?

## Willingness to participate in an organized group for climate action

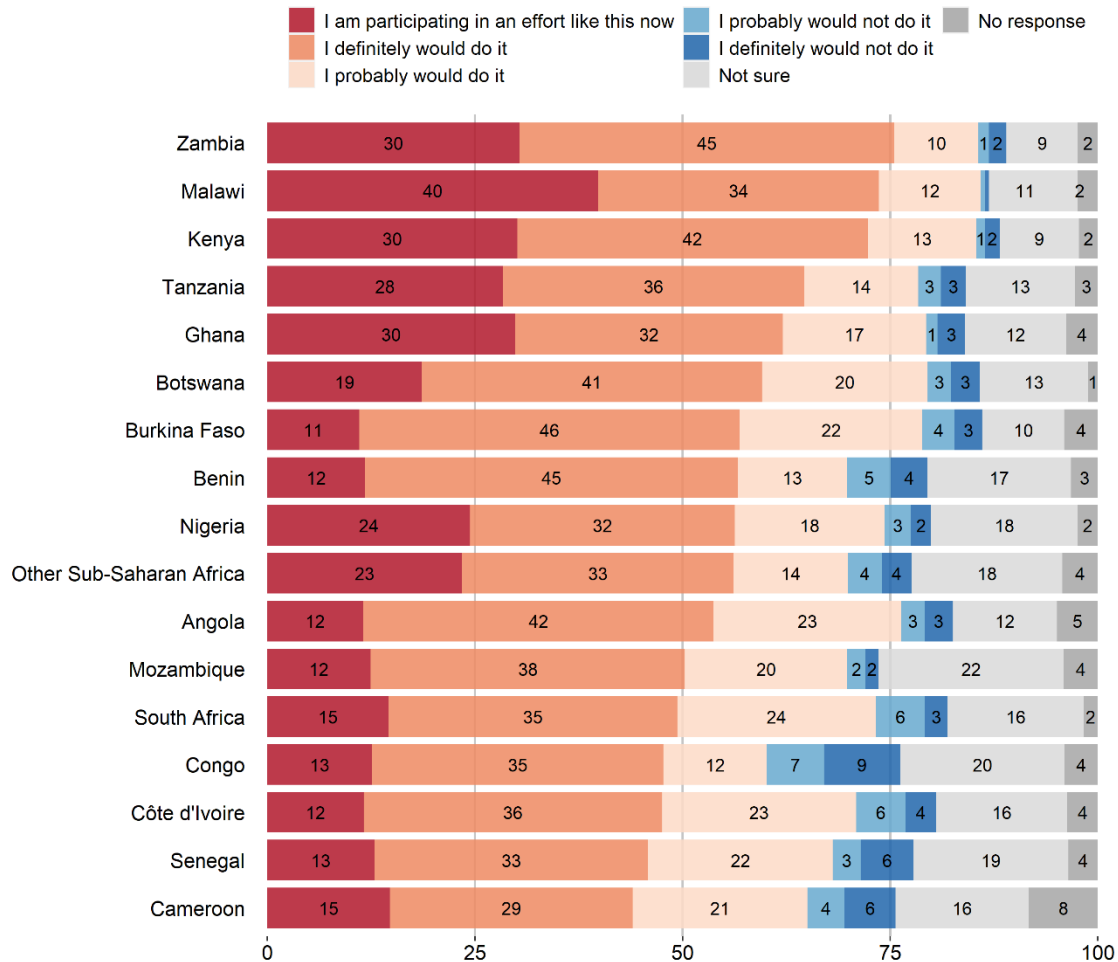

### Southwest Asia & North Africa

How willing or unwilling are you to join an organized group working to convince leaders in the country (or territory) where you live to take action to reduce climate change?

## Willingness to participate in an organized group for climate action

### Sub-Saharan Africa

How willing or unwilling are you to join an organized group working to convince leaders in the country (or territory) where you live to take action to reduce climate change?
